SCHEDULE C

Development Schedule

Designated Entity shall ensure and demonstrate to the Transmission Provider that it timely has met the following milestones and milestone dates and that the milestones remain in good standing:

	Milestones			
PJM Baseline Upgrade ID	Execute Interconnection Coordination Agreement: On or before this date, Designated Entity must execute the Interconnection Coordination Agreement or request the agreement be filed unexecuted.	Demonstrate Adequate Project Financing: On or before this date, Designated Entity must demonstrate that adequate project financing has been secured. Project financing must be maintained for the term of this Agreement	Acquisition of all necessary federal, state, county, and local site permits: On or before this date, Designated Entity must demonstrate that all required federal, state, county and local site permits have been acquired. ¹	Required Project In-Service Date: On or before this date, Designated Entity must: (i) demonstrate that the Project is completed in accordance with the Scope of Work in Schedules B of this Agreement; (ii) meets the criteria outlined in Schedule D of this Agreement; and (iii) is under Transmission Provider operational dispatch.

¹ Designated Entity and Transmission Provider acknowledge that Dominion and FirstEnergy have been designated to construct non-competitive upgrades to existing facilities related to the Project. SCHEDULE E

Non-Standard Terms and Conditions

Designated Entity is subject to the cost cap and cost containment commitments set forth in this Appendix.² Designated Entity shall make all filings to applicable regulators necessary to reflect these commitments in rates. PJM shall provide reasonable cooperation and assistance to the Designated Entity in the submission of such filings.

Inclusion of the cost commitment in this Designated Entity Agreement is not intended to preempt the right of any party to seek modifications to be ordered by FERC or otherwise challenge the recovery of costs through the FERC ratemaking process.

The Designated Entity shall notify PJM in writing within a reasonable time after the Designated Entity becomes aware of a condition that would result in (i) the cost commitment being exceeded or (ii) triggering any exclusions to the cost commitment. PJM, in turn, will communicate such information to stakeholders via notice posted on PJM's website and to FERC by written notice.

A. COST OF CAPITAL COMMITMENTS

1. Return on Equity ("ROE") Cap

Designated Entity agrees to cap its return on equity for the Project at the lower of: (i) 9.80% (inclusive of all ROE adders/incentives) or (ii) the ROE approved by FERC for use in the formula rate of the Designated Entity (inclusive of all ROE adders/incentives) ("ROE Cap"). The ROE Cap shall apply to the Project Costs, as defined below, less any retirements, for the life of the Project (i.e, from the date of Initial Operation until the Project is retired and de-energized), subject to the Project Cost Containment described below.

For cost containment provisions below, the "Minimum ROE" will be defined as 7.50%.

² The cost containment commitments stipulated in this Schedule E represent reductions to the revenue requirement determined pursuant to Designated Entity's formula rate on file at FERC. Any revenue requirement components not expressly subject to cost containment commitments set forth in this Schedule E shall be determined using the formula rate on file at FERC.

2. Allowance for Funds Used During Construction and Construction Work in Progress in Ratebase

Designated Entity will charge an Allowance for Funds Used During Construction (“AFUDC”) to Project Costs during the construction period. During the period when the Project or any phase of the Project is under construction, and for one year after Project completion if the Project or completed phase of the Project is not yet energized, (“Project Construction Period”), Designated Entity agrees to request from FERC the ability to use a hypothetical 55% debt capital structure for purposes of accruing an allowance for funds used during construction (“AFUDC”).

Consistent with FERC precedent, the Designated Entity will not concurrently accrue AFUDC during any period when CWIP is included in ratebase.

3. Equity Capitalization Cap

Following the Project Construction Period, Designated Entity commits to a capital structure of no greater than 45% equity for the life of the Project (“Equity Capitalization Cap”).

B. PROJECT COST CAP

1. Cost Containment with Respect to Project Costs that Exceed the Project Cost Cap

Project Costs above the Project Cost Cap, defined below, less depreciation, will earn a 0% equity return for the life of the Project (i.e., from the date of Initial Operation until the Project is retired and de-energized). Designated Entity will be allowed to recover the associated depreciation and debt cost.

2. Definitions Applicable to Project Cost Cap

As used herein, the following terms have the following meanings:

- a. “Excluded Costs” means any costs and expenses incurred as a result of an Uncontrollable Force, inclusive of AFUDC or CWIP (but, in each case, only if and to the extent such costs and expenses are in excess of the costs and expenses that would have been incurred but for such an Uncontrollable Force) and AFUDC during construction.
- b. “Project Costs” means any and all costs and expenses directly or indirectly incurred by Designated Entity after execution of the Designated Entity Agreement to develop, construct, complete, start-up and commission the Project and place the Project In Service in accordance with the Scope of

Work, including without limitation any costs and expenses incurred by Designated Entity in connection with the following: (i) any taxes, (ii) obtaining permits and other governmental approvals for the Project, (iii) acquiring land and land rights for the Project, (iv) performing any environmental assessments or environmental mitigation/remediation activities in connection with the Project, (v) designing and engineering the Project, (vi) procuring any equipment, supplies and other materials required to complete construction of the Project and place the Project In Service, and (vii) otherwise performing or completing any and all development- and construction-related activities required in connection with the Project as part of the Scope of Work, including but not limited to all site clearing, equipment assembly and erection, testing and commissioning activities contemplated by the Scope of Work, whether performed directly by Designated Entity or by one or more third parties retained by Designated Entity (without regard to whether such third parties are affiliated or nonaffiliated), but excluding in all cases Excluded Costs.

- c. "Scope of Work" means the approved scope of work for the Project, as more particularly described in this Designated Entity Agreement.
- d. "Project Cost Cap" is defined in Table 1 below by PJM Project ID in 2023 dollars and only includes the greenfield substation and greenfield transmission components that is the Designated Entity's responsibility.
- e. "Uncontrollable Force" means (i) any destruction of or damage to any portion of the Project, or any interruption, suspension or interference with Designated Entity's (or any contractor's or subcontractor's) performance of activities required to complete the Project, which destruction, damage, interruption, suspension or interference is caused by landslides; lightning; earthquakes; hurricanes; tornadoes; typhoons; severe weather; fires or explosions; floods; epidemic; pandemic; acts of a public enemy; acts or threats of terrorism; wars; blockades; riots; rebellions; sabotage; vandalism; insurrections; environmental contamination or damage not caused by Designated Entity (or any contractor or subcontractor); strike or labor disruption or civil disturbances (or governmental actions arising from any of the foregoing), (ii) the issuance or enactment on or after the Effective Date of any Applicable Laws and Regulations or any change in any Applicable Laws and Regulations existing as of the Effective Date that impacts the Project, (iii) any Breach or Default by Transmission Provider of its obligations under this Agreement or any request or action by Transmission Provider to delay or suspend any activities associated with the Project, or (iv) any change in scope of work or delays caused by action or inactions by Transmission Provider, government agencies, or

interconnecting or otherwise affected Transmission Owners.

C. SCHEDULE GUARANTEE

Designated Entity confirms that it can meet an in-service date as designated in Table 1 (as permissibly adjusted, the “Guaranteed Completion Date”). Designated Entity agrees to a reduction in the Project-specific ROE recovered in rates according to the following table (the “Schedule Guarantee”):

Months of Delay	Total Reduction in ROE
1	2.5 basis points
2	5 basis points
3	7.5 basis points
4	10 basis points
5	12.5 basis points
6	15 basis points
7	17.5 basis points
8	20 basis points
9	22.5 basis points
10	25 basis points
11	27.5 basis points

12 or more

30 basis points

The Schedule Guarantee is subject to a maximum reduction in the ROE of thirty (30) basis points. The Guaranteed Completion Date is subject to extension due to (1) an Uncontrollable Force as described herein, or (2) a Force Majeure Event under Article 10 of the Designated Entity Agreement (collectively, “Guaranteed Completion Date Extension Events”) (regardless of whether such events could have been reasonably foreseen by the Designated Entity), if Designated Entity is unable to complete construction of the Project as a result of such Guaranteed Completion Date Extension Events. In the event the Scope of Work is negatively impacted by a Guaranteed Completion Date Extension Event, Designated Entity shall use commercially reasonable efforts to mitigate such impact. Designated Entity shall notify PJM within a reasonable time after the occurrence of a Guaranteed Completion Date Extension Event, which notice shall describe, in reasonable detail, the nature of the event and the actions Designated Entity plans to take to mitigate the impact of the same. Once Designated Entity determines the length of any delay to the critical path progress of the Scope of Work, it shall notify PJM of the same, and the Parties shall reasonably agree on an extension of the Guaranteed Completion Date to reflect the Guaranteed Completion Date Extension Event.

D. EARNED ROE FLOOR

Notwithstanding the foregoing cost containment commitments, Designated Entity’s earned equity return on Project Rate Base shall be no lower than the lower of (i) the Minimum ROE; or (ii) Designated Entity’s FERC-accepted ROE (“ROE Floor”). Designated Entity’s earned ROE for purposes of this section includes its equity return for the year, in dollars (\$), as recovered through the formula rate, including any ROE reductions associated with the Project Cost Cap, Equity Percentage Cap, and Schedule Guarantee stipulated above. If the Earned ROE is less than the ROE Floor, Designated Entity shall recover a revenue requirement adjustment through its formula rate sufficient to produce an Earned ROE equal to the ROE Floor.

E. RELATIONSHIP BETWEEN PROJECT COST CAP AMOUNT AND SECURITY

1. On December 11, 2023, the PJM Board approved the 2022 RTEP Window 3 Projects, including baseline upgrades with an estimated overall RTEP net increase of approximately \$5,085.85 million, including an estimated \$440,945,414 for projects b3800.102, b3800.106, b3800.107, b3800.108, b.3800.109, b3800.110, b3800.113, b3800.115, and b3800.117, which is equal to the Project Cost Cap for the Project. As set forth in Section 3.0 of this Agreement, the Parties agree to a security amount of

\$25,500,000, which is three percent of PJM's current estimated cost for the Project and is greater than three percent of the Project Cost Cap ("Increased Security"). The Parties agree that the Increased Security is intended to mitigate the risk of the difference between the Project Cost Cap and PJM's current estimated cost of the Project. The Increased Security amount is unrelated to and does not affect the foregoing cost containment provisions.

2. For clarity, the sole purpose of the Project Cost Cap is to define the level of Project Costs above which the Designated Entity will earn a 0% ROE, as set forth in Part B.1 of this Schedule E. In accordance with Operating Agreement, Schedule 6, section 1.5.8(e), nothing in this Agreement is determinative as to whether the aggregate costs incurred on the Project are prudent and reasonable.
