PJM Co-Location Initial Brief on New Transmission Services (2/23/2026)

As part of PJM's initial briefing responding to the questions FERC posed in the 12/18/2025 Co-Location Order, PJM submitted illustrative tariff language outlining the terms and conditions of the newly proposed Contract Demand Services. See Attachment A of this filing: "Illustrative Language for New Tariff, Part XI; Attachments F-3A and F-4; and Other Illustrative Tariff Revisions."

- The illustrative tariff language for interim NITS service that was included in this attachment has since been replaced by the tariff language filed in Docket No. ER26-1479-002 on 8/17/2026.
- The illustrative tariff language filed for Contract Demand Services, including the pro forma Service Agreement for both Firm Contract Demand Transmission Service and Non-Firm Contract Demand Transmission Service, is the starting point for the tariff language to be filed by 11/16/2026. Note this language will be revised in accordance with the directives in the Co-Location Rehearing Order and the PJM Large Load Show Cause Order.
