

2025 Ohio State Infrastructure Report (January 1, 2025 – December 31, 2025)

June 2026

Planning

- Generation Portfolio Analysis
- Transmission Analysis
- Load Forecast
- Large Load Adjustments

Markets

- Energy Market Analysis
- 2026/27 Base Residual Auction
- 2027/28 Base Residual Auction

Operations

- Generator Production
- Net Energy Import/Export Trend
- Emissions Data

In the Ohio service territory:

Existing Capacity:

- In Ohio, natural gas represents 55% of the total installed capacity while coal represents 24%.
- Across PJM, natural gas and coal are 48% and 20% of total installed capacity, respectively.

Interconnection Requests:

PJM will update this report with a more detailed breakdown of interconnection requests after the Cycle 1 applications have all been reviewed and posted to PJM.com.

Deactivations:

13 MW of generation deactivated in Ohio in 2025.

RTEP 2025:

Ohio's 2025 RTEP project total represents approximately \$3.9 billion in investment.

In the Ohio service territory:

Load Forecast:

Ohio's summer peak load is projected to increase by 0% to 8.2% percent annually over the next ten years, while the winter peak is projected to increase by 0% to 9.3% percent, depending on the transmission zone.

Capacity Market:

- The 2026/27 Base Residual Auction cleared at the \$329.17 price cap.
- The 2027/28 Base Residual Auction cleared at the \$333.44 price cap.

Market Performance:

Ohio's average hourly LMPs were generally consistent with the PJM average hourly LMP.

Emissions:

Ohio's average CO₂ emissions increased in 2025 compared to 2024 levels.

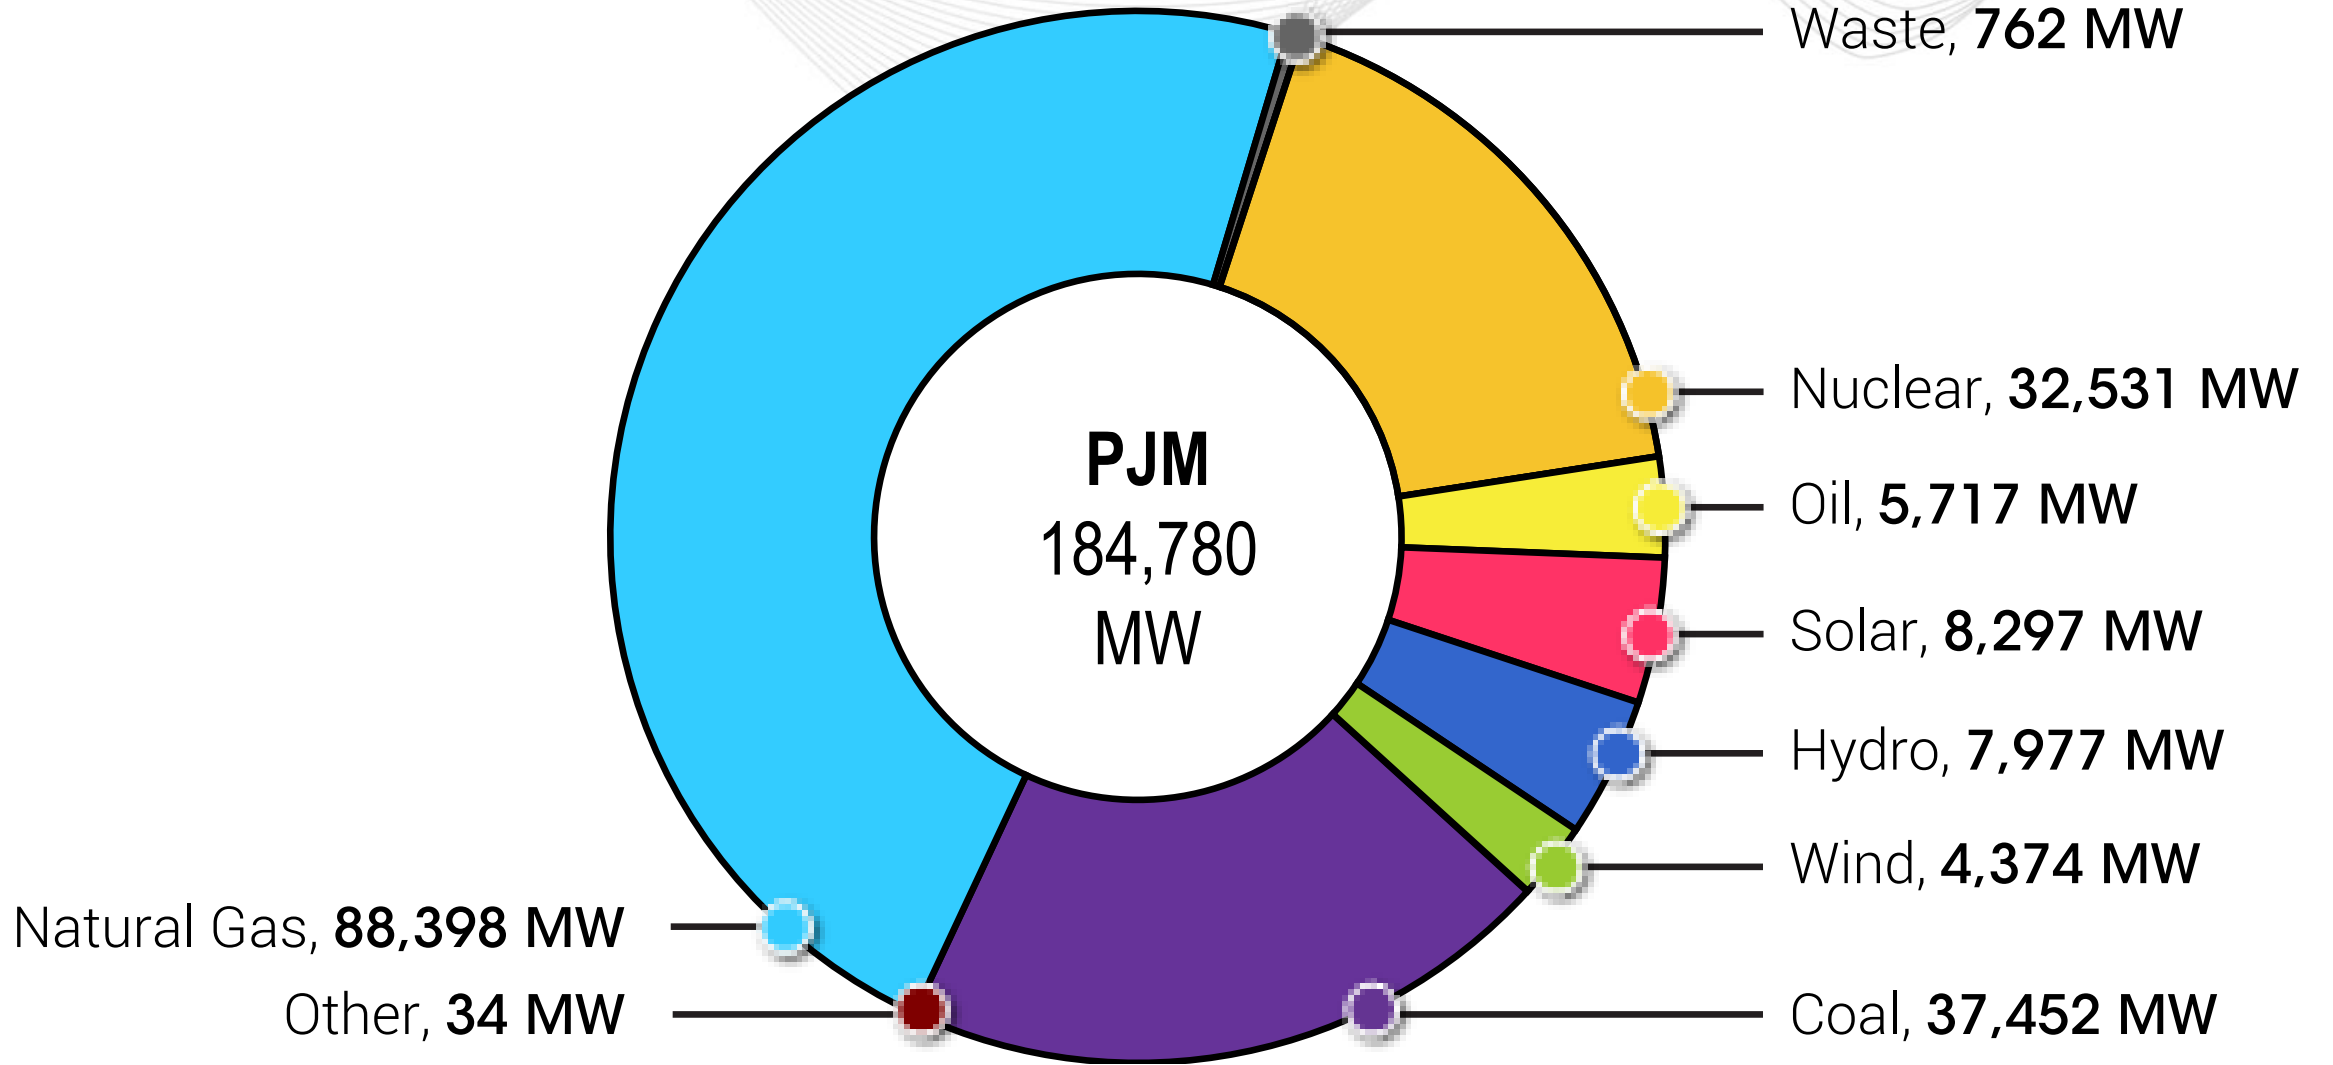

Planning

Generation Portfolio Analysis

PJM Existing Installed Capacity Mix

(CIRs – as of Dec. 31, 2025)

Ohio – Existing Installed Capacity (MW) by Fuel Type

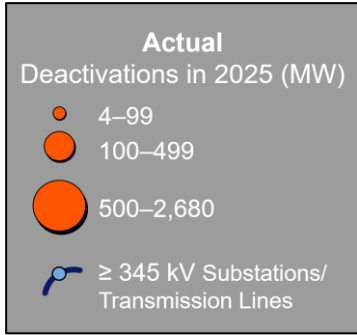

(CIRs - as of Dec. 31, 2025)

Queued Capacity (Nameplate) by Fuel Type

PJM will update this report with a more detailed breakdown of interconnection requests after the Cycle 1 applications have all been reviewed and posted to PJM.com.

Unit	TO Zone	Fuel Type	Request Received to Deactivate	Actual or Projected Deactivation Date	Age (Years)	Capacity (MW)
Sidney Unit 5	AES Ohio	Diesel	10/8/2025	10/8/2025	57	2
FirstEnergy Dovetail 1 CT	ATSI	Biomass	9/24/2025	9/24/2025	25	0
Warren Evergreen CT1	ATSI	Natural Gas	9/22/2025	10/1/2025	44	5
Willey Energy Storage	DEO&K	Battery	3/21/2025	9/2/2025	9	6

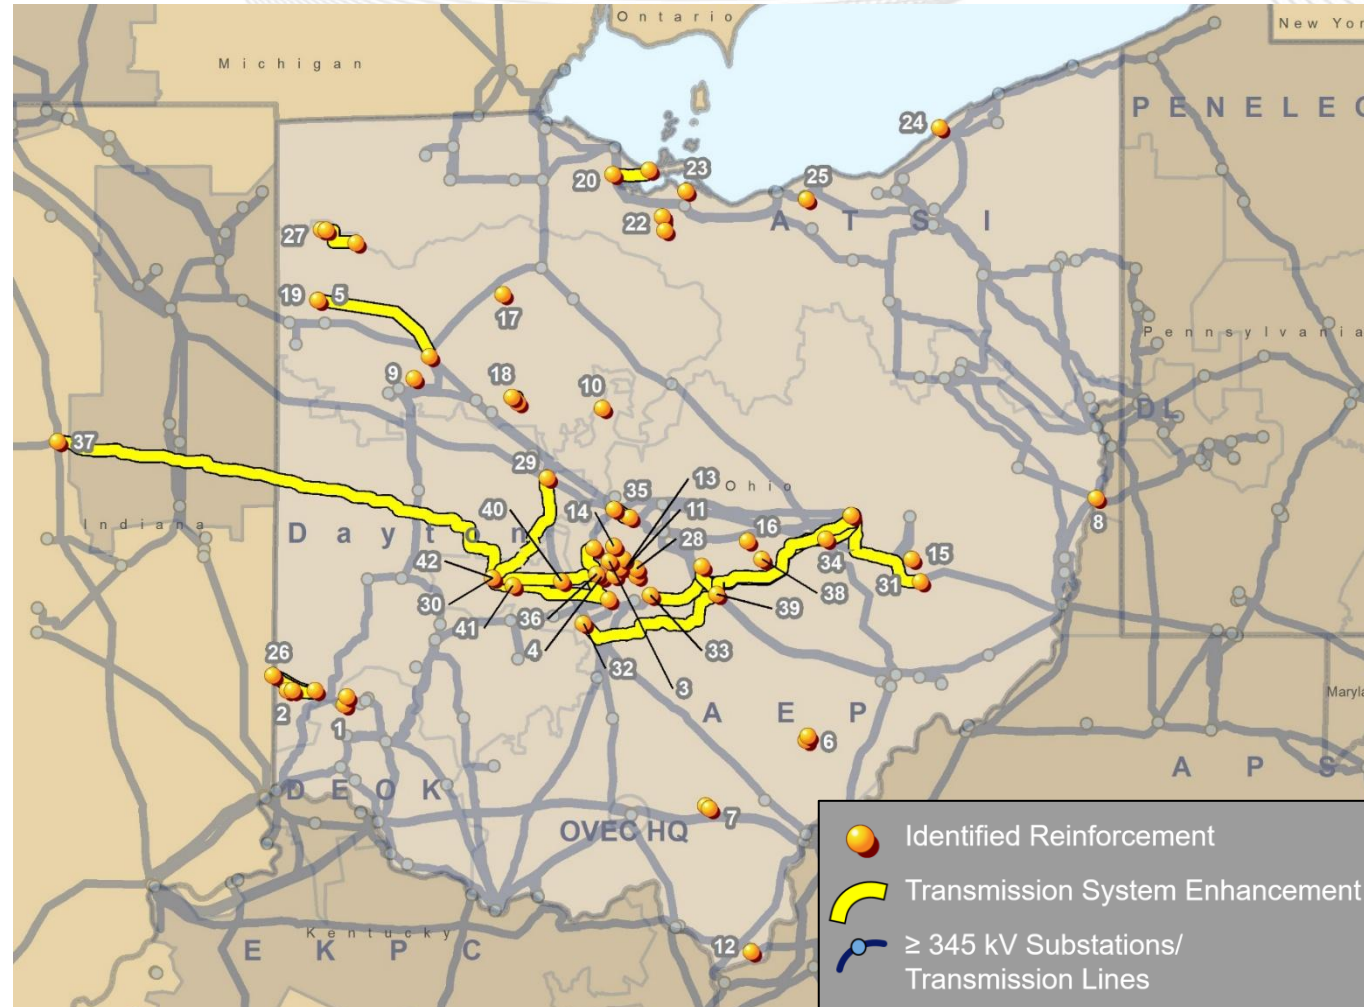

Planning

Transmission Infrastructure Analysis

For reporting purposes, the 2025 state infrastructure reports provide maps displaying all baseline, network, and supplemental projects for the respective state. The reports also include aggregated project costs for each type of project within each state. The costs listed in the state infrastructure reports and 2025 Annual RTEP Report are not indicative of each project's cost allocation.

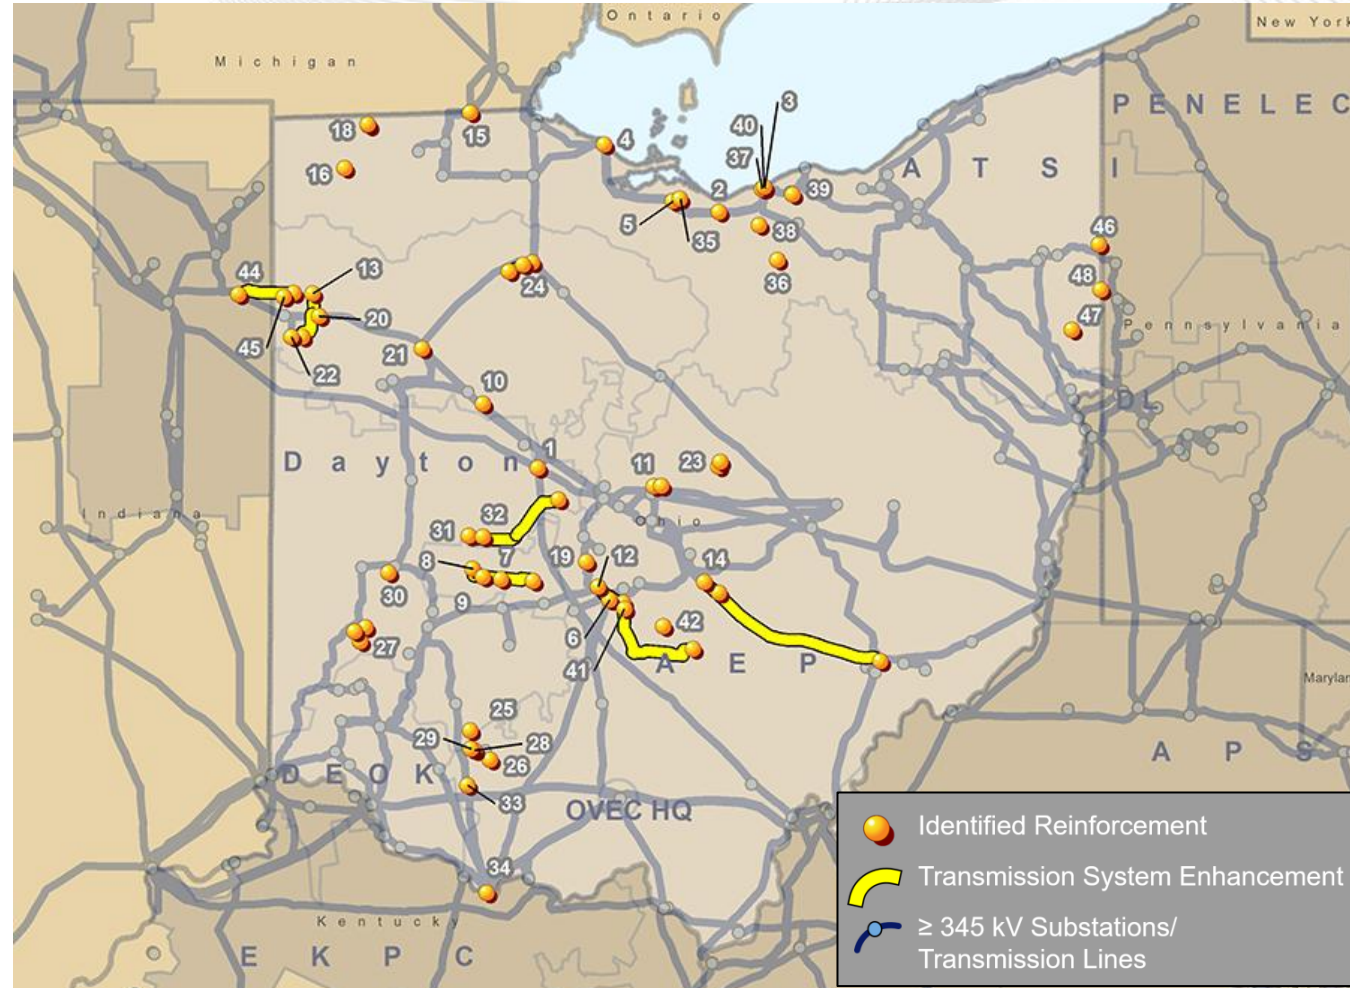

For a detailed list of each project shown on a state's project map, please see that state's section in the **2025 Annual RTEP Report** on PJM.com: <https://www.pjm.com/-/media/DotCom/library/reports-notices/2025-rtep/2025-rtep-report.pdf>

The complete list of all RTEP projects in PJM, including those from prior years, can be found at the **RTEP Upgrades & Status – Transmission Construction Status** page on PJM.com: <https://www.pjm.com/planning/m/project-construction>.

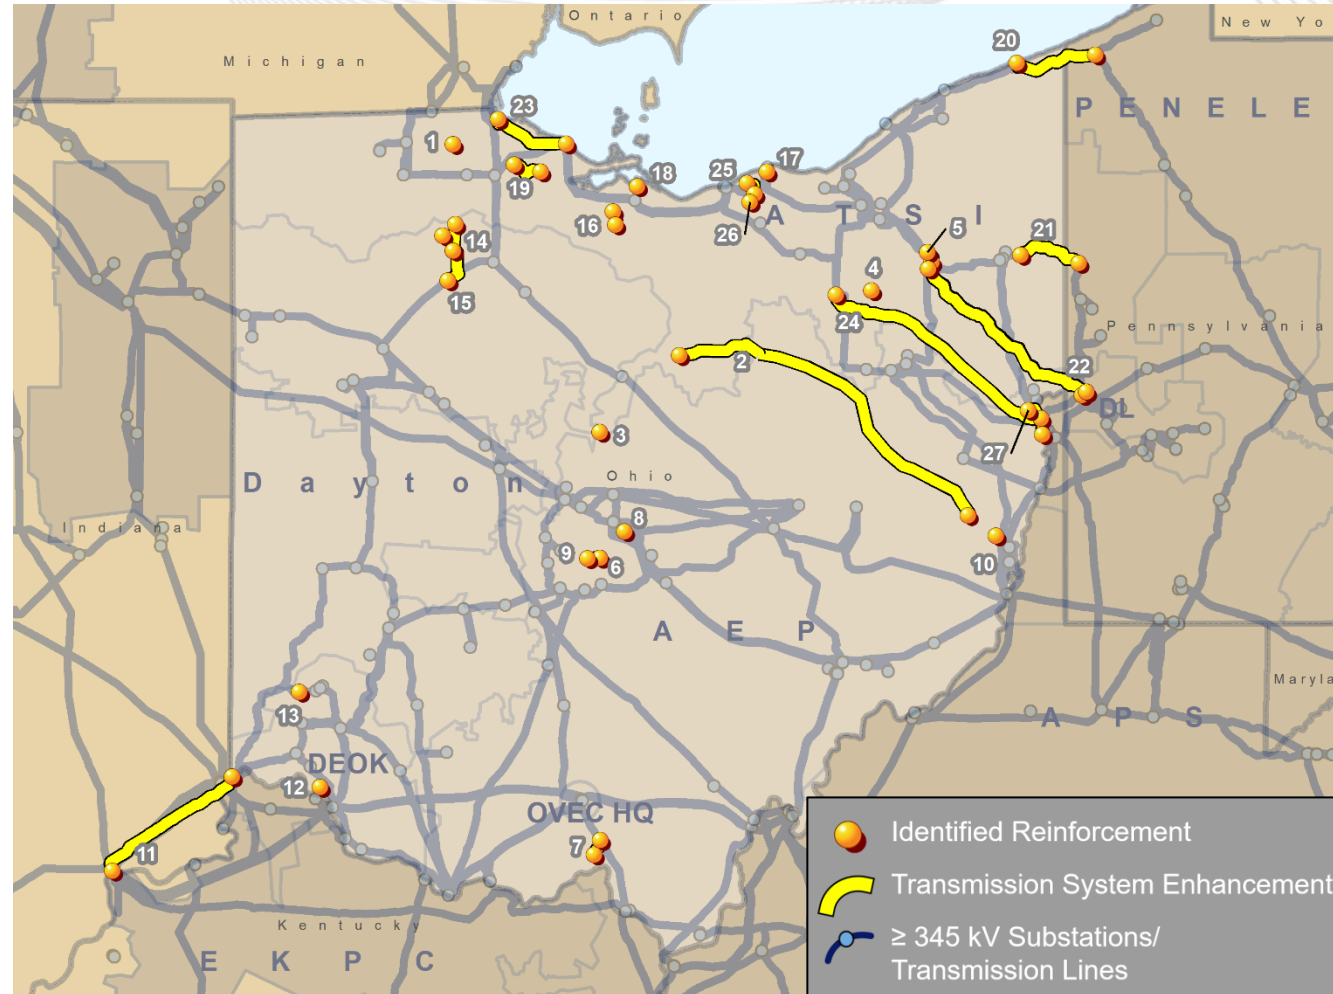

The 2025 RTEP has approximately \$2.71 billion in baseline projects located in Ohio.

Note: Baseline upgrades are those that resolve a system reliability criteria violation. Baseline projects listed in the annual RTEP report reflect project costs within a specific location and are not indicative of the project’s cost allocation.

The 2025 RTEP has \$148.4 million in network projects located in Ohio.

Note: Network projects are new or upgraded facilities required primarily to eliminate reliability criteria violations caused by proposed generation, merchant transmission or long-term firm transmission service requests, as well as certain direct connection facilities required to interconnect proposed generation projects. The costs of network projects are borne by the interconnection customer.

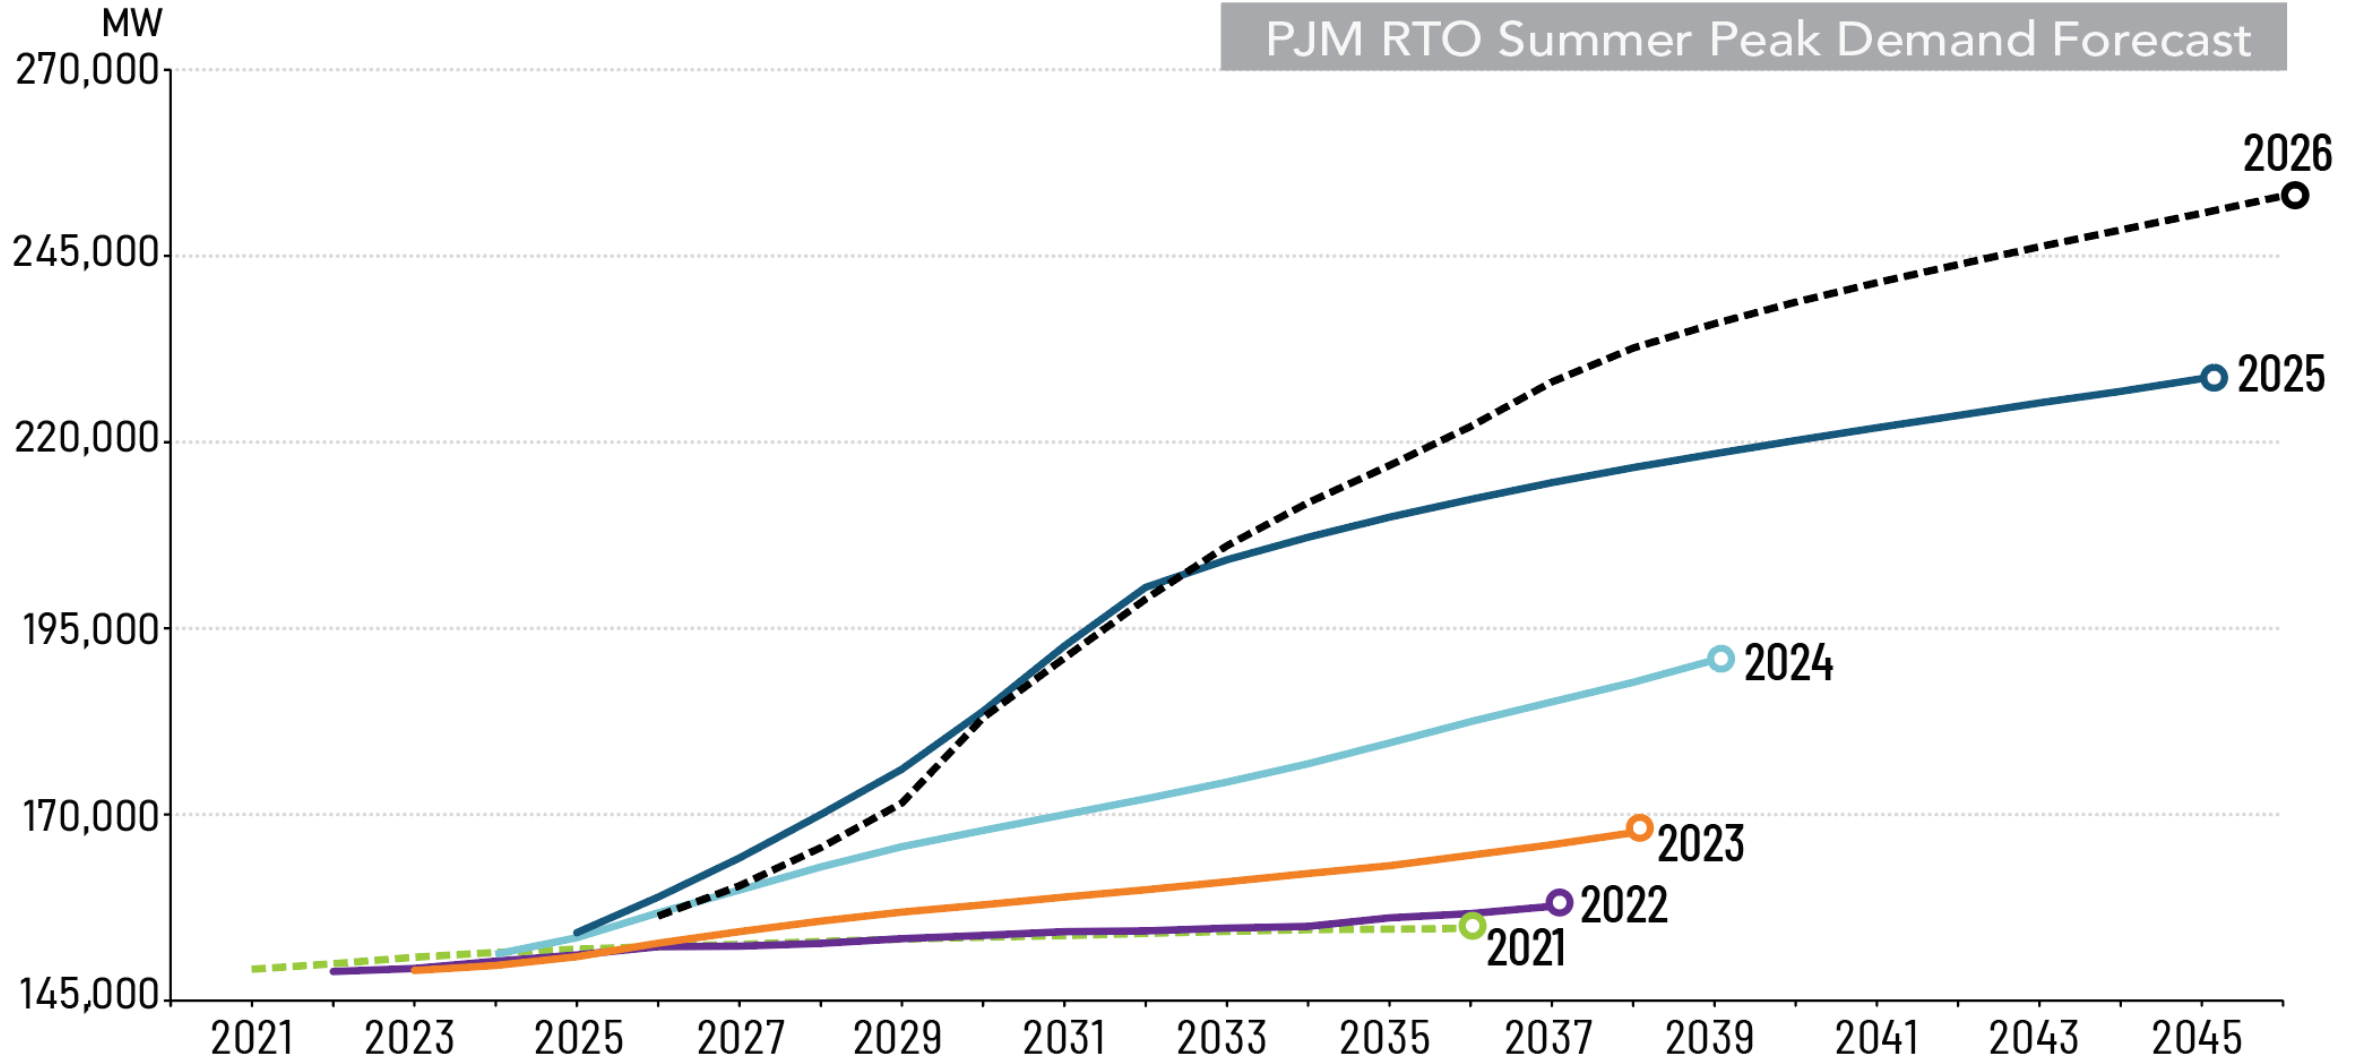

The 2025 RTEP has approximately \$1.04 billion in supplemental projects located in Ohio.

Note: Supplemental projects are transmission expansions or enhancements that are not required for compliance with PJM criteria and are not state public policy projects according to the PJM Operating Agreement. These projects are used as inputs to RTEP models, but are not required for reliability, economic efficiency or operational performance criteria, as determined by PJM.

Planning

Load Forecast

PJM RTO Summer Peak

2026	2036
156,373 MW	222,106 MW

Growth Rate 3.6%

PJM RTO Winter Peak

2025/2026	2035/2036
137,670 MW	204,650 MW

Growth Rate 4.0%

The summer and winter peak megawatt values reflect the estimated amount of forecast load to be served by each transmission owner in the noted state/district. Estimated amounts were calculated based on the average share of each transmission owner's real-time summer and winter peak load in those areas over the past five years.

Ohio – Summer Peak Large Load Adjustments

(PJM 2026 Load Forecast)

	Zone	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
OH	AEP	1,744	2,789	3,763	5,066	6,131	7,438	8,800	10,430	12,056	13,683

OH TOTAL (MW)		19,698	21,699	22,532	22,529	22,528	22,524	22,526	22,525	22,527	22,530
PJM TOTAL (MW)		72,608	77,029	79,982	81,527	82,656	83,609	84,416	85,128	85,818	86,511

Note: The listed total reflects both existing (2025) and forecasted large load adjustments. It does not include large loads that may exist but have not been submitted to PJM’s load forecasting process as a large load adjustment.

Markets

Market Analysis

Ohio's average hourly LMPs were generally consistent with the PJM average hourly LMP.

2027/28 Cleared MW (UCAP) by Resource Type

CAPACITY PERFORMANCE

Cleared MW (UCAP)

Resource Type	ANNUAL	SUMMER	WINTER
Generation	127,179.5	-	268.6
DR	7,030.0	268.6	-
PRD	106.5	-	-
Total (MW)	134,316.0	268.6	268.6

2026/27 Base Residual Auction Clearing Prices (\$/MW-Day)

2026/27 Cleared MW (UCAP) by Resource Type

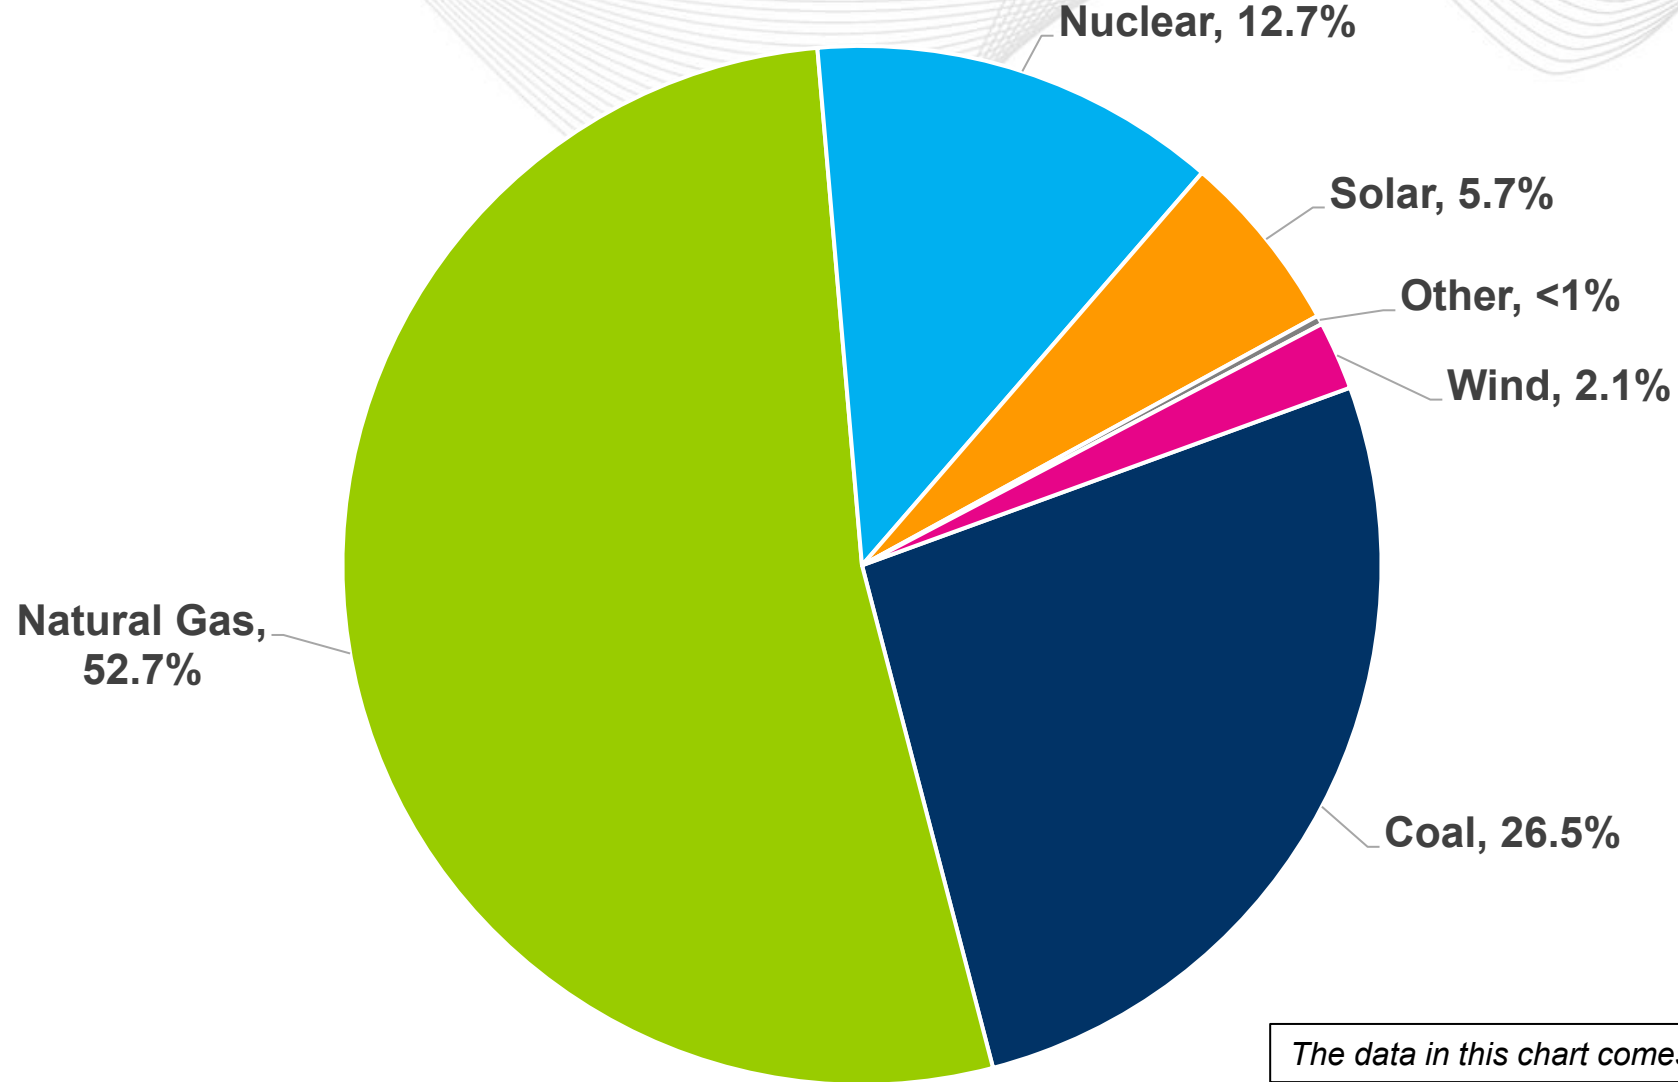

CAPACITY PERFORMANCE

Cleared MW (UCAP)

Resource Type	ANNUAL	SUMMER	WINTER
Generation	128,674.7	-	170.8
DR	5,359.8	170.8	-
PRD	105.5	-	-
Total (MW)	134,140.0	170.8	170.8

Operations

Ohio – 2025 Generator Production

The data in this chart comes from EIA Form 923 (2025).

Note: Positive values represent exports and negative values represent imports.

PJM System Average Emission Rates

Ohio – Average Emissions (lbs/MWh)

(Feb. 2026)

CO₂
(lbs/MWh)

SO₂ and NO_x
(lbs/MWh)
