

Engineering and Procurement Agreement

Grace Tangirala, Sr. Engineer I
Interconnection Planning Projects
Interconnection Process
Subcommittee July 2026

Disclaimer: While materials are current at the time of publishing, applicable requirements may change. PJM Governing Documents control.

Engineering and Procurement Agreement (E&P Agreement)

The E&P Agreement expedites the engineering and procurement of certain long-lead-time items necessary for the establishment of the interconnection.

****Refer to Tariff, Part IX, Subpart D for Pro forma Engineering and Procurement Agreement.**

An E&P Agreement can only be requested by a Project Developer, and only in Phase III.

- Project Developer needs to reach out to its assigned PJM Project Manager (PM) and request an E&P Agreement.
- Request should be made via email to its assigned PJM PM.
- Project Developer must identify with Transmission Owner (TO) the scope of work from the physical Interconnection Facilities Study to be included in the E&P Agreement.
- Cost breakdown will be determined using the Phase II facility studies by the TO for all the work to be included in the E&P Agreement.
- Requests for TC2 E&P Agreements will be processed in batches. The first batch will include all requests for E&P Agreements received on or before Aug. 14.

1

Project Developer requests the E&P Agreement and identifies the scope of work (with the TO) to be included in the agreement.

2

PJM drafts the E&P Agreement Negotiation Phase.

3

PJM tenders the E&P Agreement to Project Developer (in Docusign).

- Project Developer has 15 Business Days after receipt of E&P Agreement to execute and provide the required Security.
- Thereafter, Transmission Owner has 15 Business Days to execute the E&P Agreement.
- Lastly, PJM executes the E&P Agreement and submits for filing with the Commission or reports in the Electric Quarterly Reports.

4

Once the E&P Agreement is effective, PJM Construction Engineer schedules project kickoff call.

****See Tariff, Part VII, Subpart D, Section 314 and Part IX, Section 500 for applicable Negotiation and Execution provisions.**

The sole purpose of the E&P Agreement is to expedite the engineering and procurement of certain long-lead-time items.

An E&P Agreement **does not:**

- ✗ Grant any interconnection rights to the Project Developer.
- ✗ Give projects any kind of priority.
- ✗ Permit construction of any kind.

If an E&P Agreement is used, the **subsequently executed GIA will supersede the E&P Agreement** in place for that facility.
