Subject: Size Range of Current Members that could qualify for Exemptions in 4A1 and 4A2

For the categories of Exemptions shown below, what are the approximate high and low capacity requirement amounts for current members that could qualify for the proposed exemption?

Self Supply LSE Type and Maximum Net Short Position (MW UCAP, measured at RTO, MAAC, SWMAAC and EMAAC unless otherwise specified):

1. Single Customer Entity - 150 MW
2. Public Power Entity - 1000 MW
3. Multi-state Public Power Entity –
 - a. 1000 MW in SWMAAC, EMAAC, or MAAC LDAs
 - b. 1800 MW RTO
4. Vertically Integrated Utility - 20% of LSE's Reliability Req.

[Term Sheet Section 3.a.ii(a)]
