## **SCHEDULE E**

### **Non-Standard Terms and Conditions**

#### **I. Cost Containment Customer Credit Mechanism**

1. BGE commits to the cost containment customer credit mechanism (“4C Mechanism”) described below.
2. Inclusion of the 4C Mechanism in this Designated Entity Agreement is not intended to preempt the right of any party to seek modifications to be ordered by the Commission or otherwise challenge the recovery of costs through the FERC ratemaking process.
3. BGE shall notify PJM in writing within a reasonable time after BGE becomes aware of a condition that would (i) result in the cost commitment being exceeded or (ii) fall within any exclusions to the cost commitment. PJM, in turn, will communicate such information to stakeholders via notice posted on PJM’s website and to FERC by written notice.

#### **A. Definitions**

As used in this Schedule E, the capitalized terms shall have the meanings ascribed to them in the Designated Entity Agreement and as follows:

“**Actual Costs**” shall mean the capital cost of the Project, excluding b3800.4, exclusive of allowances for funds used during construction, and included for cost recovery in BGE’s FERC formula rate included in Attachment H-2B of the PJM Open Access Transmission Tariff.

“**Annual Update**” shall mean the process described in the PJM Open Access Transmission Tariff, Attachment H-2B, Section 2.

“**Estimated Cost**” for purposes of this Schedule E shall mean the costs submitted in the Proposal (defined below).

“**Force Majeure**” shall have the meaning set forth in section 10.0 of this Agreement.

“**Proposal**” shall mean the BGE portion of 2022 Window 3 proposal ID 660 submitted in PJM’s 2022 Window 3, which proposal excluded b3800.4.

“**Threshold Cost**” shall mean 105% of the Estimated Cost.

#### **B. Description of 4C Mechanism**

The 4C Mechanism will be implemented and is applicable to all components of the Project (as described in Schedule A to this Agreement), with the exception of b3800.4 to which the 4C Mechanism does not apply. Consistent with Section I.B of this Schedule E, the 4C Mechanism

shall not be applicable if there are Force Majeure events, alterations to the assumptions outlined in the exclusion criteria below, unforeseen regulatory changes, or modifications by PJM regarding the Project, its scope, or its schedule as set forth in Schedules A, B, and C, respectively, to this Agreement.

The 4C Mechanism will apply only when the Project's Actual Costs surpass the Threshold Cost. The 4C Mechanism operates through a three-tiered approach, providing a one-time revenue credit through the Annual Update. The revenue credit granted depends on the tier and corresponds to specified basis points of the incremental cost overrun amount, which is calculated based on the excess above the Threshold Cost. The following illustrates the three-tiered structure of the 4C Mechanism:

- Tier 1:
  - If the Actual Costs exceed the Estimated Cost by more than 5% up to and including 15%, a revenue credit will be provided equal to 100 basis points of the incremental cost overrun amount above the Threshold Cost.
- Tier 2:
  - If the Actual Costs exceed the Estimated Cost by more than 15% up to and including 25%, a revenue credit will be provided equal to 150 basis points of the incremental cost overrun amount above the Threshold Cost.
- Tier 3:
  - If the Actual Costs exceed the Estimated Cost by more than 25%, a revenue credit will be provided equal to 200 basis points of the incremental cost overrun amount above the Threshold Cost.

The applicability and timing of the credit will be determined solely by BGE but would be anticipated to be included in the first Annual Update following the first in-service year for the last component of the Project that is placed into service, excluding b3800.4.

### **C. Cost Containment Exclusion Criteria**

In the event that any of the following assumptions are untrue, BGE will inform PJM of the same and the 4C Mechanism will not apply, even if the Project's Actual Costs exceed the Estimated Costs by the Threshold Cost. The applicability of the 4C Mechanism is contingent upon the following assumptions:

- No Force Majeure events occur;
- There are no changes to the scope, schedule, or other requirements of the Project, as described in this Agreement;
- All the easements and corridors, as described in the Proposal, are available for use, no deviations from the identified route are required, and no condemnation is necessary;
- No cities, towns, municipalities, or similar entities impact the schedule, proposed routing, permitting, and cost of the Project;
- De-ratings of existing transmission lines do not occur because of the Project;
- All transmission line crossings are available, the outage timing matches what was assumed in the Proposal, and no significant rerouting is required, as determined by BGE;

- All impacted entities (including, but not limited to PJM, utilities, and municipalities) work with BGE, in a timely manner as assumed by the schedule set forth in Schedule C to this Agreement, to develop an outage plan and schedule for any line crossings;
- Labor cost escalation, as determined by BGE using the Handy-Whitman Index, the Bureau of Labor Statistics, or other appropriate index, does not exceed an annual rate of 5% in any year for the period 2024 – 2030;
- Minimal change in commodity as follows:
  - Steel prices at time of material purchase do not exceed a compound annual rate of 2.5% measured from the date of PJM Board of Managers (“PJM Board”) approval of the Project for inclusion in the RTEP. Compound annual rate means the annualized rate at which the price of steel grows over time as measured by BGE utilizing a commonly accepted index or reporting agency such as the SteelBenchmarker, American Metal Market, London Metal Exchange, or other index or reporting agency.
  - Copper prices at time of material purchase do not exceed a compound annual rate of 2.5% measured from the date of PJM Board approval of the Project for inclusion in the RTEP. Compound annual rate means the annualized rate at which the price of copper grows over time as measured by BGE utilizing a commonly accepted index or reporting agency such as the S&P Global Platts, Metal Bulletin, Chicago Mercantile Exchange, London Metal Exchange, or other index or reporting agency.
  - Aluminum prices at time of material purchase do not exceed a compound annual rate of 2.5% measured from the date of PJM Board approval of the Project for inclusion in the RTEP. Compound annual rate means the annualized rate at which the price of aluminum grows over time as measured by BGE utilizing a commonly accepted index or reporting agency such as S&P Global Platts, Metal Bulletin, Chicago Mercantile Exchange, London Metal Exchange, or other index or reporting agency.
- There is no material change in applicable laws and regulations; and
- BGE can timely secure all necessary regulatory approvals and permits to construct the Project and meet the targeted in-service date set forth in Schedule C of this Agreement.
