

Request for Papers

As PJM [presented](#) at the July 29 Powering Reliability Through Market Design Workshop, PJM is calling for stakeholders to submit papers to PJM by August 31, as detailed below. PJM is canceling the August 11 and 27 workshops and plans to schedule additional session(s) in the late September or early October timeframe to discuss the papers.

Questions to Cover in the Papers:

PJM is asking for papers to inform the states, PJM and the PJM Board as we determine the scope of and process around developing market design rules. To aid in this effort, we ask that the papers cover the following questions:

1. The path(s) (either as described in the PJM paper or alternative paths) that your organization believes PJM should pursue and why
2. Additional or supplemental path(s) that you recommend States explore to support long-term market durability and/or customer cost stability
3. Any specific areas of the market design that your organization believes should be included in the scope of the upcoming stakeholder process, including why focusing on those areas will help stabilize PJM's wholesale markets and support more durable resource adequacy in the region
 - a. For instance, during the workshops, stakeholders brought forward specific design discussions, such as forward auction timing, seasonal capacity market design, ELCC enhancements, and incentives for and enhancements to Demand Response programs.
4. Areas that should remain out of scope in these stakeholder discussions and why it is appropriate to narrow the scope of work accordingly
5. The process that your organization would recommend be used to structure the stakeholder engagement
6. Any thoughts you have on issue prioritization and timing considerations for addressing these issues
7. Any education or analysis that you would request from PJM to support the upcoming stakeholder engagement

Logistics:

Due by: August 31, 2026

Submit to: Jennifer.tribulski@pjm.com and Matthew.connolly@pjm.com.

Page limit: We ask that you use professional judgment in length, knowing there could be many papers for all of us to review and digest.

Attribution: Papers will be posted in the format submitted and with company attribution.
