Rate Formula Template - Attachment H-37A
Utilizing FERC Form 1 Data
Valley Link Transmission Maryland, LLC

For the 12 months ended 12/31/27

General Note: References to pages in this formula rate template are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Notes

A The revenues credited on page 1 lines 2-6 shall include revenues related to the Transmission Owner's integrated transmission facilities, including revenues for any load which is not included in the divisor used to derive the annual rate. They do not include revenues associated with FERC annual charges, gross receipts taxes, or facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

B Plant In Service, Accumulated Depreciation, and Depreciation Expenses shall exclude Asset Retirement Obligation amounts.

C Balances in Accounts 190, 281, 282 and 283 classified in the FERC Form 1 as Electric-related, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Excludes ARO-related items. Balance of Account 255 will be reduced by prior flow throughs and excluded if the utility chooses to utilize amortization of tax credits against taxable income. Account 281 is not allocated to Transmission. For rate projections, the ADIT calculation will include a proration of accelerated tax depreciation-related deferred taxes in accordance with Section 1.167(l)-1(h)(6)(ii) of the IRS regulations.

D Recovery of Regulatory Asset permitted only for pre-commercial and formation expenses as authorized by the Commission. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.

E Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of Abandoned Plant. Utility must submit a Section 205 filing to recover the cost of abandoned plant.

F Identified in FERC Form 1, or Company records if not so indicated on the FERC Form 1, as being transmission related.

G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 15, column 5 minus amortization of Regulatory Asset at page 3, lines 10 and 12, column 5 minus service company depreciation/amortization at page 2, line 32, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on page 111, line 57 in the Form 1.

H The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff. To the extent the charges are separately identified on the FERC Form 1 page 350, column I, the line number will be added to the source in Column 2 for reference. Line item references can change from year to year. Items not specifically identified on the FERC Form 1 page 350 will be obtained from Company books and records.

I Page 3, Lines 6 & 7 - Subtract all Regulatory Commission Expenses in account 928 itemized at 351.h, and non-safety related advertising included in Account 930.1.

J Page 3, Line 8-Add back Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.

K Recoverable PBOP expense is based on actual annual PBOP costs. The PBOP amounts are included in the Administrative and General total, and are based on current year expenses. Valley Link Transmission Maryland, LLC will provide upon request, in connection with each Annual Update, a copy of the annual third-party actuarial valuation report supporting the derivation of the PBOP expense as charged to FERC account 926, and the amount of such expense included in total A&G expenses.

L Includes only FICA, unemployment, highway, property, and other assessments charged in the current year. Taxes related to income, franchise taxes, and sales and use taxes are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. To the extent individual types of taxes are separately identified on the FERC Form 1 page 263, column L, the line number will be added to the source in Column 2 for reference. Line item references can change from year to year. Items not specifically identified on the FERC Form 1 page 263 will be obtained from Company books and records.

M The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes" and TEP = "the tax exempt ownership interest". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26). Excess/Deficient Deferred Income Taxes adjust income tax expense by the amount of the expense multiplied by (T/1-T).

Inputs Required:			
	FIT=	21.00%	(Federal Income Tax Rate)
	SIT=	8.25%	(State Income Tax Rate or Composite SIT)
	p =	0.0%	(percent of federal income tax deductible for state purposes)
	TEP =	0.0%	(percent of the tax exempt ownership)

N Excess / (Deficit) Deferred Income Taxes will be amortized over the average remaining life of the assets to which it relates, including ARAM, unless the Commission requires a different amortization period. The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H-37A that are not the result of a timing difference, including but not limited to depreciation related to capitalized AFUDC equity and meals and entertainment deductions.

O Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).

P Calculate rate base using 13 month average balance, except ADIT which is calculated based on specific prorated ADIT balances in Accounts 190, 282, and 283 utilizing a prorated year-end balance; any non-prorated balances will utilize a beginning/ending average balance. The net balance of the components will be the adjusted ADIT balances included in rate base.

Q Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to be included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

R Includes only income related to transmission facilities, such as pole attachments, rentals and special use from general ledger.

S Add back any lease expense of transmission assets used to provide service under this tariff included in account 565. Amount to be obtained from company books and records.

T Recovery of CWIP in rate base must be approved by FERC. Attachment 4 provides a reconciliation of the Company's total CWIP to the CWIP allowed in rate base. The annual report filed pursuant to the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will also describe the reconciliation prepared on Attachment 4.

U An imputed cost of debt will be utilized until such time as long-term debt is obtained by Valley Link Transmission Maryland, LLC. The imputed cost of debt will be based on a formula using publicly available indices which will be updated annually, see Attachment 5a page 2 of 2. Once debt is obtained, the long-term debt cost rate will be the weighted average of the rates for all outstanding debt instruments, calculated within Attachment 5a page 1 of 2, col. j. There will be no preferred stock cost, consistent with Valley Link Transmission Maryland, LLC's commitment to use a hypothetical 60% equity and 40% debt capital structure until the earlier of December 31, 2030 or the following three components of the Project Portfolio are placed in service: the new 500 kV Kraken Substation; the 765 kV Joshua Fall – Yeat transmission line; and the 765 kV Amos to Welton Spring transmission line. Thereafter, Preferred cost rate = preferred dividends (line 12) / preferred outstanding (line 14). No change in ROE may be made absent a filing with FERC under Section 205 or Section 206 of the Federal Power Act. Valley Link Transmission Maryland, LLC's stated ROE is set to 11.40% (10.9% base ROE plus 50 basis point adder for RTO participation).

V To the extent that the formula rate is not effective at the start of the rate year Valley Link Transmission Maryland, LLC will utilize the following method for implementation in the first year only. The proposed method for the first rate year only will be as follows: 1) for items using a 13-point average, a pro-rated point average based on month the rate first becomes effective will be utilized. 2) for items using a beginning/ending average, the beginning balance will be the month the rate first becomes effective. 3) The aggregate average rate base will then be multiplied by the prorated rate of return reflecting total months of operations.

Attachment 1
Project Revenue Requirement Worksheet
Valley Link Transmission Maryland, LLC

This worksheet is used to compute project specific revenue requirements for any projects for which such calculation is required by PJM. This will generally include projects with specific incentives or competitive concessions, or projects with regional cost allocation in PJM. Projects will be listed as either Schedule 12, Zonal, or other category defined by PJM. Other projects which comprise the remaining revenue requirement on Attachment H-37A will not be entered on this schedule.

Any hypothetical amounts or project names in a filed template will be removed and replaced with actual amounts in the first year actual values are available without the need for a section 205 filing to modify the template.

Notes

A Gross Transmission Plant is that identified on page 2 line 2 of Attachment H-37A inclusive of any CWIP included in rate base when authorized by FERC order.

B Net Plant is that identified on page 2 line 14 of Attachment H-37A inclusive of any CWIP or unamortized Abandoned Plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.

C General and Intangible Depreciation and Amortization Expense includes all expense not directly associated with a project, which is entered on page 3 , column 9.

D Project Gross Plant is the total capital investment including CWIP for the project calculated from Company books and records in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities.

E Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation plus CWIP in rate base, if applicable and Unamortized Abandoned Plant, if applicable.

F Project Depreciation Expense is the actual value booked for the project (excluding General and Intangible depreciation) at Attachment H-37A, page 3, line 18, plus amortization of Abandoned Plant at Attachment H-37A, page 3, line 19, if applicable.

G Requires approval by FERC of incentive return applicable to the specified project(s).

H True-Up Adjustment is calculated on the Project True-up Schedule for the relevant true-up year.

15	Excess/Deficient Deferred Income Taxes		Attachment H-37A, Page 3, Line 38	-				
16	Tax Effect of Permanent Differences (Note B)		Attachment H-37A, Page 3, Line 39	-				
17	Income Tax Calculation = line 7 * line 10						2,145,487	
18	ITC adjustment (line 13 * line 14)			-	NP	1.00	-	
19	Excess/Deficient Deferred Income Tax Adjustment (line 13 * line 15)			-	NP	1.00	-	
20	Permanent Differences Tax Adjustment (line 13 * 16)			-	NP	1.00	-	
21	Total Income Taxes (sum lines 17 - 20)						2,145,487	2,145,487
22	Return and Income Taxes with 100 basis point increase in ROE		(line 7 + line 21)					10,239,505
23	Return (Attach. H-37A, page 3 line 46 col 5)							7,638,266
24	Income Tax (Attach. H-37A, page 3 line 44 col 5)							1,972,464
25	Return and Income Taxes without 100 basis point increase in ROE		(line 23 + line 24)					9,610,730
26	Incremental Return and Income Taxes for 100 basis point increase in ROE		(line 22 - line 25)					628,775.06
27	Rate Base (line 1)							75,958,648
28	Incremental Return and Income Taxes for 100 basis point increase in ROE divided by Rate Base							0.0083

Notes:

A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any ROE actual incentive must be approved by the Commission. For example, if the Commission were to grant a 150 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.5 on Attachment 1 column 12.

B The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H-37A that are not the result of a timing difference.

Attachment 3
Formula Rate True-Up
Valley Link Transmission Maryland, LLC

This Attachment 3 is used to calculate the annual formula rate true-up. Any projects for which the RTO requires a true-up on an individual project basis, as shown on Attachment 1, will be computed separately. The remainder of the revenue requirement will also be trued up. The utility will individually enter the projected true-up year revenue requirements in Column C. A percentage of total will be calculated in Column D. Actual revenue received during the true-up year is entered into Column E, line 2 and allocated using the Column D percentage. The utility will prepare this formula rate template with the actual inputs for the true-up year, with the resulting revenue requirement for each line being separately entered in Column F. In Col. G, Col. F is subtracted from Col. E to calculate the true-up adjustment. Interest on the true-up is computed in Column H. Any adjustments to prior period true-ups are entered in Col. I. Col. J computes the total true-up as the sum of Cols. G, H and I.

Any hypothetical amounts or project names in a filed template will be removed and replaced with actual amounts in the first year actual values are available without the need for a section 205 filing to modify the template.

Line:				Projected True-Up Year Revenue Requirement Calculation		True-Up Year Revenue Received[1]	Actual True-Up Year Revenue Req.	Annual True-Up Calculation

Prior Period Adjustment

	A		B
	Prior Period Adjustment (Note 5)	Source	Adjustment Amount
11		Attachment 8	-

Notes:

1) The Revenue Received is input on line 2, Col. E from Attachment 3a - PJM Billings (PTRR).
2) From the Attachment 1, Page 3 of 3, line 1 or 3, col. 16 from the template in which the true-up year revenue requirement was initially projected.
3) From True-Up revenue requirement template Attachment 1, page 3 of 3, line 1 or 3, col. 14.
4) Interest due on the true up is calculated for the 24 month period from the start of the true-up year until the end of the year following the true-up year when the true up will be included in rates. Total True up Interest calculated on Attachment 6 and allocated to projects based on the percentage in Column D.
5) Corrections to true-ups for previous rate years including interest will be computed on Attachment 11 and entered on the appropriate line 3-8 above.

42a		Reserve 1	-	-	-	-	-	-	-	-
42b		Reserve 2	-	-	-	-	-	-	-	-
43		Total			-					-

Notes:

A Calculate using 13 month average balance, except ADIT which is calculated as described in Note E.

B Recovery of CWIP in rate base must be approved by FERC. Lines 29-41 of page 2 provide a reconciliation of the Company's total CWIP to the CWIP allowed in rate base. The annual report filed pursuant to the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will also describe the reconciliation prepared on this Attachment.

C Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission.

D Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.

E For purposes of the ADIT adjustments to rate base on Line 28, any specific prorated ADIT balance in Accounts 190, 282, and 283 will utilize a prorated year-end balance; any non-prorated balances will utilize a beginning/ending average balance. The net balance of the components will be the adjustments to rate base on Line 28. Attachments 4a and 4b are used to populate the average ADIT balances on lines 28 above. ADIT calculations will be prorated to the extent required by Section 1.167(l)-1(h)(6)(ii) of the IRS regulations. Rate Projections and True-ups will use Attachment 4c & Attachment 4d to calculate the proration adjustment. Only depreciation-related components are eligible for pro-rating, including, but not limited to, Net Operating Losses (NOLs).

F The Formula Rate shall include a credit to rate base for all unfunded reserves related to Workers Compensation and General Liability. Each unfunded reserve will be included on lines 42 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate.

G Balance of Account 255 will be reduced by prior flow throughs and excluded if the utility chooses to utilize amortization of tax credits against taxable income.

H Overpayments of Income Taxes shall be excluded from Prepayments if the overpayments are not used to reduce future tax liability.

Notes:

A For purposes of the ADIT adjustments to rate base, any specific prorated ADIT balance in Accounts 190, 282, and 283 will utilize a prorated year-end balance; any non-prorated balances will utilize a beginning/ending average balance. The net balance of the components will be the adjustment to rate base. Only depreciation-related components are eligible for pro-rating, including, but not limited to, Net Operating Losses (NOLs).

Note 1: Excess or deficient ADIT balances resulting from corporate income tax rate changes, including future federal, state, and local tax rate changes, are to be recorded to Accounts 254 or 182.3, respectively.
Note 2: For purposes of the ADIT adjustments to rate base, any specific prorated ADIT balance in Accounts 190, 282, and 283 will utilize a prorated year-end balance; any non-prorated balances will utilize a beginning/ending average balance. The net balance of the components will be the adjustment to rate base.

Debt Cost Calculation

TABLE 1: Summary Cost of Long Term Debt

CALCULATION OF COST OF DEBT

YEAR ENDED 12/31/2027

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)
t=N					Net Amount Outstanding		Average Net Outstanding in Year*			Weighted Debt Cost
Long Term Debt 12/31/2027	Issue Date	Maturity Date	ORIGINAL ISSUANCE (table 2, col. cc)	Net Proceeds At Issuance (table 2, col. gg)	at t=N	Months Outstanding at t=N	z* ((col e. * col. F)/12)	Weighted Outstanding Ratios (col. g/col. g total)	Effective Cost Rate (Table 2, Col. kk)	at t = N (h) * (i)
First Mortgage Bonds:										
1 Debt issuance #1	12/1/2025	12/22/2028	$ 34,231,508	$ 32,784,708	$ 35,726,302	12	$ 35,726,302	100.00%	8.04%	8.04%
			$ -	$ -			$ -	0.00%	#DIV/0!	#DIV/0!
			$ -	$ -			$ -	0.00%	#DIV/0!	#DIV/0!
			$ -	$ -			$ -	0.00%	#DIV/0!	#DIV/0!
			$ -	$ -			$ -	0.00%	#DIV/0!	#DIV/0!
			$ -	$ -			$ -	0.00%	#DIV/0!	#DIV/0!
			$ 34,231,508		$ 35,726,302		$ 35,726,302	100.000%		8.04% **

t = time
The current portion of long term debt is included in the Net Amount Outstanding at t = N in these calculations.
The outstanding amount (column (e)) for debt retired during the year is the outstanding amount at the last month it was outstanding.
* z = Average of monthly balances for months outstanding during the year (average of the balances for the 12 months of the year, with zero in months that the issuance is not outstanding in a month.).
Interim (individual debenture) debt cost calculations shall be taken to four decimals in percentages (7.2300%, 5.2582%); Final Total Weighted Average Debt Cost for the Formula Rate shall be rounded to two decimals of a percent (7.03%).
** This Total Weighted Average Debt Cost will be shown on page 4, line 13, column 4 of formula rate Attachment H-37A.

TABLE 2: Effective Cost Rates For Traditional Front-Loaded Debt Issuances:

YEAR ENDED 12/31/2027

	Long Term Debt Affiliate	**(aa)** Issue Date	**(bb)** Maturity Date	**(cc)** Amount Issued	**(dd)** (Discount) Premium at Issuance	**(ee)** Issuance Expense	**(ff)** Loss/Gain on Reacquired Debt	**(gg)** Net Proceeds (col. cc + col. dd - col. ee - col. ff)	**(hh)** Net Proceeds Ratio ((col. gg / col. cc)*100)	**(ii)** Coupon Rate Percentage (%)	**(jj)** Annual Interest (col. cc * col. ii)	**(kk)** Effective Cost Rate* (Yield to Maturity at Issuance, t = 0)
1	Debt issuance #1	12/1/2025	12/22/2028	$ 34,231,508		$ 1,446,800		$ 32,784,708	95.7735	6.46%	$ 2,209,901	8.04%
0	$0	1/0/1900	1/0/1900					$ -	#DIV/0!		$ -	#DIV/0!
0	$0	1/0/1900	1/0/1900					$ -	#DIV/0!		$ -	#DIV/0!

Attachment 6a
True-Up Interest Rate Calculation
Valley Link Transmission Maryland, LLC

This Attachment is used to compute the interest rate to be applied to each year's revenue requirement true-up.

	Applicable FERC Interest Rate (Note A):	
1	Rate Year January	8.04%
2	Rate Year February	8.04%
3	Rate Year March	8.04%
4	Rate Year April	7.55%
5	Rate Year May	7.55%
6	Rate Year June	7.55%
7	Rate Year July	7.50%
8	Rate Year August	7.50%
9	Rate Year September	7.50%
10	Rate Year October	7.50%
11	Rate Year November	7.50%
12	Rate Year December	7.50%
13	Rate Year Plus 1 January	7.20%
14	Rate Year Plus 1 February	7.20%
15	Rate Year Plus 1 March	7.20%
16	Rate Year Plus 1 April	6.78%
17	Rate Year Plus 1 May	6.78%
18	Rate Year Plus 1 June	6.78%
19	Rate Year Plus 1 July	6.75%
20	Rate Year Plus 1 August	6.75%
21	Average rate	7.36%
22	Monthly Average rate	0.61%

Note A - Lines 1-20 are the FERC interest rates under section 35.19a of the regulations for the period shown. Line 21 is the average of lines 1-20.

Attachment 7
Stated-Value Inputs
Valley Link Transmission Maryland, LLC

1. Rate of Return on Common Equity ("ROE")(a)

Valley Link Transmission Maryland, LLC stated ROE is set to:	10.90%
50 basis point adder for RTO participation	0.50%
Final Valley Link Transmission Maryland, LLC ROE	11.40%

2. Depreciation Rates (a)

FERC Account		Depr %
303.00	INTANGIBLE PLANT	20.00%
303.10	INTANGIBLE PLANT - LARGE	10.00%
350.00	LAND AND LAND RIGHTS	1.34%
352.00	STRUCTURES AND IMPROVEMENTS	1.63%
353.00	STATION EQUIPMENT	2.02%
354.00	TOWERS AND FIXTURES	1.61%
356.00	OVERHEAD CONDUCTORS AND DEVICES	1.86%
391.10	OFFICE FURNITURE	5.00%
391.20	OFFICE EQUIPMENT	6.67%
391.30	COMPUTER EQUIPMENT	20.00%
393.00	STORES EQUIPMENT	4.00%
394.00	TOOLS, SHOP AND GARAGE EQUIPMENT	4.00%
395.00	LABORATORY EQUIPMENT	5.00%
397.00	COMMUNICATION EQUIPMENT	6.67%
398.00	MISCELLANEOUS EQUIPMENT	5.00%

Notes

a	Will not be changed absent a FERC order.

Attachment 8
Prior Period Adjustments or Corrections
Valley Link Transmission Maryland, LLC

Line No.	Description	Source	(a) Revenue Impact of Correction	(b) Calendar Year 2026 Revenue Requirement
1	Filing Name and Date			Rate Formula Template - Attachment H-37A Filed 12/31/2026
2	Original Revenue Requirement			-
3

8				
9	Corrected Revenue Requirement	line 2 + 7		-
10				
11				
12	Total Corrections	Line 7		-
13				
14	Average Monthly FERC Refund Rate	Note A		0.00%
15	Number of Months of Interest	Note B		-
16	Interest on Correction	Line 12 x 14 x 15		-
17				
18	Total Annual Refunds Due to Customers	Line 12+16		-

Notes:

A The interest rate on corrections will be the average monthly FERC interest rate for the period from the beginning of the year being corrected through the most recent month available as of the time the correction is computed and included in an annual filing.

B The number of months interest due on the correction will be the number of months from the beginning of the year being corrected through June of the year in which the correction will be reflected in rates. In this manner the interest computed will reflect all years prior to when the correction is reflected in rates plus interest on the average unrefunded balance of the correction during the year the correction is reflected in rates.
