

PJM AGC Regulation Up/Down Updates

Ryan Nice, PE
Sr. Manager, EMS Support

Tech Change Forum
September 14, 2026

Disclaimer: While materials are current at the time of publishing, applicable requirements may change. PJM Governing Documents control.

- The PJM regulation market is evolving from a single market to a separate up/down markets construct.
- All units and fleets intending to enter or continue in PJM's regulation market *must* prepare:
 - Exchange a new set of telemetry
 - Prepare a new set of plant controls
 - Re-test for regulation market
 - Prepare for new market bids

- Go-live is 0-hour of December 1st, 2026
 - All units and fleets should be ready to respond to new AREG up/down signals before hand, and have bids in correctly.
- In the weeks leading up to go-live, a rush of last-minute conversions will be done first-come-first-serve, but technical and SME constraints may push late-comers to after go-live.
- In the weeks following go-live, anyone inadvertently left out of the market may have to wait for PJM services to complete conversion.

- If you are struggling with your GMS vendor, please reach out to the PJM team for possible help to accelerate interoperability and to track which vendors are behind schedule.
