

Distributed Energy Resources Subcommittee Monthly Progress Report

June 8, 2020

1. Public Distribution Microgrids

Issue Status

In Progress – Packages

Target Completion

2020Q3

Progress Update

PJM staff presented additional changes to Package C at the group's May 18, 2020 meeting. PJM staff are currently at work producing draft Manual and Tariff language (if needed) to cover Package C for the group's consideration. The aim is to review the Package with accompanying language and progress towards a vote following the August 3, 2020 DERS meeting.

Note: The DER Subcommittee reports the MRC and has proposed to sunset in lieu of a proposed new subcommittee reporting to the MIC that will cover DER and inverter-based resources topics. As such, this issue will move to the new subcommittee if it is approved by the MIC.
