STANDARD:  
**TOP-003-9**  
**IRO-010-7**

## Project 2025-03 Order No. 901 Operational Studies

### PROJECT BACKGROUND:

#### Purpose

This project will address FERC Order No. 901 directives related to the inclusion of IBR performance and behavior in operational assessments and real-time monitoring of individual IBR plants (i.e., individual IBR) as well as IBR plants in the aggregate across an operator's footprint (i.e., IBR in the aggregate). Further, the drafting team will address the similar FERC Order No. 901 directives to include aggregate DERs in operational assessments and real-time monitoring.

## [Project 2025-04](#) Order No. 901 Planning Studies

### PROJECT BACKGROUND:

#### **Purpose**

FERC Order No. 901 addresses a wide spectrum of reliability risks to the grid from the application of Inverter-Based Resources (IBRs), including both utility scale and behind-the-meter or distributed energy resources (DERs).

## [Project 2026-01](#) PRC-006 Standard Updates SAR

### PROJECT BACKGROUND:

#### **Purpose**

This project has been assigned two SARs that propose to address how DERs are incorporated into UFLS programs under PRC-006.

The purpose of this project is to review both SARs, propose edits to and next steps for each, based on industry comments, and to make corresponding modifications to PRC-006-5, as necessary, to address issues identified by the respective SARs

## Findings from Recommendation to Industry: Large Load Interconnection, Study, Commissioning, and Operations

NERC has posted a report summarizing the key findings from the Level 2 Recommendation to Industry: [Large Load Interconnection, Study, Commissioning, and Operations](#) which was issued on September 9, 2025 to Distribution Providers (DP), Transmission Owners (TO), Transmission Planners (TP), Planning Coordinators (PC), Reliability Coordinators (RC), Resource Planners (RP), Transmission Operators (TOP), and Balancing Authorities (BA). The alert included five primary recommendations regarding TO interconnection requirements, TP and PC interconnection and system-wide studies, TO load commissioning, TO operating protocols, and long-term forecasting for TPs, RPs, and PCs.

[Report](#) | [Alerts](#)

## NERC Submits Letter to FERC on Large Loads

NERC submitted a supplemental letter to the Federal Energy Regulatory Commission (FERC), providing updates on NERC's large loads actions and an updated plan. Under a new accelerated action plan, NERC intends to file revised registry criteria and Reliability Standards on or before December 31, 2026. NERC also plans to issue a Level 3 Alert in early May of 2026 to urge essential actions in the interim and ensure that risk mitigation begins right away

[Letter to FERC](#)

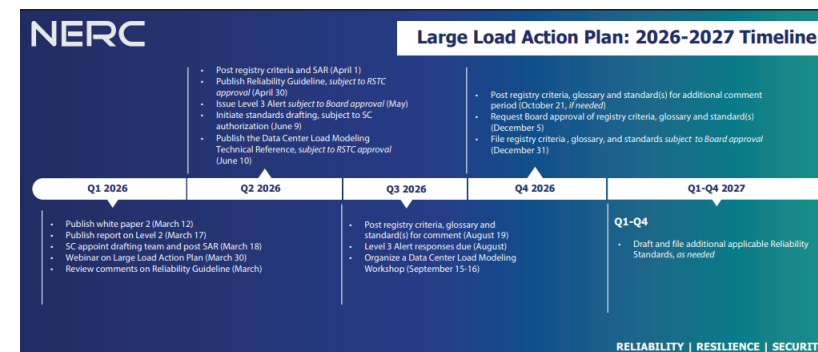

## Industry Webinar: March 30, 2026

- [Large Load Action Plan](#)

- **Developing registration criteria for “computational loads”** to define the scope of which entities, based on specific physical and electrical criteria, would be required to register with NERC and comply with NERC Reliability Standards.
- **Revising and adopting new Reliability Standards** to create specific definitions around computational loads and define measurable requirements for newly registered entities to operate reliably.
- **Advancing technical justification efforts**, such as an Essential Action Level 3 Alert and white papers from the Large Loads Working Group, to further understand and mitigate “computational load” risks.

## [Large Load action Plan Timeline](#)

### [2026 Quarterly Update \(Q1 April 2026\)](#)

## Revisions to the NERC Rules of Procedure

NERC is proposing revisions to its Rules of Procedure to develop a new registered entity type, called **Computational Load Entity**. The proposed revisions address recommendations from the NERC Large Loads Working Group (a subgroup of the NERC Reliability and Security Technical Committee) whitepaper “[Assessment of Gaps in Existing Practices, Requirements, and Reliability Standards for Emerging Large Loads](#)” and are further supported by the findings in the “[NERC Aggregated Report on NERC Level 2 Industry Recommendation: Large Load Interconnection, Study, Commissioning, and Operations](#)” analyzing responses to a [Level 2 Alert](#) on the interconnection of large loads. The recommendations and findings indicate a need for a new registered entity to comply with Reliability Standards (currently under development in [Project 2026-02 – Computational Loads](#)) to reduce risks to the reliability of the Bulk Power System.

**April 1, 2026 to May 15, 2026**

[Summary of Changes](#)

STANDARD:  
**TBD**

## Project 2026-02 Computational Loads SAR

### PROJECT BACKGROUND:

#### **Purpose**

This project will address the risks posed to the Bulk-Power System (BPS) due to the emergence of new large loads (e.g., data centers, crypto mining) that are connecting to the grid at an unprecedented scale and speed. The goal of this project will be twofold and require developing: (1) changes to the NERC Glossary to include large load entities, consistent with the proposed modifications for registration criteria in NERC’s Rules of Procedure; and (2) a Reliability Standard addressing reliability issues associated with integrating these large loads onto the BPS.

Final Documents Posted

## [Project 2023-01 EOP-004 IBR Event Reporting](#)

The drafting team is posting the final documents of **EOP-004-5 – Event Reporting**, but not conducting a final ballot, per the Standard Processes Manual (SPM) section 4.13, which allows the drafting team to conclude the standards action without conducting a final ballot.

The last ballot received 91.37% approval

## IBR Registration Initiative Q1 2026 Update Posted

NERC's [IBR Registration Initiative Q1 2026 Update](#) showcases progress made, highlights key activities in Legal, Registration, Compliance and Enforcement, Standards, Stakeholder Outreach, and E-ISAC Engagements, and provides available resources. This update was developed as part of NERC's ongoing efforts to ensure industry and stakeholders are kept informed throughout this critical, three-phase project.

[Q1 2026 Quarterly Update](#) - [IBR Registration Initiative page](#).

## MSPP Q2 2026 Update

Following the NERC Board of Trustees' acceptance of the [Modernization of Standards Processes and Procedures](#) (MSPP) Task Force's [recommendations](#) in February 2026, the initiative has transitioned into the implementation phase. Led by NERC, with advisory support from the task force, this phase is focused on implementing a modernized standards development process across the ERO Enterprise. As part of this transition, MSPP updates will move from a monthly to quarterly cadence.

The [MSPP Q2 2026 Update](#) provides the latest timeline for those actions, which include revisions to the NERC Rules of Procedure, the launch of pilot activities that are being pursued for select MSPP Task Force recommendations that fall within the scope of the current development governance structure, and a continued commitment to stakeholder engagement.

### [Q2 2026 Quarterly Update](#)

## **New Glossary of Terms Page - Coming Soon**

NERC Glossary of Terms, currently in PDF format, will be transferred to its own webpage on the [NERC website](#). The redesign will allow convenient access to view the terms and their statuses.

More details to come.
