

Operating Reserve for Load Response Resource Deviations MSRS Report Format Updates

Nick DiSciullo, Sr. Analyst
Market Settlements Subcommittee

- The current MSRS report format uses a data label column and 24 Hour Ending (HE) columns to report data.
- For consistency with other reports and PJM maintenance, the format will be updated to utilize EPT and GMT HE columns and individual data columns.

- The Operating Reserve for Load Response Resource Deviations report uses 24 EPT HE columns to display data across the report.

Operating Reserve For Load Response Resource Deviations
