

# Capacity Capability Senior Task Force (CCSTF) Final Report

February 24, 2022

#### **Issue Creation**

Problem Statement (<a href="https://pjm.com/-/media/committees-groups/task-forces/ccstf/postings/problem-statement.ashx">https://pjm.com/-/media/committees-groups/task-forces/ccstf/postings/problem-statement.ashx</a>) and Issue Charge (<a href="https://pjm.com/-/media/committees-groups/task-forces/ccstf/postings/issue-charge.ashx">https://pjm.com/-/media/committees-groups/task-forces/ccstf/postings/issue-charge.ashx</a>) brought forward by PJM staff and approved at the March 26, 2020 Markets and Reliability Committee (MRC) meeting.

# **Issue Summary**

The CCSTF worked to develop the provisions necessary to establish an ELCC method for calculating the capability of all limited duration resources, such as energy storage resources, and all Intermittent Resources, such as wind, solar, hydroelectric power with and without storage reservoirs and other renewable resources. The CCSTF also addressed the capability of hybrids in this effort. The provisions considered included, among other things:

- a. Timing of ELCC analysis for a given delivery year
- b. Allocation of ELCC capability of a resource class to a specific unit
- c. The simulated dispatch of energy storage resources and hybrid resources
- d. Determination of resource classes

The CCSTF had a Phase II and the group started discussion on these topics, but decided to move the work over to the Resource Adequacy Senior Task Force (RASTF).

#### **Consensus-Based Issue Resolution Process**

Number of Meetings and date range covering this topic: The CCSTF met 12 times from April 7, 2020 to August 17, 2020 to discuss this issue.

Non-Binding Poll Results: A few non-binding informational polls were taken to test consensus among the group. Vote Results: <a href="https://pjm.com/-/media/committees-groups/committees/mrc/2020/20200831-special/20200831-item-01-1-ccstf-voting-results-presentation.ashx">https://pjm.com/-/media/committees-groups/committees/mrc/2020/20200831-special/20200831-item-01-1-ccstf-voting-results-presentation.ashx</a>

Final Matrix: <a href="https://pjm.com/-/media/committees-groups/committees/mc/2020/20200917/20200917-item-01-2-ccstf-matrix-post-meeting-20200817.ashx">https://pjm.com/-/media/committees-groups/committees/mc/2020/20200917/20200917-item-01-2-ccstf-matrix-post-meeting-20200817.ashx</a>

# 1. Recommended Proposal: No Transition

https://pjm.com/-/media/committees-groups/committees/mrc/2020/20200917/20200917-item-04-3-main-motion-solution-package-a-presentation.ashx

Key characteristics of this package:

- 1. Specifies the ELCC methodology, including simulated dispatch of Energy Storage Resources, hydro with storage, & other limited duration resources.
- 2. Provides an annual reassessment of derate factors, performance factors, and ultimately Accredited UCAP values for all applicable resources.
- Accredits resources based on their share of the total resource adequacy value of the entire class of such resources (i.e., an "Average ELCC" approach, as distinct from a "Marginal ELCC" approach).
- 4. Accommodates a diversity of resource classes, including new technology types such as 4-hour Energy Storage Resources and hybrids.

## 2. Alternate 1 Proposal: Joint Stakeholder Transition Package

https://pjm.com/-/media/committees-groups/committees/mrc/2020/20200917/20200917-item-04-4-ccstf-joint-stakeholders-package-presentation.ashx

The Joint Stakeholder package consist of a minimum guaranteed floor ELCC rating by class for 10 Delivery Years and also included a transition mechanism.

# 3. Alternate 2 Proposal: Joint Stakeholder Transition Package with Amendment

This package has the same solutions as the Joint Stakeholder package, but with the following amendments: <a href="https://pjm.com/-/media/committees-groups/committees/mrc/2020/20200917/20200917-item-04-4a-alternate-motion-amendment-to-joint-stakeholder-package.ashx">https://pjm.com/-/media/committees-groups/committees/mrc/2020/20200917/20200917-item-04-4a-alternate-motion-amendment-to-joint-stakeholder-package.ashx</a>

# 4. Standing Committee Results

https://pjm.com/-/media/committees-groups/committees/mrc/2020/20201029/20201029-caa-draft-minutes-mrc-20200917.ashx

Package A failed in a sector-weighted vote with 1.29 in favor. Package D failed in a sector-weighted vote with 2.56 in favor. Alternate Motion passed in a sector-weighted vote with 3.98 in favor.

Issue Tracking: https://pim.com/committees-and-groups/issue-tracking/issue-tracking-

details.aspx?lssue=fdd40adf-8d4c-4ecf-bea2-c34793ccf226

Original FERC Docket: ER21-278-000

Approved FERC Docket: ER21-2043-000 (effective date of August 1, 2021 for 2023/24 DY)

\*The Joint Stakeholder package with Alternate Motion was endorsed by stakeholder and filed with FERC in Docket ER21-278-000. FERC rejected this filing and, as a result, PJM filed Package A which was accepted by FERC.

## Appendix II: PJM Participation

Facilitator: Melissa Pilong Secretary: Jaclynn Lukach Advocate: Andrew Levitt

Subject Matter Expert: Patricio Rocha-Garrido

Subject Matter Expert: Pat Bruno Subject Matter Expert: Jerry Bell Subject Matter Expert: Jim Dolan Subject Matter Expert: Murty Bhavaraju

PJM Legal: Thomas DeVita
