Tapestry

We're making the grid visible. Tapestry weaves together technology, partners and people to make the grid visible. We help the energy ecosystem unlock reliable, abundant and clean electricity for everyone, everywhere.

Transforming how the world makes, moves and uses electricity.

- **Make:** Streamlining interconnection so energy developers can make the power we need.
- **Move:** Empowering grid operators and utilities with predictive insights to move electricity where it's needed, when it's needed.
- **Use:** Ensuring consumers and businesses can use electricity efficiently and access it affordably.

Our lineage electrifies our vision. Tapestry incubated at X, Alphabet's Moonshot Factory—the birthplace of breakthrough technologies like Waymo and Google Brain. We're harnessing that moonshot DNA to build the first Google Maps for electrons, mapping every connection and pathway so our electricity system is as easy to navigate as our world.

Modernizing the grid with AI-driven intelligence. Tapestry is building the first knowledge graph for the grid: a unifying data model that weaves together trillions of data points. Built on petabytes of data and decades of modeling breakthroughs, this intelligence engine powers Tapestry's platform.

Tapestry's platform uses AI to help with the grid's toughest jobs.

- **Manage: GridAware –** Manage entire grids with AI-powered mapping, inspection, and modeling tools
- **Operate: Grid Operations Tool –** Operate at peak efficiency, matching supply with demand moment to moment
- **Plan: Grid Planning Tool – Plan for the future of transmission and distribution grids with unprecedented speed, granularity, and interoperability**

A tapestry of groundbreaking technology and partners. Our platform is designed to connect the whole energy ecosystem, helping developers, operators, utilities and businesses build a more resilient energy future.

Powered by industry trailblazers. We're bringing together AI experts and power system experts to create a multidisciplinary dream team with decades of experience.
