**RE: Updated Notice of Deactivation – October 1, 2025
PJM Queue Position #AB1-015**

Dear Sir or Madam:

We are in receipt of PJM's response to Cliffs' Deactivation Notice for Warren Evergreen CT1. We appreciate PJM's efforts to process Cliffs' request, and PJM's confirmation that no reliability issues are associated with the planned Deactivation.

Section 113.2 of the PJM Tariff states, "In the event there are no reliability issues associated with the proposed Deactivation of the generating unit, the Notice of Reliability Impact shall so notify the Generation Owner, or its Designated Agent, and the Generator Owner or its Designated Agent may deactivate its generating unit at any time thereafter."

Accordingly, given that no reliability issues are associated with the planned Deactivation, please be advised that Cleveland Cliffs intends to deactivate the Warren Evergreen CT1 effective October 1, 2025. If you have any questions or need more information, please let me know.

Very truly yours,
