

Data Migration from Queue Point to NextGen

Josh Stephenson
Interconnection Projects

Chaitanya Hazari
Planning, Legal & SMS Applications

Queue Point will support:

- Expedited Projects
- Transition Cycle 1
- Parallel Process Requests
(Surplus Interconnection Study Agreements and Upgrade Application and Studies Agreements)

NextGen will support:

- Cycle 1 Application and Studies Agreements (ASA)
(Generation, Merchant, and Long-Term Firm Requests)
- **Transition Cycle 2**

*PJM will notify stakeholders as additional support is implemented in NextGen

- Primary contacts have received an email detailing:
 - The TC2 projects they are currently associated with
 - Required next steps to support the migration process
- **PJM cannot migrate TC2 project data until the Project Developer or Eligible Customer is added to a Company Profile in NextGen.**
- Once a company is added in NextGen, their associated TC2 projects will be transferred nightly from Queue Point to NextGen.
- Once the data is migrated, the projects must be managed in NextGen.
- All TC2 DPI requirements must be submitted to PJM via NextGen only. Queue Point submissions will not be accepted.
 - Any missing application information must be provided at DPI

Required Actions by all users ([NextGen user guide](#))

1. Ensure your company in Account Manager is up-to-date and not set to 'Other'
 - Email your Customer Account Manager (CAM) or accountmanager@pjm.com to move your account to the correct company
2. Request NextGen access via Account Manager
3. Setup your company profile if not done by another user from your company
4. Add all Project Developers or Eligible Customers from the TC2 applications to the Affiliated Applicants section of the Company Profile.

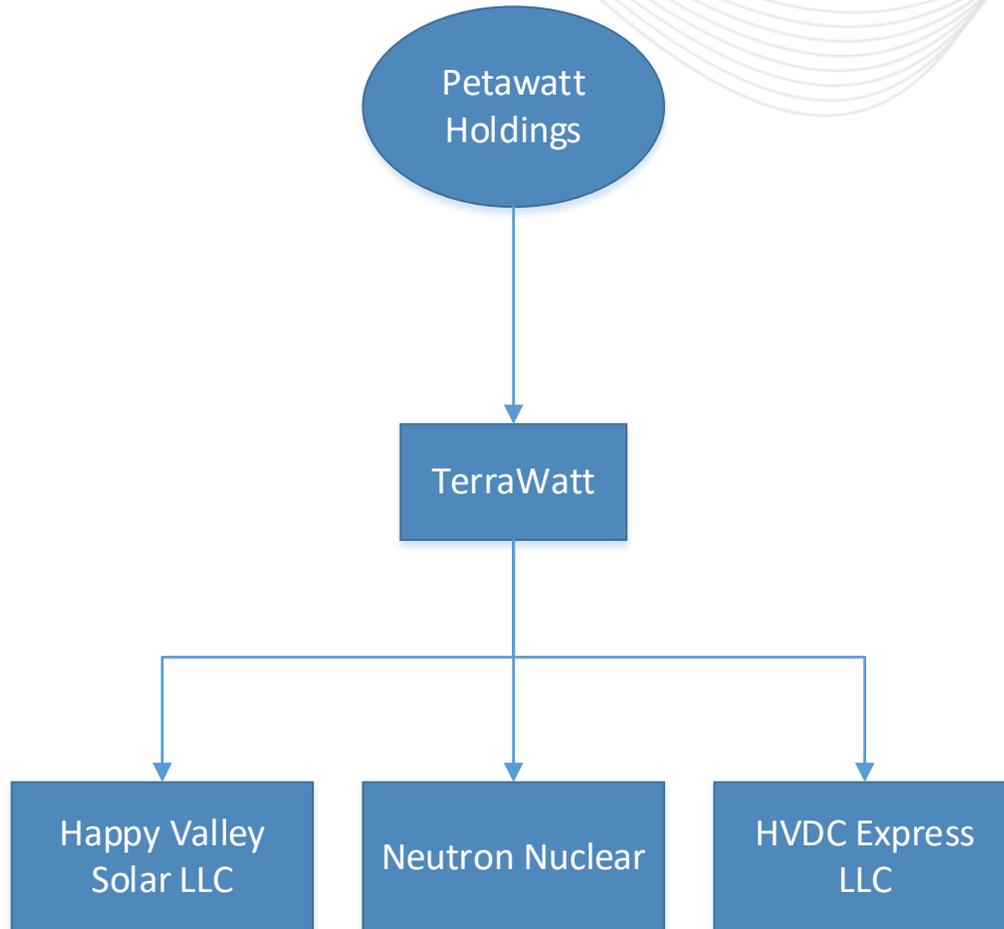

Reach out to your PJM PM or nextgen-support@pjm.com if the list of projects included in the email from PJM is incorrect.

The Project Developer or Eligible Customer name from Queue Point must be an identical match to what is entered in NextGen.

If the name does not match, the data will not be transferred.

General Information	General Information	
Point of Interconnection	Queue number	Project name *
Project Capability	AG2-484	Nuclear Center
Generator Information	Name of a signature authority from company *	Title *
Transformer Information	Jimmy Neutron	Chief Operating Officer
Collector System Equivalent	Project Developer (former Interconnection Customer) *	Federal Tax ID *
Attachment Line Data	Neutron Nuclear	12-3456789 <small>XX-XXXXXXX</small>
Supporting Documents	Phone (day) *	Phone (evening)
Deposits	215-123-4569	
Review	Email of a signature authority from company *	Fax
Confirmation	Josh@TerraWatt.com	

Example Organizational Chart

Parent or Holding Company

The Parent is the top most company in the organization (as shown in the evidence of ownership)

Company Information

User login and company access is managed in Account Manager. All users within a company see the same Company Profile and all associated projects.

Affiliated Applicants

All subsidiary Project Developers and Eligible Customers can be selected on the New Service Request Application

The user's company is determined through Account Manager – 'TerraWatt' in this example.

Company information and Affiliated Applicant information will be shared with all employees of 'TerraWatt' with NextGen access.

Appendix

- Information displayed in NextGen is based on the user's company and role in Account Manager.
- NextGen roles are only available for users logged in under a member or non-member company. Users registered under "Other" companies cannot request access.
- If your company doesn't have a PJM account, [submit a request](#) to create either a member or non-member account.

Account Manager

Account Manager is a tool used to create accounts and request and grant access to PJM's tools and website.

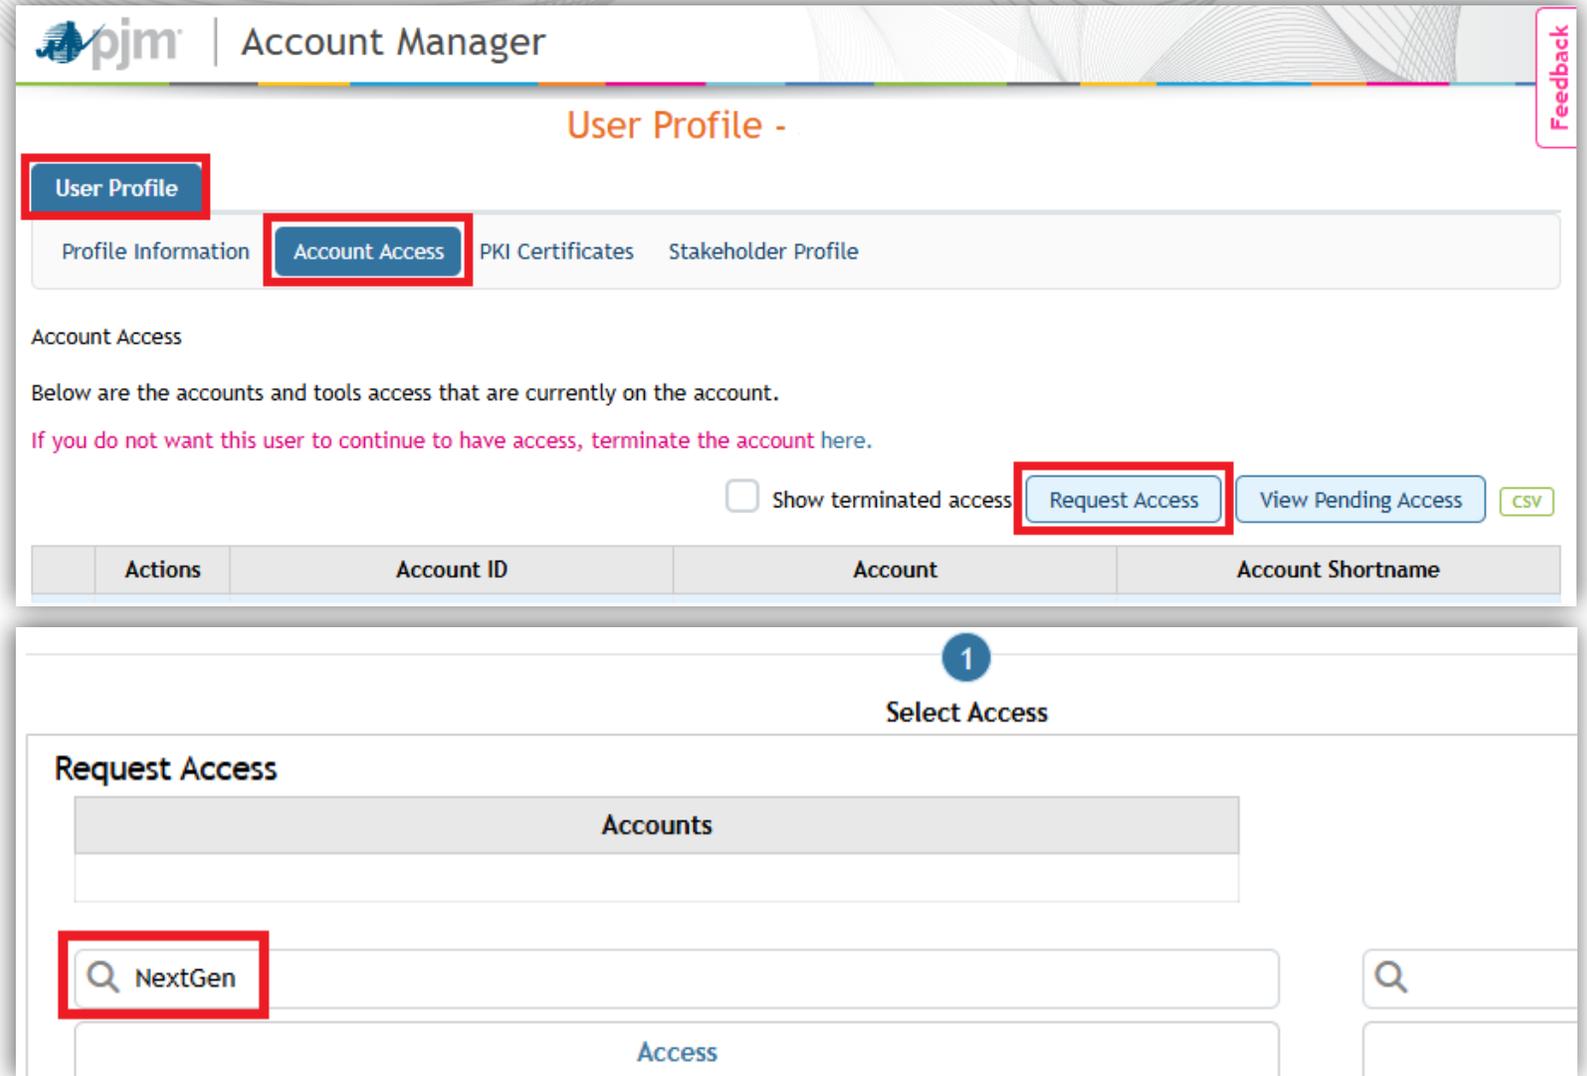

Production: [Sign In](#) | [Register](#)

Train Environment: [Sign In](#) | [Register](#)

If your company is not a member of PJM or your company is not listed when registering for an account, [request a company account be created.](#)

Steps to request access:

1. Select User Profile
2. Select Account Access
3. Select Request Access
4. Search NextGen
5. Select the appropriate role. Details on next slide.

The screenshot shows the 'Account Manager' interface. At the top, there is a navigation bar with the 'pjm' logo and the text 'Account Manager'. Below this, the page title is 'User Profile - ...'. A horizontal menu contains four tabs: 'User Profile', 'Account Access', 'PKI Certificates', and 'Stakeholder Profile'. The 'Account Access' tab is selected and highlighted with a red box. Below the tabs, the 'Account Access' section is displayed. It contains the text 'Account Access' and 'Below are the accounts and tools access that are currently on the account.' followed by a link: 'If you do not want this user to continue to have access, terminate the account here.' There is a checkbox labeled 'Show terminated access' and a 'Request Access' button, which is highlighted with a red box. Other buttons include 'View Pending Access' and 'CSV'. Below this is a table with columns: 'Actions', 'Account ID', 'Account', and 'Account Shortname'. A blue circle with the number '1' is positioned above the 'Request Access' button. Below the table, there is a 'Request Access' section with a search bar containing 'NextGen', which is also highlighted with a red box. The word 'Access' is visible below the search bar.

Several roles are available for NextGen users in Account Manager:

- NextGen Read Only – Users can view information within NextGen but cannot edit nor submit applications
- NextGen Read/Write – Users may view and edit information within NextGen and submit applications
- NextGen Agent – Users may view and edit project data within NextGen but cannot submit new applications

For any additional questions and guidance, please contact your company Account Manager (CAM) or custsvc@pjm.com
