

Potential Stakeholder Consultation Process for Future DOE 202c Orders

Dave Anders
Sr. Director, Stakeholder Affairs

202CSTF
August 8, 2025

- Should this process not result in pro-forma cost allocation methodologies, establish a consultation process to help streamline cost allocation methodology development in response to future DOE 202c Orders
 - Ensure stakeholders have adequate input to the cost allocation methodology filed with FERC
 - Make sure PJM has the opportunity to factor in the input from stakeholders
 - Allow PJM to express rationale for proposed cost allocation methodology

PJM has suggested that a range of stakeholder processes be used depending on the scenario of any new DOE 202c Order that is issued:

- **Notification only** – used when an order fits cleanly under the circumstances with an already proscribed cost allocation methodology in the RAA. No need for a stakeholder process.
- **Abbreviated Consultation** – used when an order falls within the scenarios for which candidate cost allocation methodologies were drafted as part of this stakeholder process, but not filed within the RAA, to allow for additional stakeholder discussion before filing.
- **CIFP** – used when an order falls outside the scenarios for which cost allocation methodologies were drafted as part of this process.

The abbreviated stakeholder consultation process could consist of the following elements:

- Stakeholder notification of the 202c Order
- One (or more) workshop(s) to review appropriate methodologies and receive stakeholder feedback
 - A candidate cost allocation methodology(s) developed from the current 202CSTF discussions would be used as the starting point for these discussions.
- Indicative Members Committee vote
- Filing of PJM Board-selected cost allocation methodology
