

Upgrade Requests in NextGen

Alex Newkirk – Engineer,
Interconnection Projects

Interconnection Process
Subcommittee

September 28, 2026

Disclaimer: While materials are current at the time of publishing, applicable requirements may change. PJM Governing Documents control.

Upgrade Requests Will Go Live in NextGen on Thursday 10/1/26

- Timeline and Implementation
- In-Flight Upgrade Requests
- Feature Highlights

- Deployment will begin ~10:00AM EST on 10/1/2026.
- Pardot message will be sent to developers once it is live.
- Following successful deployment, all new Upgrade Requests must be submitted in NextGen.
 - Creating and Submitting new Upgrade Requests will be disabled in Queue Point immediately after deployment in NextGen.

- If an Upgrade Request has already been submitted in Queue Point, it will stay in Queue Point and be processed to completion there.
- Upgrade Requests that have been created in Queue Point (In-Progress) but not yet submitted before go-live in NextGen will need to be re-created and submitted in NextGen.
 - In-Progress Upgrade Requests will remain visible in Queue Point for reference.
- Queue Point will display a message with this information and direct users to NextGen for new submittals.

Cycle Processes

Application Studies Agreement (ASA)

- ☐ **Generator Interconnections Request**
Interconnection of a new generation facility or to increase the capacity of an existing generation facility interconnected with the Transmission System in the PJM region, or Interconnect a generating unit to distribution facilities located in the PJM Region that are used to make wholesale sales using the output of the generating unit
- ☐ **Merchant Transmission Facility Request**
Interconnection or addition of a new Merchant Transmission Facility to the Transmission System or increase the capacity of existing Merchant Transmission Facilities interconnected with the Transmission System
- ☐ **Long-Term Firm Transmission Service Request**
Transmission Service for a period extending beyond the 18-month Available Transmission Capacity horizon

Parallel Processes

Surplus Interconnection Service Study Agreement (SISSA)

- ☐ **Surplus Interconnection Request**
Surplus Interconnection Request to utilize the unused portion of an existing or planned Generating Facility's Interconnection Service established in an Interconnection Service Agreement (ISA) or Generation Interconnection Agreement (GIA) such that if the service is used, the total amount of Interconnection Service at the Point of Interconnection (POI) would remain the same.

Upgrade Application and Study Agreement (UASA)

- ☒ **Upgrade Request**
Upgrade Request submitted for evaluation by the Transmission Provider of the feasibility and estimated costs of (a) a Merchant Network Upgrade or (b) the Customer-Funded Upgrades that would be needed to provide Incremental Auction Revenue Rights specified.

Replacement Generation Interconnection Study Agreement (RGISA)

- ☐ **Replacement Generation Interconnection Service Request**
Replacement Generation Interconnection Service Request to replace a deactivating Generating Facility interconnected with the Transmission System in the PJM Region and claim its Capacity Interconnection Rights.

Expedited Interconnection Track Service Request

- ☐ **Expedited Interconnection Track Service Request**
Expedited Interconnection Track (EIT) is a parallel interconnection process for large generators that are backed by a Primary Siting Authority and are capable of reaching commercial operation within three years of submitting an application.

Application Submission Confirmation

Thank you for submitting your project data, documentation, and deposit information. PJM will review the application and will respond if we have any questions.

The application is not considered complete until the signed agreement and deposits are received and deemed acceptable by PJM. Complete applications will be reviewed with a deficiency review.

Track your submission's progress on the [Projects tab](#). Request Number: UR28-0122

Information about the interconnection process that may affect your project is regularly discussed at the [Interconnection Process Subcommittee \(IPS\)](#) .

Upgrade Customers can also find training videos on the interconnection process on the [PJM Training Resources](#) page under the "Planning" section.

If you have questions or concerns, please contact our Interconnection Projects Department at IPAdmin@pjm.com
