MGSTF
Next Steps Recommendation

Glen Boyle
Manager, Performance Compliance
Modeling Generation Senior Task Force
May 15, 2020
Modeling Generation Sr. Task Force

- Originally chartered in February 2017
- Key Work Activities
  - Review the work of prior groups addressing the model of combined cycle units.
  - Promote understanding of generating plants and their need for a more flexible model.
  - Identify market rules/mechanisms to integrate generation resources into PJM’s markets such that their operating characteristics are understood, are properly modeled and adequately compensated.
  - Identify necessary changes to OA, Tariff, and manuals needed to implement any new model.
• Stakeholder Requirements document created
  – Shared with GE
  – Used to inform nGEM implementation
• Hourly segmented ramp rates
  – In process of implementation (Filed with FERC)
• Additional offer segments
  – In process of implementation
• Soak Time
  – Failed vote at MGSTF (14% support)
    • Concern over DA commitment during soak time period
    • Wanted focus to be on long term solution
MGSTF Next Steps

- Refine Requirements document (priorities, implementation feasibility)
- Possible sunset of MGSTF
  - Discuss at June MGSTF
