

Problem/Opportunity Statement

UPDATES FOR CONTROL CENTER AND DATA EXCHANGE REQUIREMENT CLARITY

PROBLEM / OPPORTUNITY STATEMENT

PJM has identified the opportunity to bring greater clarity and consistency to Manual 01: Control Center and Data Exchange Requirements, particularly in Section 3 and Section 5. The necessary revisions are resulting from different drivers, but the overall theme is keeping the guidance and requirements contained in M01 consistent with current best practices and operational conditions. The revisions seek to add clarity, remove redundancy, and address potential causes for uncertainty.
