

Changes found in the September 2026 DR Hub XSD release are shown below.

Note: All users should (at a minimum) be at the May 2026 release level by September 15, 2026. Items included in this release will not be available to implementations using a prior release.

Prior to updating or replacing any XSD, backup existing versions of the current XSD and any in-house changes you've made prior to this release.

It is advisable to perform a file comparison between the XSD you are using today and the XSD you are migrating to.

Please verify all changes prior to implementation.

The September 2026 XSD changes are as follows:

Additions to Existing types are shown in **green**. Items removed are shown in **red**, and those modified are shown in **orange** where applicable.
