

Generation Deactivation Notification Update

Transmission Expansion Advisory Committee

January 7th, 2025

Generation Deactivation Announcements 2020-2024

Q4 2024 Deactivation Status

Unit(s)	MW	Transmission Zone	Requested Deactivation Date	PJM Reliability Status
Manchester (MRPC) NUG	4	JCPL	5/1/2025	Reliability analysis – 2025 Q1
McKee City 2 (Crates Road Solar)	2.4	AE	4/1/2025	Reliability analysis – 2025 Q1

* PJM does not approve deactivations, but rather identifies whether the requested deactivation date could lead to reliability concerns on the system. When PJM determines a proposed deactivation would adversely affect the reliability of the Transmission System due to upgrade completion timeline and absent operational measures, PJM desires and requests the Generation Owner extend operations of the deactivating unit(s). The Generation Owner may elect to support system reliability by operating until necessary network upgrades are completed by either filing its proposed Cost of Service Recovery Rate (CSRR) at FERC or accepting the Deactivation Avoidable Cost Credit (DACC) provided in the Tariff. PJM will announce at subsequent TEAC(s) after the Generation Owner submits a CSRR to the FERC and after the FERC accepts the CSRR filing or after the Generation Owner agrees to the DACC.
