

Request for Stakeholder Feedback on Corporate Commitments *Order 1920 – Category Factor 7*

October 28, 2024

- PJM is seeking *written* feedback from stakeholders in developing a methodology for identifying and capturing policy-driven retirements (feedback due by **November 29, 2024**, stakeholder notification to follow today’s meeting).
- PJM is requesting that stakeholders share feedback on the “corporate commitments” portion of long-term scenario input Factor Category 7:

“Utility and **Corporate Commitments** and Federal, Federally-Recognized Tribal, State, and Local Policy Goals that Affect Long-Term Transmission Needs”
- Feedback received will be posted with meeting materials and include attribution unless otherwise requested when submitting your comments.

Written responses must be concise and limited to no more than 2 pages per question.

- **Questions:**

1. What types of information should fall under the definition of “corporate commitments”?
2. What information should PJM be requesting from stakeholders that would be considered corporate commitments?
3. How should PJM collect and verify this information? Should corporate commitments require certain levels of evidence to be considered within Category Factor 7?
4. What confidentiality concerns should PJM take into consideration when soliciting for corporate commitments? If confidentiality concerns exist, how should PJM balance protecting this information with maintaining transparency around its transmission planning assumptions?
