

2025 Pennsylvania State Infrastructure Report (January 1, 2025 – December 31, 2025)

June 2026

Planning

- Generation Portfolio Analysis
- Transmission Analysis
- Load Forecast
- Large Load Adjustments

Markets

- Energy Market Analysis
- 2026/27 Base Residual Auction
- 2027/28 Base Residual Auction

Operations

- Generator Production
- Net Energy Import/Export Trend
- Emissions Data

In the Pennsylvania service territory:

Existing Capacity:

- In Pennsylvania, natural gas represents 54% of the total installed capacity while nuclear represents 20%.
- Across PJM, natural gas represents 48% total installed capacity and nuclear represents 18%.

Interconnection Requests:

PJM will update this report with a more detailed breakdown of interconnection requests after the Cycle 1 applications have all been reviewed and posted to PJM.com.

Deactivations:

Pennsylvania had no generators deactivate or give a notice of deactivation in 2025.

RTEP 2025:

Pennsylvania's 2025 RTEP project total represents approximately \$3.56 billion in investment.

In the Pennsylvania service territory:

Load Forecast:

Pennsylvania's summer peak load growth is projected to range between -0.1% and 6.4% annually over the next ten years, while the winter peak is projected to increase by 0% to 6.5% percent, depending on the transmission zone.

Capacity Market:

- The 2026/27 Base Residual Auction cleared at the \$329.17 price cap.
- The 2027/28 Base Residual Auction cleared at the \$333.44 price cap.

Market Performance:

Pennsylvania's average hourly LMPs were lower than the PJM average hourly LMP.

Emissions:

Pennsylvania's average CO₂ emissions slightly increased in 2025 compared to 2024 levels.

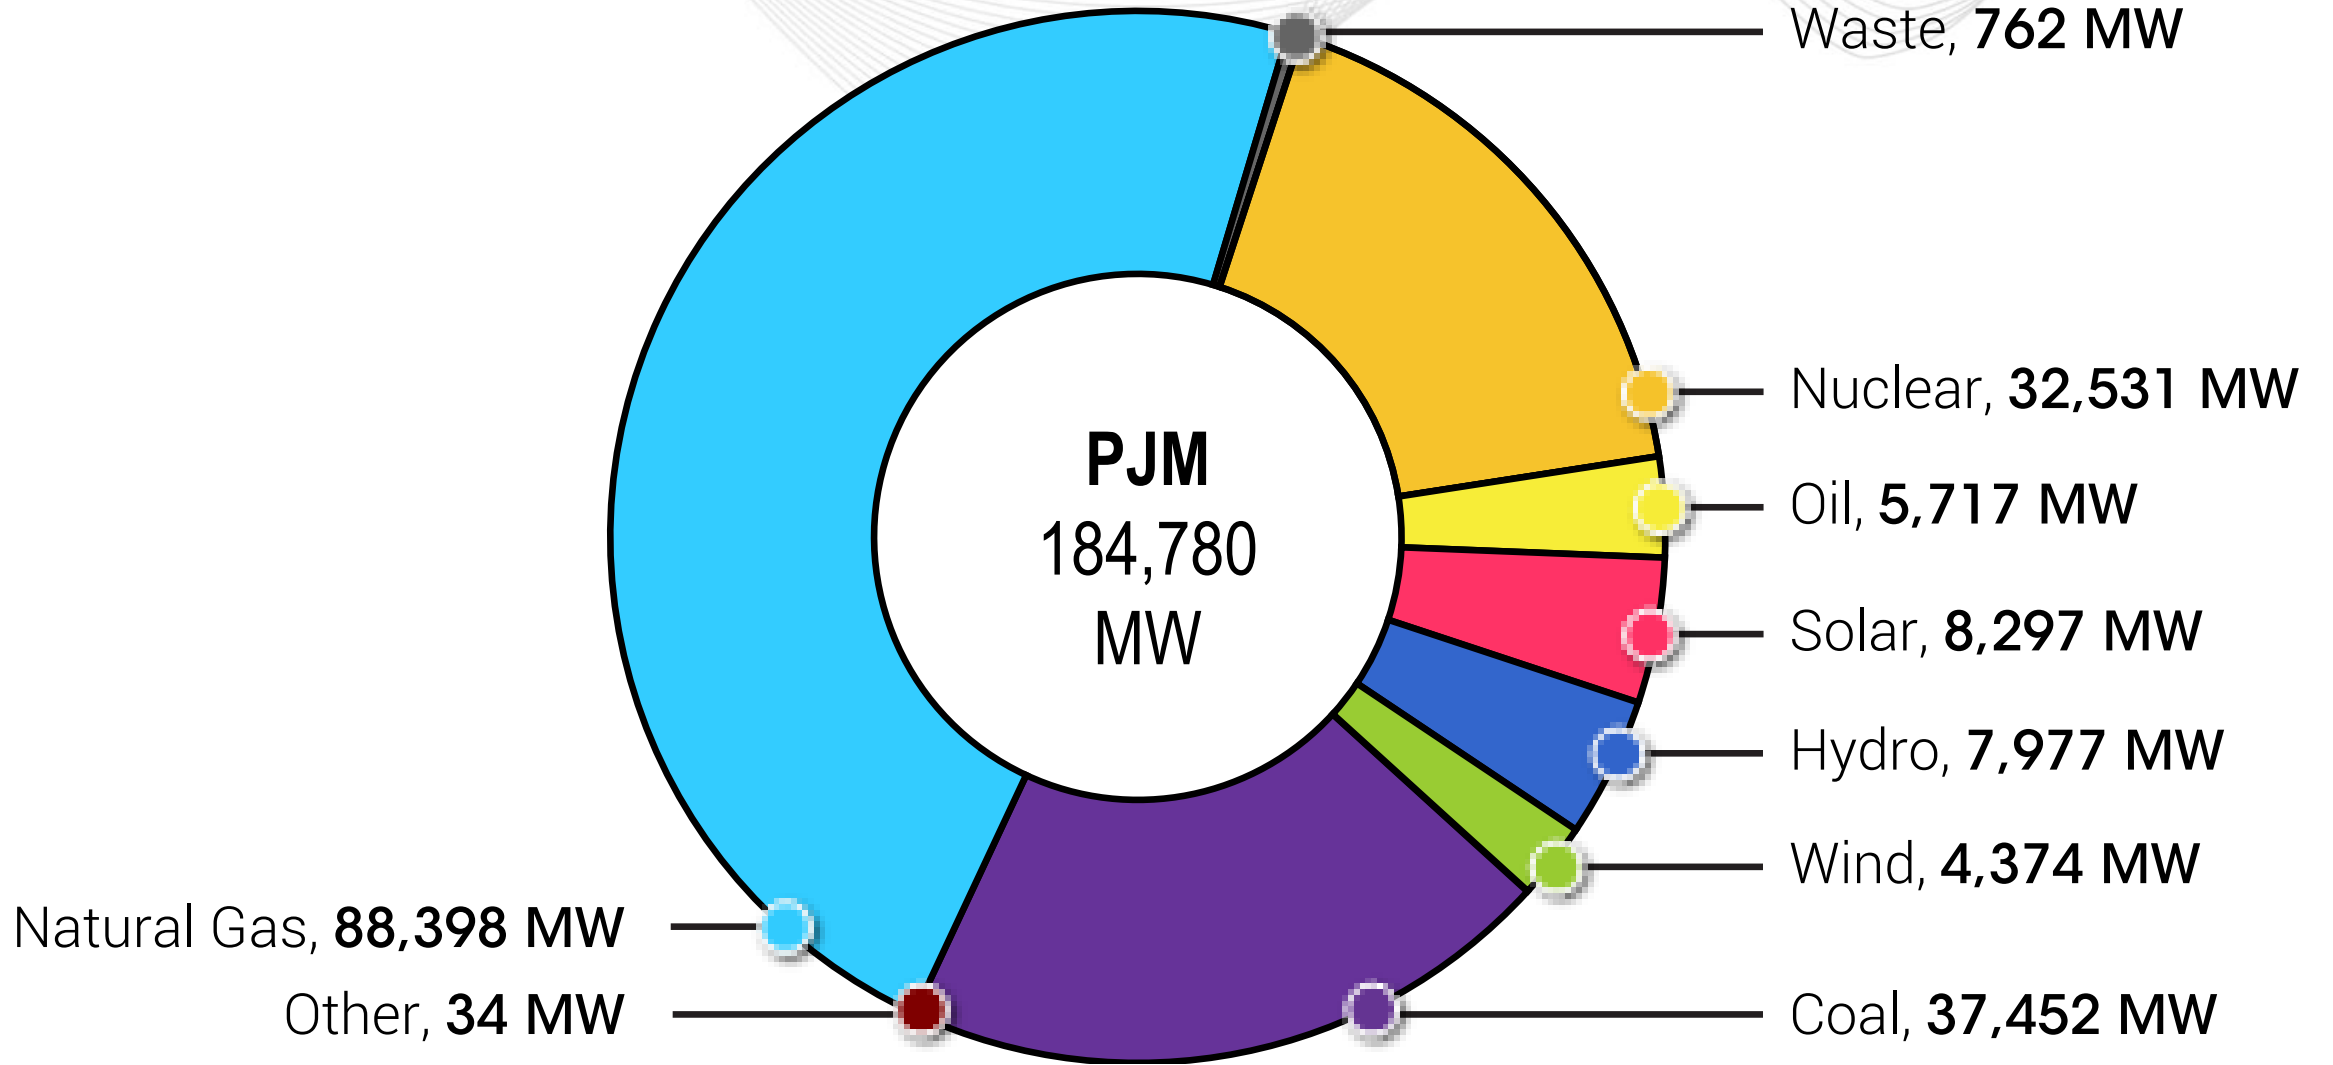

Planning

Generation Portfolio Analysis

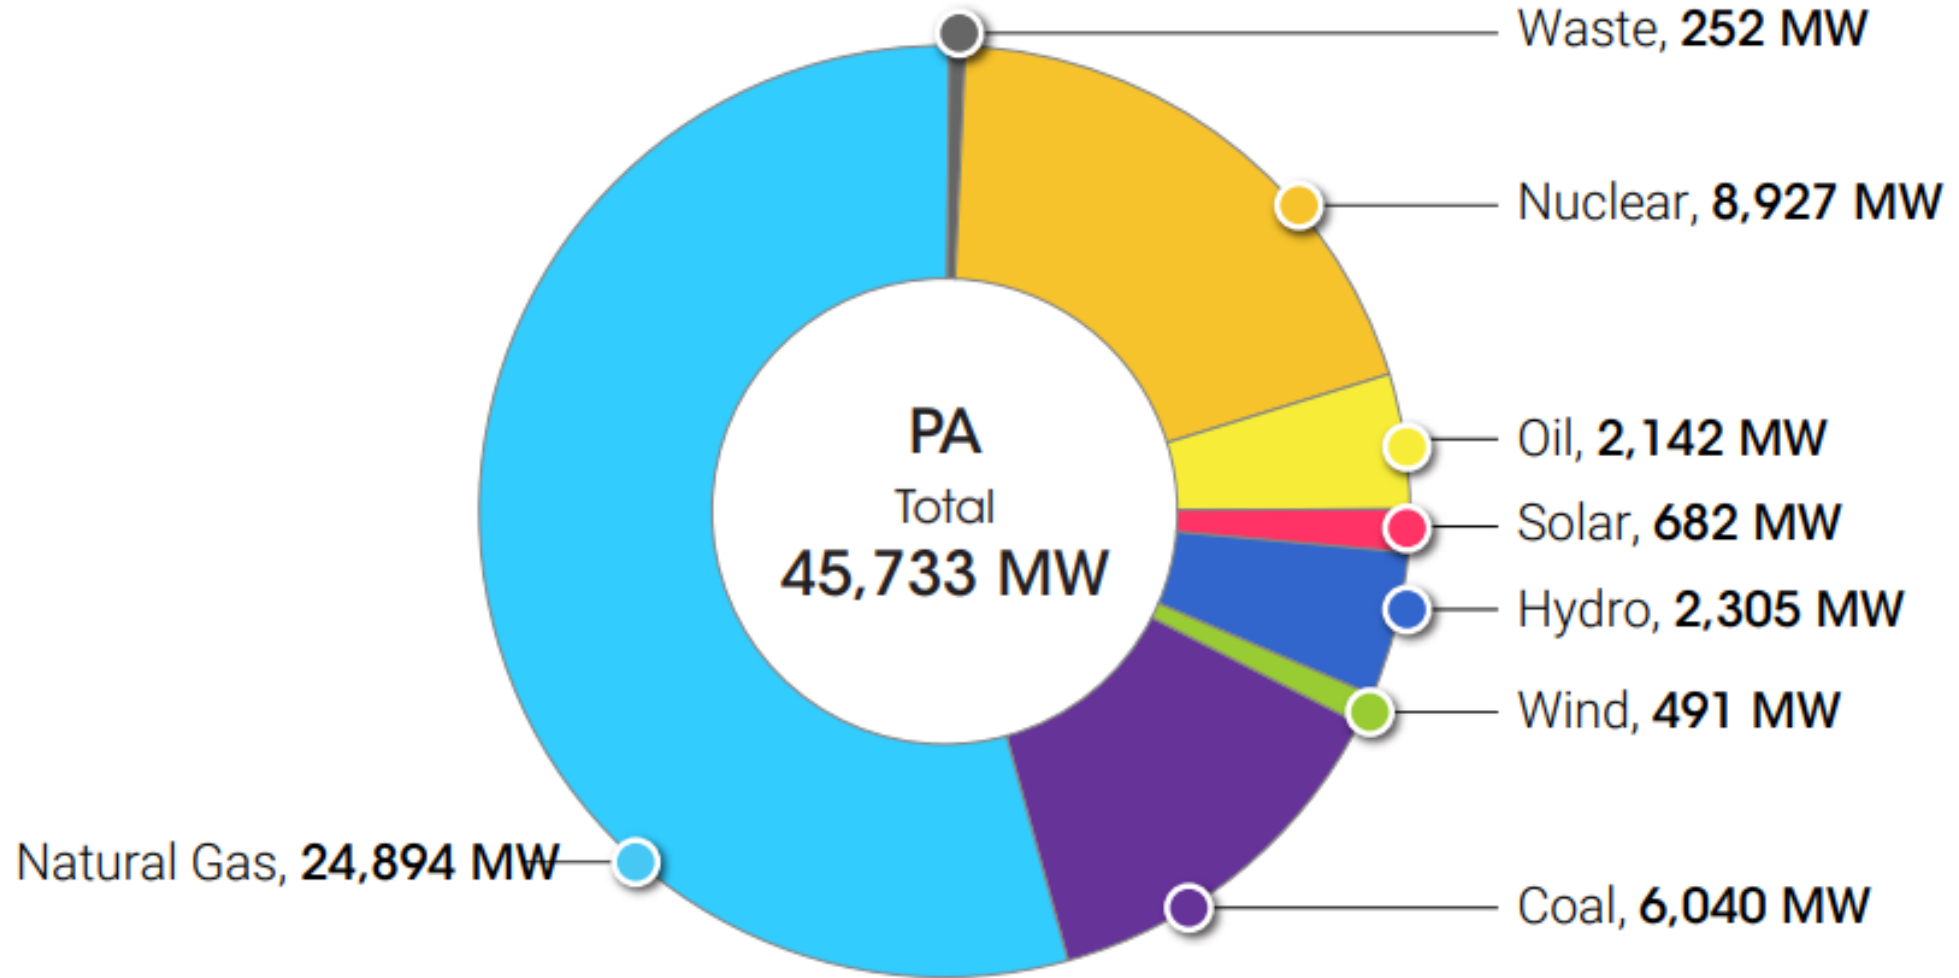

PJM Existing Installed Capacity Mix

(CIRs – as of Dec. 31, 2025)

Pennsylvania – Existing Installed Capacity (MW) by Fuel Type

(CIRs - as of Dec. 31, 2025)

PJM will update this report with a more detailed breakdown of interconnection requests after the Cycle 1 applications have all been reviewed and posted to PJM.com.

Pennsylvania – 2025 Generator Deactivations

Pennsylvania had no generators deactivate or give a notice of deactivation in 2025.

Planning

Transmission Infrastructure Analysis

For reporting purposes, the 2025 state infrastructure reports provide maps displaying all baseline, network, and supplemental projects for the respective state. The reports also include aggregated project costs for each type of project within each state. The costs listed in the state infrastructure reports and 2025 Annual RTEP Report are not indicative of each project's cost allocation.

For a detailed list of each project shown on a state's project map, please see that state's section in the **2025 Annual RTEP Report** on PJM.com: <https://www.pjm.com/-/media/DotCom/library/reports-notices/2025-rtep/2025-rtep-report.pdf>

The complete list of all RTEP projects in PJM, including those from prior years, can be found at the **RTEP Upgrades & Status – Transmission Construction Status** page on PJM.com: <https://www.pjm.com/planning/m/project-construction>.

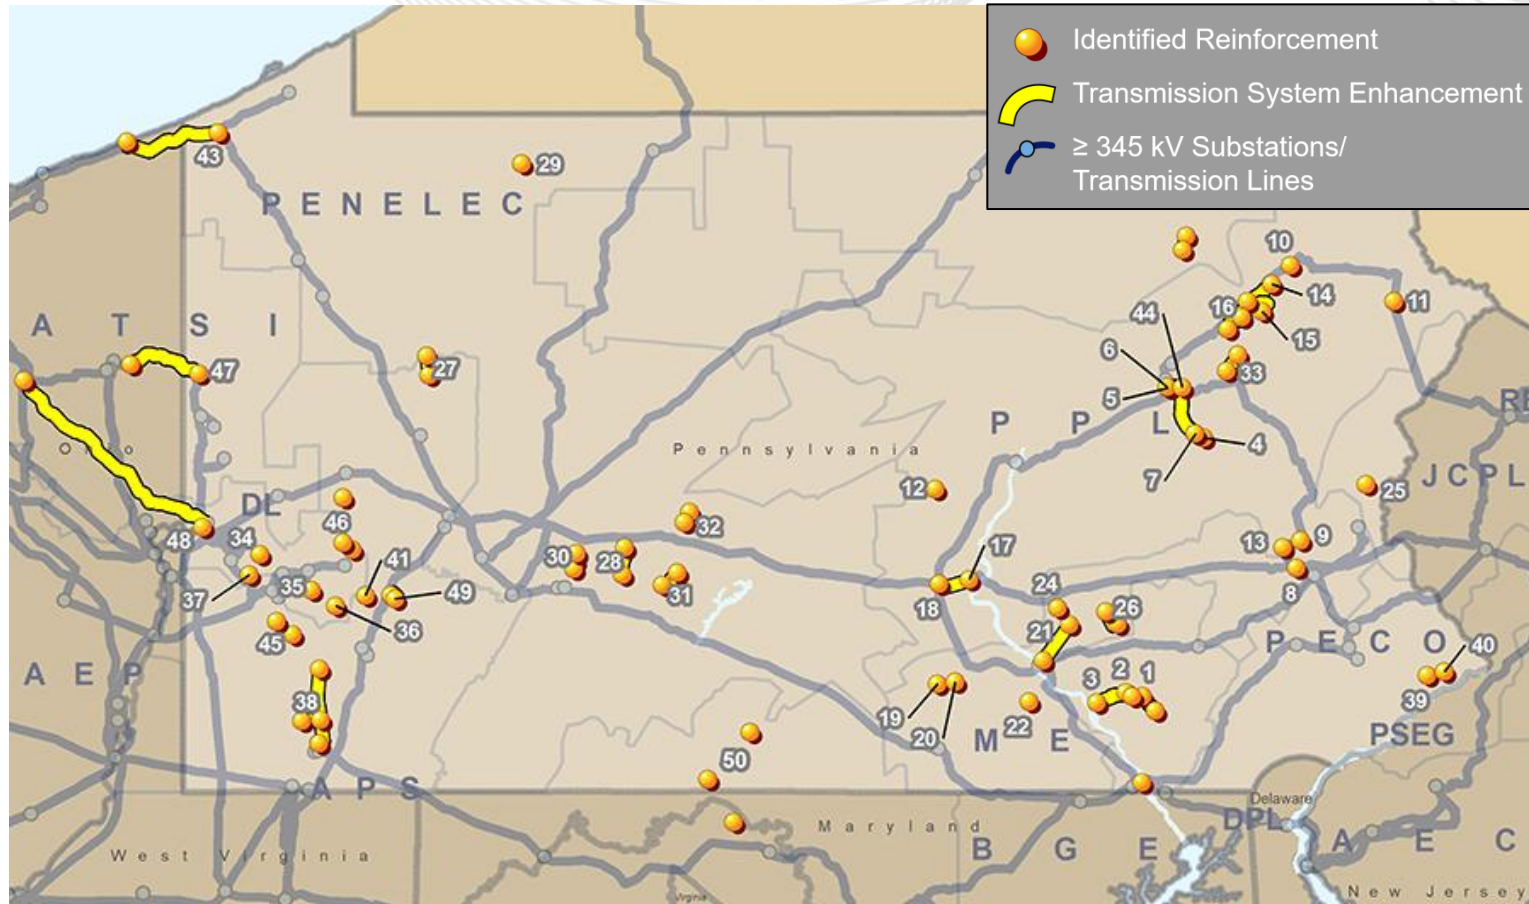

The 2025 RTEP has \$2.424 billion in baseline projects located in Pennsylvania.

Note: Baseline upgrades are those that resolve a system reliability criteria violation. Baseline projects listed in the annual RTEP report reflect project costs within a specific location and are not indicative of the project’s cost allocation.

The 2025 RTEP has \$22.93 million in network projects located in Pennsylvania.

Note: Network projects are new or upgraded facilities required primarily to eliminate reliability criteria violations caused by proposed generation, merchant transmission or long-term firm transmission service requests, as well as certain direct connection facilities required to interconnect proposed generation projects. The costs of network projects are borne by the interconnection customer.

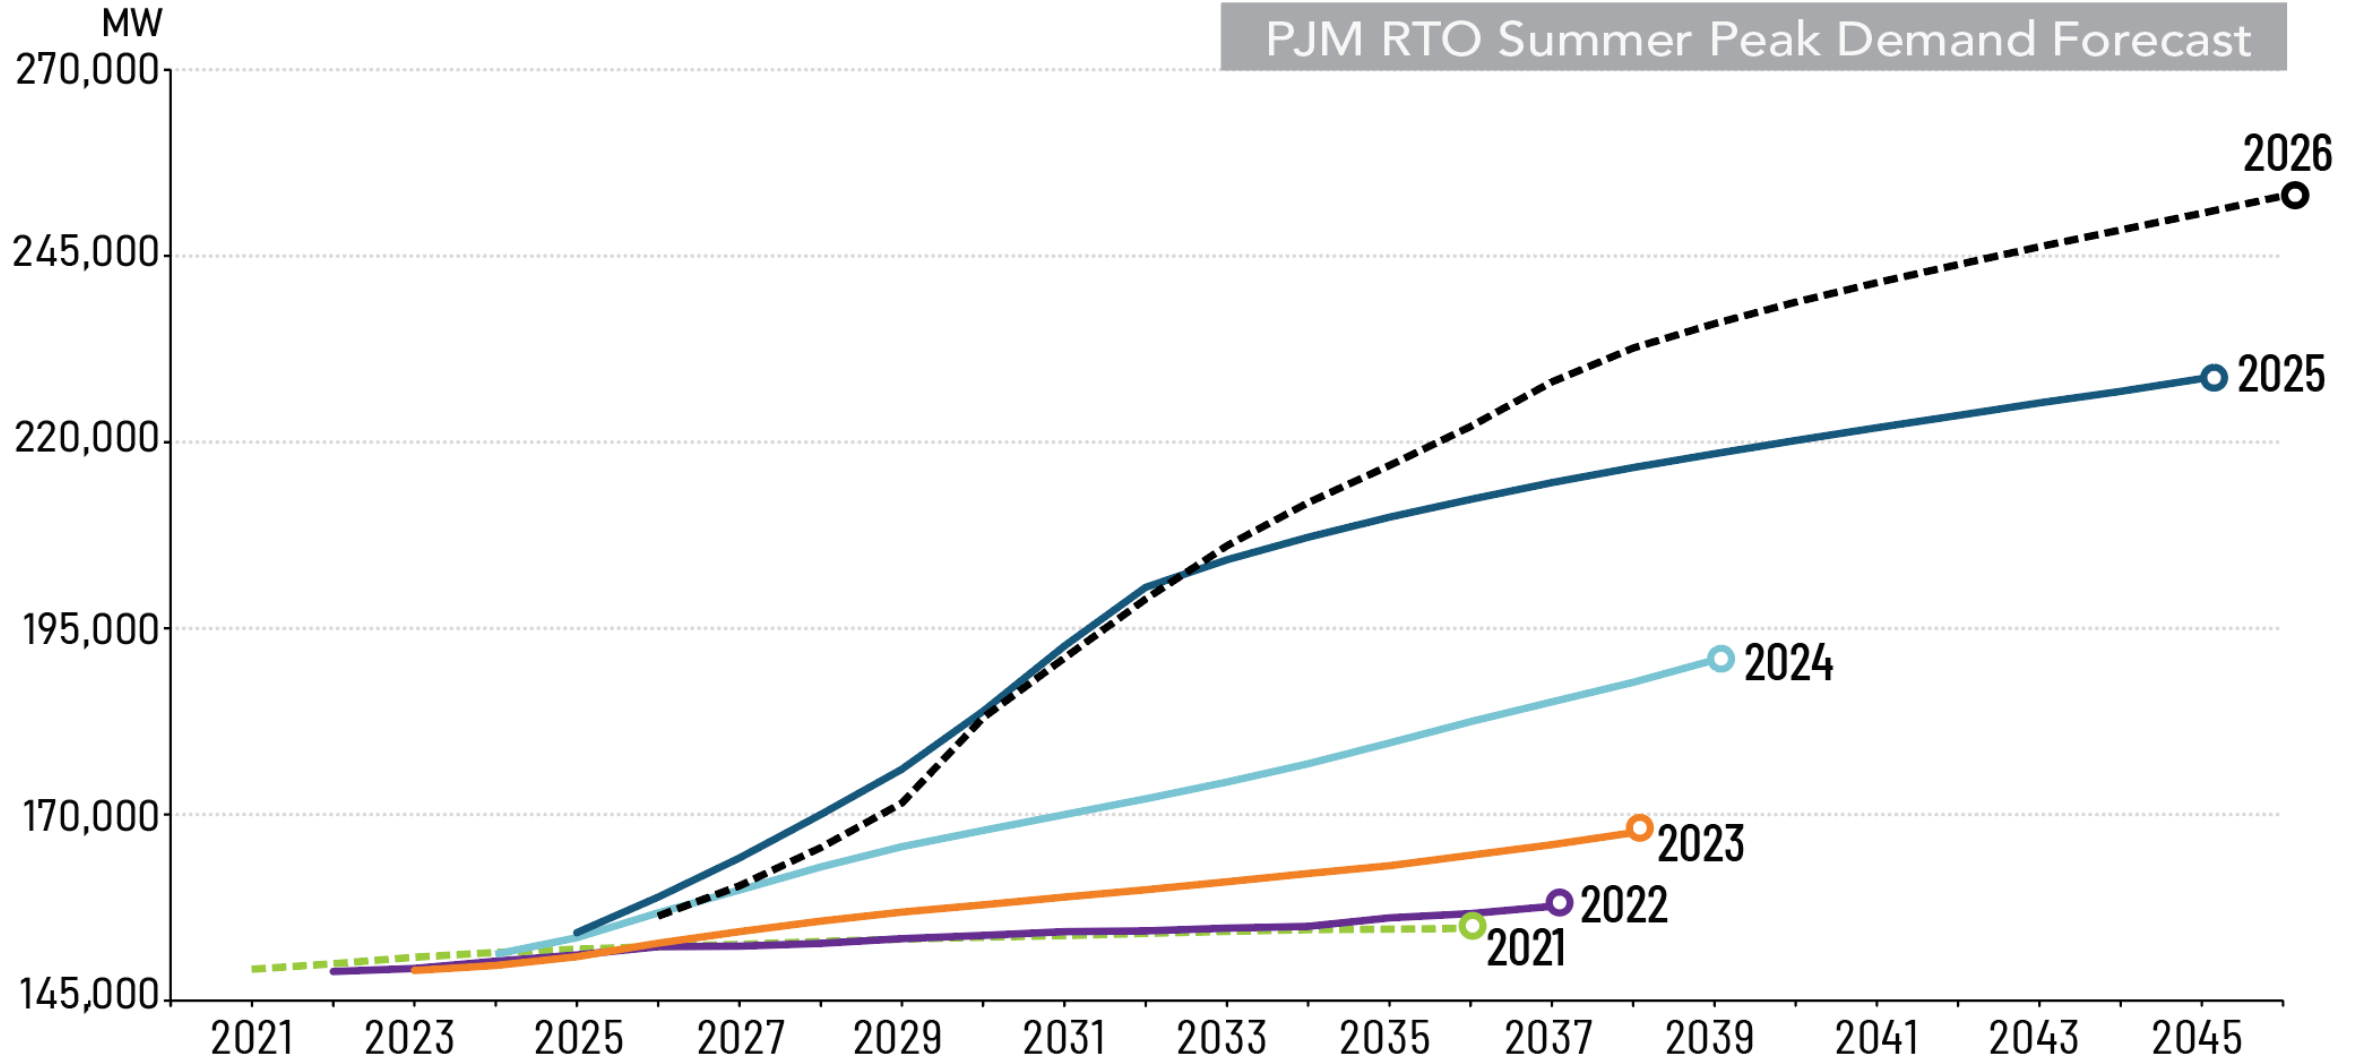

The 2025 RTEP has \$1.109 billion in supplemental projects located in Pennsylvania.

Note: Supplemental projects are transmission expansions or enhancements that are not required for compliance with PJM criteria and are not state public policy projects according to the PJM Operating Agreement. These projects are used as inputs to RTEP models, but are not required for reliability, economic efficiency or operational performance criteria, as determined by PJM.

Planning

Load Forecast

Pennsylvania – 2026 Load Forecast Report

*Serves load outside PA

The summer and winter peak megawatt values reflect the estimated amount of forecast load to be served by each transmission owner in the noted state/district. Estimated amounts were calculated based on the average share of each transmission owner's real-time summer and winter peak load in those areas over the past five years.

PJM RTO Summer Peak		PJM RTO Winter Peak	
2026	2036	2025/2026	2035/2036
156,373 MW	222,106 MW	137,670 MW	204,650 MW
Growth Rate 3.6%		Growth Rate 4.0%

Note: The listed total reflects both existing (2025) and forecasted large load adjustments. It does not include large loads that may exist but have not been submitted to PJM’s load forecasting process as a large load adjustment.

Markets

Market Analysis

Pennsylvania's average hourly LMPs were lower than the PJM average hourly LMP.

2027/28 Base Residual Auction Clearing Prices (\$/MW-Day)

2027/28 Cleared MW (UCAP) by Resource Type

CAPACITY PERFORMANCE

Cleared MW (UCAP)

Resource Type	ANNUAL	SUMMER	WINTER
Generation	127,179.5	-	268.6
DR	7,030.0	268.6	-
PRD	106.5	-	-
Total (MW)	134,316.0	268.6	268.6

2026/27 Base Residual Auction Clearing Prices (\$/MW-Day)

2026/27 Cleared MW (UCAP) by Resource Type

CAPACITY PERFORMANCE

Cleared MW (UCAP)

Resource Type	ANNUAL	SUMMER	WINTER
Generation	128,674.7	-	170.8
DR	5,359.8	170.8	-
PRD	105.5	-	-
Total (MW)	134,140.0	170.8	170.8

Operations

Pennsylvania – 2025 Generator Production

Note: Positive values represent exports and negative values represent imports.

PJM System Average Emission Rates
