

Reliability Analysis Update PJM West

Jeffrey Goldberg, Brian Hau
Sub Regional RTEP Committee – PJM West

February 13, 2026

Cancellations

Avon 138 kV Breakers "4-B-107 and 4-B-84" Replacement

Cancellation of b3985.1

Previously Presented: 11/14/2025

Original Proposed Scope:

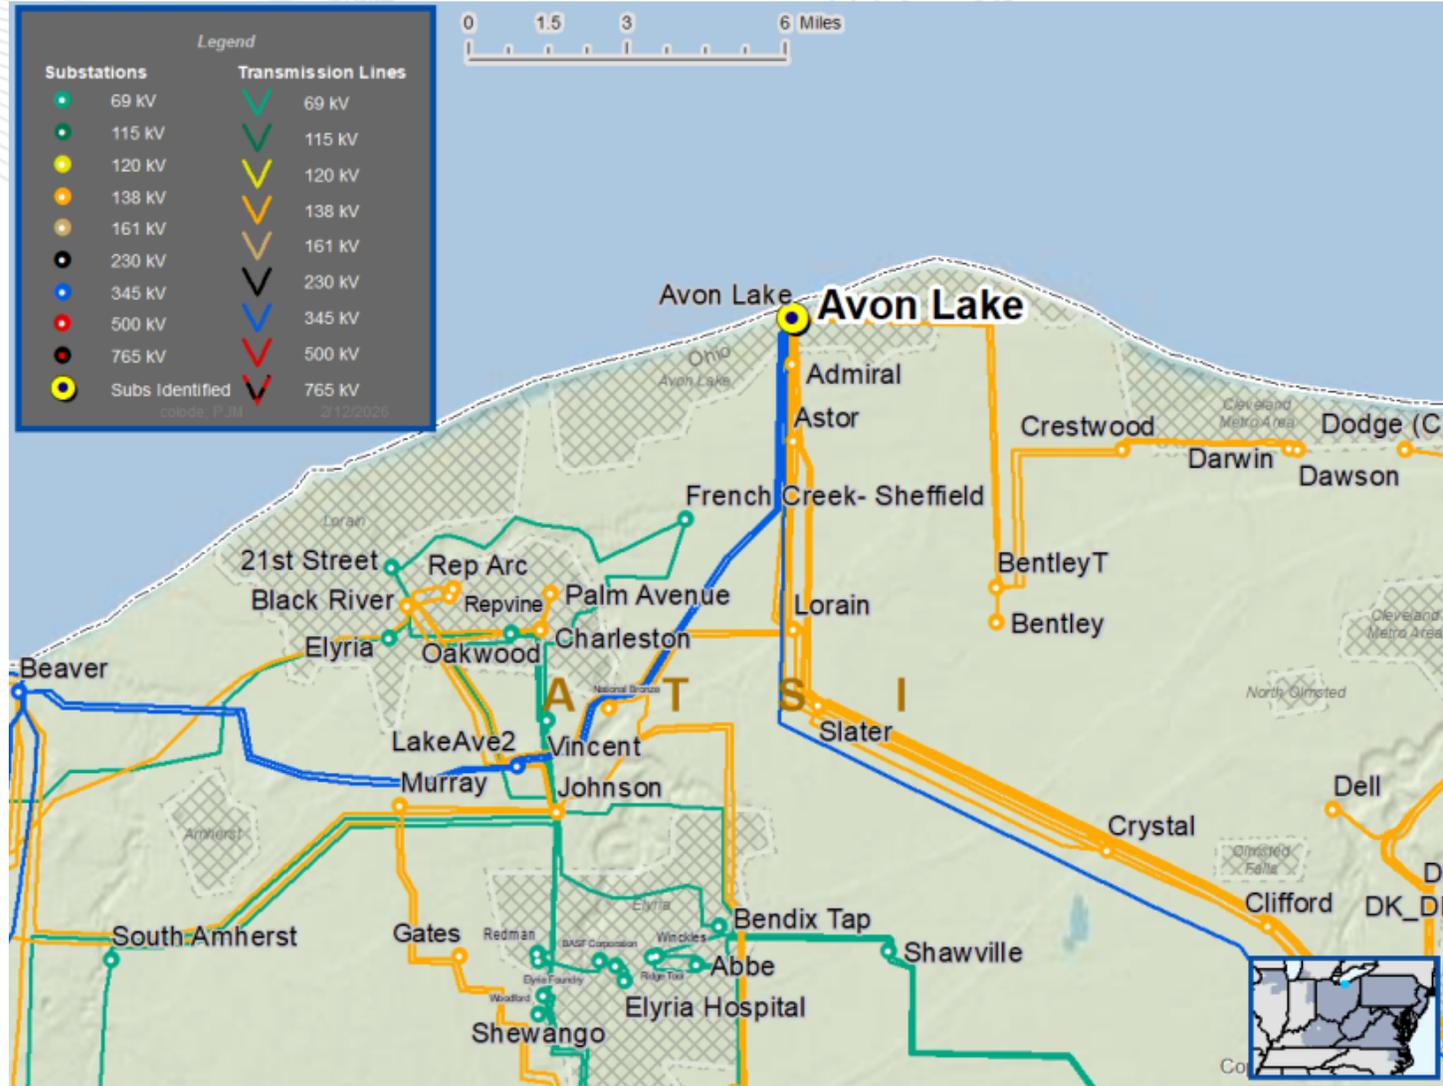

Replace the 2 overdutied Avon 138 kV circuit breakers "4-B-107 and 4-B-84" with 63 kVA circuit breakers.

Reason for Cancellation:

Breakers are Distribution assets, not Transmission.

Breakers are not controlled by PJM

Cost Estimate: \$1.92M

ATSI Transmission Zone: Baseline Johnson 69 kV Breaker "451-B-163" Replacement

Cancellation of b3985.4

Previously Presented: 11/14/2025

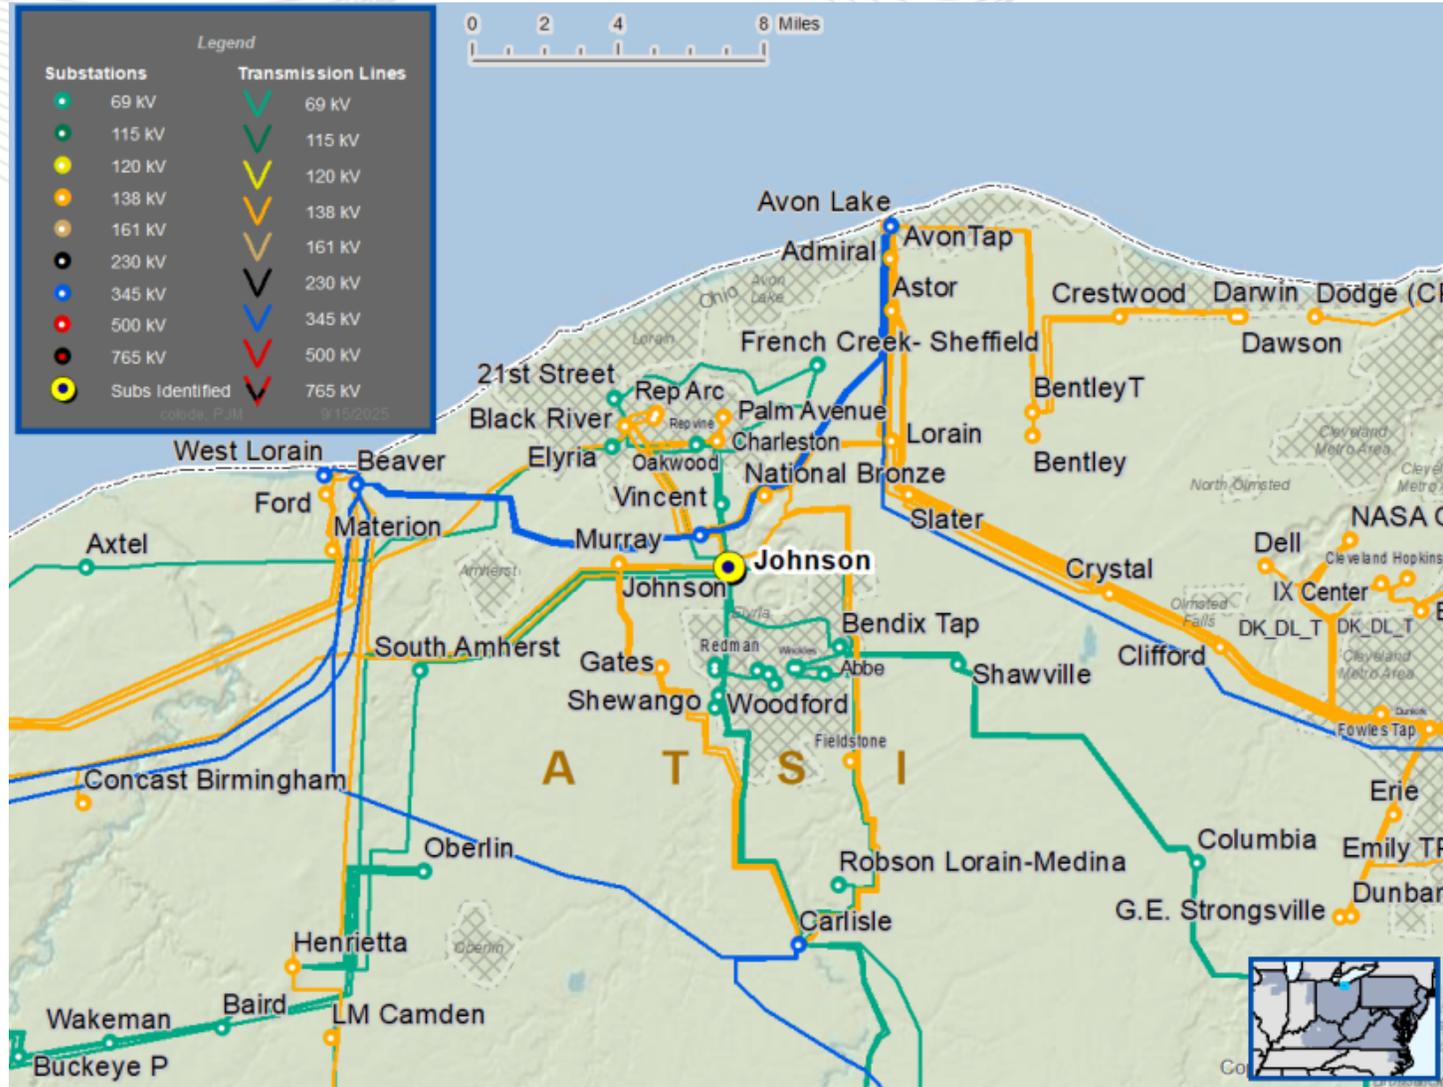

Original Proposed Scope:

Replace the overdutied Johnson 69 kV circuit breakers "451-B-163" with a 63 kA circuit breaker.

Reason for Cancellation:

The breaker was recently replaced this fall due to a failure. It was replaced with a 40 kA breaker. It is no longer overdutied.

Cost Estimate: \$0.957M

Facilitator:
