

Intended Audience: Generation Owners

Actions Requested:

- Share this communication internally within your organization to anyone who may need this information.
- Submit MOD-032 generator data within Gen Model beginning May 1, 2026.

The 2026 Window for Gen Model is scheduled from **May 1, 2026 to June 15, 2026**.

No major updates were made to the [read-only spreadsheet](#). As a reminder, the read-only spreadsheet **is not a replacement for submitting MOD-032 data requirements** in the Gen Model tool. This is only used to assist our stakeholders by providing a read-only copy in advance of the upcoming Model Window. The links to the read-only spreadsheet and additional documentation for the 2026 Window can be found under the Gen Model section of the [Planning Center Tool Page](#).

Users may submit data for the 2026 Window via [Planning Center: Gen Model](#) tool.

Affected Generators

- Required by NERC Standard for all NERC-registered generators
- Required by PJM for non-NERC generators that participate in the capacity market or non-capacity generators with nameplate rating ≥ 20 MW
- Any PJM queue project that went into service prior to the MOD-032 Gen Model window, must submit data into Gen Model at the first window opening to meet the MOD-032 standard requirements.

Reminder:

- If you are making your first Gen Model submittal for a plant, the available EIA codes will automatically pop-up once you begin typing. If you cannot find your EIA Plant Code, please email MOD-032@pjm.com.

- GOs can start their 2026 submissions by certifying their 2025 submissions.
- GOs are asked to fill in all required data fields with real data, not just placeholders like 0, 999, etc. Submissions with bogus data will be marked as deficient and sent back to GOs for correction.

MOD-032-1

PJM has established updated [data requirements and reporting procedures](#), in accordance with MOD-032-1 R1, requiring Generator Owners (GO) to submit data via [Planning Center: Gen Model](#) between May 1, 2026, and June 15, 2026, in accordance with MOD-032-1 R2.

NERC Reliability Standard MOD-032-1 requires data submission at least every 13 calendar months. PJM administers the Gen Model data submission window in order for GOs to fulfill their data submission obligations. Any GO requiring more time to complete the annual Gen Model data submission will require a waiver from NERC, rather than PJM, because NERC has the authority of enforcing the requirements of its Reliability Standards, not PJM.

Any questions regarding MOD-032 should be sent to MOD-032@pjm.com.

Key Messages

- The 2026 Window for Gen Model is scheduled from **May 1, 2026, to June 15, 2026**.
