

Customized Energy Solutions

Customized Energy Solutions (CES) is a global energy services and technology company, founded in 1998 and headquartered in Philadelphia, USA. With over 400 professionals and offices in North America, India (since 2010), and Japan (since 2019), CES supports clients worldwide in navigating dynamic, deregulated electricity, and natural gas markets. CES delivers expertise in market consulting, asset management, retail operations, and emerging technologies—powered by proprietary platforms like CES BLUE, GOLD, RED, GRIDBOOST, and CoMETS. From utilities and IPPs to industrial users and retailers, we help clients optimize performance, reduce risk, and unlock value.
