

# Load Management Testing Reminders

(November Testing)

Jack O'Neill, Principal Engineer

DISRS

December 1, 2025

- The most recent tests occurred on:
  - November 14 PPL and RECO zones
- Next steps:
  - Retest process (if desired)
  - Test Emergency Energy Settlements
  - Compliance

- Retest (if desired) – can only determine performance once all registrations in zone are tested (annual + summer only):
  - If test reductions  $> 75\%$  of commitment, CSP can self schedule retest(s) in DR Hub (must be in same season)
  - If test reductions  $\leq 75\%$  of commitment, CSP has 46 days from the test date to request that PJM schedule a single retest
    - PPL and RECO zones – by December 30, 2025

- Submit test **energy settlements** within 60 days of test event
  - PPL and RECO zones – by January 13, 2026
- CBLs
  - Generally, for PPL and RECO test CSP will need to upload 24 hours of daily load data for the following dates to calculate the *3 Day Types with SAA CBL*:
    - November 7, 10, 11, 12, 13, 2025

- CSP Retest (initial test > 75%)
  - Start/end instructions sent from DR Hub in response to normal CSP polling according to registrations' lead time
  - Email sent at notification time
- PJM Retest (initial test <= 75%)
  - Day Before PJM Retest Date:
    - Load Management/PRD Retest Summary event(s) posted to DR Hub Events section by 10:00 EPT the day before retest date
      - CSP should monitor DR Hub webpage and/or use web service function to obtain retest date
      - Since retests are CSP specific they are not posted to the Test webpage
    - Email sent by 10:00 EPT the day before retest date
  - Event Day
    - Start/end instructions sent from DR Hub in response to normal CSP polling according to registrations' lead time
    - Email sent at notification time

- Compliance will be determined after the Delivery Year
- Only registrations that have not been part of a Load Management Event during the DY will be subject to capability demonstration by test
