

# Order 1920 Updated Stakeholder Engagement Timeline

Emmanuele Bobbio Principal Economist

TEAC special session – Order 1920 April 10, 2025

### Order 1920 Compliance Topics

#### Compliance Track

- Topics covered in March 13 special TEAC:
  - Scenario Framework and Factor Categories
  - Analysis and identification of LT Needs Core and Additional
  - Evaluation, Selection, and Voluntary Funding Opportunities
- Topics covered today:
  - Other Considerations on Mar. 13 special TEAC topics
  - Coordination between Interconnection and Order 1000 processes
  - Reevaluation
  - Benefits
- Remaining topics:
  - Alternative Transmission Technologies
  - Local transmission planning inputs
- Scenario Development Track
  - Stakeholder engagement plan
  - PJM proposed assumptions and methods for an informational Base Scenario

\* State Outreach Topics: 1) process and logistics 2) governance 3) evaluation process and seletion criteria 4) voluntary funding 5) counterfactual for cost allocation

\*\* TBD, interregional protocol filing will require coordination with neighbors

\*\*\* Use same special TEAC meetings for Order No. 1920 compliance and scenario development activities

♣ 6-month extension moves filing deadline to 12 December 2025; implementation deadline remains 12 June 2027 as required by Order No. 1920-A

#### **Exploratory Scenario Development Work**

- PJM will work with states and stakeholders on an informational Base LT Scenario in 2025 to mockup the scenario building process and strengthen the compliance process and filling
  - PJM, states and other stakeholders will discuss assumptions and methods through an iterative process (to be discussed later today)
  - PJM will develop an information Base LT Scenario using the copperplate approach, as standard industry practice
- Stakeholders asked PJM to consider a capacity expansion approach that accounts for transmission costs ("coexpansion")
- PJM is collaborating with NREL on a DOE-funded project to implement National Transmission Planning Study's (NTPS) methods into a county-level model of PJM
  - The NTPS represent industry best-practice on coexpansion
