

765kV Standalone Solution

General Information

Proposing entity name	Confidential
Does the entity who is submitting this proposal intend to be the Designated Entity for this proposed project?	Confidential
Company proposal ID	Confidential
PJM Proposal ID	60
Project title	765kV Standalone Solution
Project description	The proposed Project will resolve 1044 voltage violation flowgates (2030) in the AEP zone by enhancing the grid strength around the Marysville and Vassell substations and enabling improved voltage performance under critical N-1-1 outages on the 765 and 345 kV networks. The Project provides flexibility for future expansion and integration into the existing 765kV network, extending from AEP-IM to Eastern PJM. The solution can also be expanded to reinforce the 345kV corridor around AEP Ohio, providing access to generation in Southern PJM without stressing the Beatty substation. The solution consists of five greenfield components to be built by the Project Team and three station/line upgrades by incumbents.
Email	Confidential
Project in-service date	03/2032
Tie-line impact	Yes
Interregional project	No
Is the proposer offering a binding cap on capital costs?	Yes
Additional benefits	Confidential

Project Components

1. 765kV Greenfield Transmission Line from Existing 765kV Marysville Station to New 765kV Fostoria Yard Greenfield Station

2. 765kV Greenfield Transmission Line from Existing 765kV Marysville Station to Existing 765kV Vassell Stations
3. 765kV Greenfield Transmission Line from Marysville Station to 765kV New Greenfield Station
4. 765kV Greenfield Station
5. 765/345kV Fostoria Yard Greenfield Station
6. 765kV Marysville Station Upgrade
7. 345kV Fostoria Central Station Upgrade
8. 765kV Vassell Station Upgrade

Greenfield Transmission Line Component

Component title	765kV Greenfield Transmission Line from Existing 765kV Marysville Station to New 765kV Fostoria Yard Greenfield Station	
Project description	Confidential	
Point A	Marysville 765kV Station	
Point B	765kV Fostoria Yard Greenfield Station	
Point C		
	Normal ratings	Emergency ratings
Summer (MVA)	8189.000000	10550.000000
Winter (MVA)	9500.000000	11917.000000
Conductor size and type	Six (6) 795 kcmil ACSR "Mallard" conductors per phase	
Nominal voltage	AC	
Nominal voltage	765	
Line construction type	Overhead	
General route description	A 56.8 mile circuit that travels generally north - south. The route is primarily through farm fields and crosses through four counties.	
Terrain description	The terrain throughout the route is generally flat.	

Right-of-way width by segment	The entire circuit will be new 200-ft wide ROW.
Electrical transmission infrastructure crossings	Crossing below, utilizing a gantry. This will be fully designed during detailed engineering., crossing overhead above the existing circuit, crossing overhead above the existing circuit
Civil infrastructure/major waterway facility crossing plan	See attached Crossing Plan
Environmental impacts	The Marysville – New 765kv Fostoria Yard route was designed to minimize impacts on physical and environmental resources by using overhead transmission (OH), positioning structures/spans to avoid direct resource impacts and routing within agricultural land. Specific physical and environmental considerations that were evaluated to minimize resource impacts include: Wetlands: Construction workspace and temporary access roads will be located to minimize and/or avoid wetland impacts to the extent practicable. Where avoidance is unfeasible, mitigation measures will be used including timber matting, invasive species mgmt plan and wetland setbacks for equipment storage. Appropriate wetland mitigation and restoration will occur. Structures will be sited outside floodzones where feasible. Waterways: All surface waters will be spanned via OH transmission lines and structures will be placed above the ordinary high-water mark. Temporary construction mat bridges & culverts will be used to cross smaller streams where equipment travel is needed. All efforts will be made to place structures outside of flood zones where feasible. Forest Habitat: Based on desktop reviews, this route crosses ~4.4 miles of forested land. The Project will adhere to applicable bat and migratory bird TOYR for tree clearing activities. Terrestrial Wildlife: No significant impacts to terrestrial wildlife are anticipated by construction of this route. Sensitive Species/Natural Areas: The Project will consult with Ohio DNR and U.S. Fish and Wildlife Service to identify sensitive species that may occur in the route area. No critical habitat or designated natural areas are expected to be impacted. Farmland/Conservation Land: The Project will coordinate with landowners and agencies to minimize impacts on Ag land and conservation easements. No agricultural easements were found along this route based on initial reviews. Cultural Resources: This route is not within 1,000 feet of known known National Register of Historic Places. The Project will complete Phase I cultural surveys and consult with the State regarding survey findings. Recreational Areas: This route crosses a recreational trail south of Highway 36. Only minor, short-term impacts to trail use are anticipated during construction. No other designated recreational area will be affected. Federal and State Land: Based on initial desktop reviews of publicly available GIS data, no federal or state owned land is crossed by the route.
Tower characteristics	Guyed structures. Single monopole per phase - P.I. & Dead Ends

Line construction type	Overhead
General route description	The route is 42.5 miles long and it travels through 2 counties. It primarily goes through farm fields, and is generally flat. The first section stays in an east-west direction, to stay north of Delaware, Ohio. The second section starts to head south, in the vicinity of I-71, towards Vassell, coming in from the east of the station.
Terrain description	The terrain throughout the route is generally flat.
Right-of-way width by segment	The entire circuit will be new 200-ft wide ROW.
Electrical transmission infrastructure crossings	Crossing below, utilizing a gantry. This will be fully designed during detailed engineering., Crossing below, utilizing a gantry. This will be fully designed during detailed engineering., crossing overhead above the existing circuit, crossing overhead above the existing circuit
Civil infrastructure/major waterway facility crossing plan	See attached Crossing Plan

Environmental impacts	The Marysville to Vassell route was designed to minimize impacts on physical and environmental resources by using overhead (OH) transmission, positioning structures/spans to avoid resource impacts where feasible, & routing within largely agricultural land. Specific physical and environmental considerations that were evaluated to minimize impacts include: Wetlands: Where feasible, permanent structures (towers/poles) will be placed outside of wetland areas. The construction workspace will be reduced to the extent practicable to minimize wetland disturbances. Temporary construction roads will be positioned within the construction right-of-way to avoid wetlands. Where avoidance is unfeasible, mitigation measures will be used including timber matting. Waterways: All surface waters will be spanned via OH transmission lines and structures will be placed above the ordinary high-water mark. Temporary construction mat bridges & culverts will be used to cross smaller streams where equipment travel is needed. Larger streams will not be spanned by temporary equipment bridges. Structures will be sited outside flood zones where feasible. Multiple larger waterways will be crossed by this route including the Scioto River, the Olentangy River, and Big Walnut Creek. Forest and Riparian Habitat: Per desktop review, this route crossed ~6.7 miles of forested land. The Project will adhere to applicable bat and bird TOYR for tree clearing activities. Terrestrial Wildlife: No significant impacts are anticipated by construction of the route; activities will avoid critical breeding or migration periods in accordance with permits. Sensitive Species: The Project will consult with Ohio DNR and U.S. Fish and Wildlife Service to identify sensitive species that may occur in the route area. No critical habitat or designated natural areas are expected to be impacted. Farmland and Easements: The Project will coordinate with landowners and agencies to minimize impacts on Ag land and conservation easements. No agricultural easements are crossed by this route. Cultural Resources: The route is not within 1,000 feet of any mapped National Register of Historic Places. The Project will complete Phase I cultural surveys. Recreational Areas: This route crosses a recreational trail south of Highway 36. Only minor, short-term impacts to trail use are anticipated while the line is strung across the trail. Federal and State Land: No federal or state owned land is crossed by the route.

Greenfield Substation Component		
Component title	765kV Greenfield Station	
Project description	Confidential	
Substation name	Resaca Substation	
Substation description	Engineer and construct a new 765 kV substation consisting of eight (8) 765 kV circuit breakers (25 single pole breakers, arranged in a four (4) breaker ring bus configuration), four (4) 765 kV transmission lines, forty-nine (49) single phase 765 kV disconnect switches, thirteen (13) 765 kV single phase reactors (three (3) for each line and one (1) connected spare with a 765 kV single phase breaker for each transmission line phase and the spare), one (1) control house, and associated 765 kV bus and hardware.	
Nominal voltage	AC	
Nominal voltage	765	
Transformer Information		
None		
Major equipment description	765 kV dead tank circuit breakers, disconnect switches, reactors, and a control house.	
	Normal ratings	Emergency ratings
Summer (MVA)	0.000000	0.000000

Winter (MVA)	0.000000	0.000000
Environmental assessment		The New 765kV Station will be sited in agricultural land adjacent to an existing 765kV transmission line. No effects on forested/wooded areas, wetlands, waterbodies, flood zones, sensitive species habitat, or recreational uses are anticipated based on the Project's initial desktop reviews and diligence. Phase I cultural surveys will be completed and consultations will occur with the State Historic Preservation Office regarding survey findings. The Project team will also coordinate with state, county, and local agencies to obtain any necessary zoning, stormwater, erosion and sediment control authorizations, and comply with setback requirements that may apply to the Project. The Project will design construction and post-construction erosion and sediment control and stormwater management plans for agency review and approval.

Greenfield Substation Component

Component title	765/345kV Fostoria Yard Greenfield Station		
Project description	Confidential		
Substation name	New Fostoria Central Substation		
Substation description	Engineer and construct a new substation consisting of one (1) 345 kV dead tank circuit breaker, two (2) three (3) phase 345 kV disconnect switches, four (4) single phase 345 kV disconnect switches, one (1) 765 kV dead tank circuit breaker, ten (10) single phase 765 kV disconnect switches, four (4) single phase 765/345 kV transformers (750/833 MVA each, total of 2250/2500 MVA), one (1) control house, and associated 345 & 765 kV bus and hardware.		
Nominal voltage	AC		
Nominal voltage	765		
Transformer Information			
	Name	Capacity (MVA)	
Transformer	T1	2250/2500	
	High Side	Low Side	Tertiary
Voltage (kV)	765	34	13.8
Major equipment description	765 kV dead tank circuit breaker, 345 kV dead tank circuit breaker, 765 kV disconnect switch, 345 kV disconnect switches, and a control house.		
	Normal ratings	Emergency ratings	
Summer (MVA)	2250.000000	2500.000000	
Winter (MVA)	2250.000000	2500.000000	

Environmental assessment	The New 765kV Fostoria Central Yard will be sited in agricultural land adjacent to an existing substation. No effects on forested/wooded areas, wetlands, waterbodies, flood zones, sensitive species habitat, or recreational uses are anticipated based on the Project's initial desktop reviews and diligence. Phase I cultural surveys will be completed and consultations will occur with the State Historic Preservation Office regarding survey findings. The Project team will also coordinate with state, county, and local agencies to obtain any necessary zoning, stormwater, erosion and sediment control authorizations, and comply with setback requirements that may apply to the Project. The Project will design construction and post-construction erosion and sediment control and stormwater management plans for agency review and approval.

Substation Upgrade Component	
Component title	765kV Marysville Station Upgrade

Project description	Confidential
Substation name	Marysville 765 kV Station (Expansion)
Substation zone	AEP
Substation upgrade scope	Create three (3) new 765 kV position in the Marysville Station by engineering and constructing an extension of the 765 kV substation consisting of seven (7) 765 kV circuit breakers (21 single pole breakers), three (3) 765 kV transmission lines, fifty-one (51) single phase 765 kV disconnect switches, one (1) control house, and associated 765 kV bus and hardware. The expansion of the Marysville Station will also require extending both 765 kV main buses via two (2) new 765 kV string buses.
Transformer Information	
New equipment description	765 kV dead tank breakers, disconnect switches, and a control house
Substation assumptions	The Marysville Station is arranged in a two (2) bay breaker and half scheme. Due to limited space to the South West on the existing station, this solution proposes expanding the station approximately 1200 feet South West of the existing station.

Substation Upgrade Component	
Component title	345kV Fostoria Central Station Upgrade
Project description	Confidential
Substation name	Fostoria Central 345 kV Station
Substation zone	AEP
Substation upgrade scope	Create a new 345 kV position in the Fostoria Central Substation by engineering and constructing one (1) new 345 kV dead tank circuit breaker, two (2) 345 kV disconnect switches, 345 kV string bus, associated 345 kV bus and hardware.
Transformer Information	
None	
New equipment description	345 kV dead tank breaker and disconnect switches
Substation assumptions	Fostoria Central Station is arranged as a five (5) breaker ring bus arrangement, consisting of four (4) 345 kV transmission lines and one (1) 345/138 kV XFMR position. There is space in the existing substation to add a new 345 kV position to support this solution.

Substation Upgrade Component	
Component title	765kV Vassell Station Upgrade
Project description	Confidential
Substation name	Vassell 765 kV Station
Substation zone	AEP
Substation upgrade scope	Create a new 765 kV position in the Vassell Substation by engineering and constructing two (2) new 765 kV dead tank circuit breaker, fifteen (15) single phase 765 kV disconnect switches, associated 765 kV bus and hardware.
Transformer Information	
None	
New equipment description	765 kV dead tank circuit breakers and disconnect switches
Substation assumptions	The Vassell Station is arranged in double bus double breaker scheme, this solution proposes installing two (2) additional breakers to create a new position within the boundaries of the existing fence.

New Flowgates

Confidential

Financial Information

Capital spend start date	01/2026
Construction start date	10/2028
Project Duration (In Months)	74

Cost Containment Commitment

Cost cap (in current year)	Confidential
Cost cap (in-service year)	Confidential

Components covered by cost containment

1. 765kV Greenfield Transmission Line from Existing 765kV Marysville Station to New 765kV Fostoria Yard Greenfield Station - Proposer
2. 765kV Greenfield Transmission Line from Existing 765kV Marysville Station to Existing 765kV Vassel Stations - Proposer
3. 765kV Greenfield Transmission Line from Marysville Station to 765kV New Greenfield Station - Proposer
4. 765kV Greenfield Station - Proposer
5. 765/345kV Fostoria Yard Greenfield Station - Proposer

Cost elements covered by cost containment

Engineering & design	Yes
Permitting / routing / siting	Yes
ROW / land acquisition	Yes
Materials & equipment	Yes
Construction & commissioning	Yes

Construction management	Yes
Overheads & miscellaneous costs	Yes
Taxes	No
AFUDC	No
Escalation	Yes
Additional Information	Confidential
Is the proposer offering a binding cap on ROE?	Yes
Would this ROE cap apply to the determination of AFUDC?	Yes
Would the proposer seek to increase the proposed ROE if FERC finds that a higher ROE would not be unreasonable?	No
Is the proposer offering a Debt to Equity Ratio cap?	Confidential
Additional cost containment measures not covered above	Confidential

Additional Comments

None
