Intended Audience: PJM Generation Owners and/or Market Participants

In anticipation of winter 2026/27, PJM and PJM stakeholders are taking various steps to prepare for reliable operations. PJM recommends that resource owners take proper winterization steps to be ready to operate under adverse winter conditions.

As announced at recent PJM stakeholder meetings, PJM has issued this data request effective **November 1, 2026**, in accordance with PJM Manual 14-D Generator Operational Requirements, Section 7.5.2 Generation Resource Cold Weather Checklist.

This data request is mandatory, and is required for reliable operations planning purposes and enhanced PJM situational awareness.

PJM requires that Generation Owners complete this data request no later than **23:59 EPT on December 15, 2026**. Failure to comply may result in potential referral to FERC Office of Enforcement, and is potentially actionable as a violation of the Tariff, the applicable ISA, and/or Operating Agreement section 11.3.1. As noted above, this data request is mandatory for all Generation Owners, and the obligation to respond is not excused even if a third-party asset manager or other third-party contractor is responsible for eDART functions.

Please note that PJM will share all data request responses with its independent market monitor, Monitoring Analytics, LLC. In addition, data responses could be requested by regulators and PJM would share, with member notice only, in accordance with the PJM Operating Agreement, section 18.17.

This data request must be submitted through the eDART web forms or via eDART TXT file upload, and cannot be submitted via email. Please note that this data request has **not** been pre-populated with member responses from last year.

Questions pertaining to this data request can be sent via email to edartgosurvey@pjm.com or by phone at (610) 666-2282.

If this e-mail has reached you in error, please notify PJM and, if possible, forward this email with attachments to the entity/workgroup that handles eDART generator outage reporting, and/or staff that handles Cold Weather Operations within your organization.
