TRANSMISSION FACILITY CUT-IN PROCESS UPDATE

Issue Source
PJM must have all proper parameters in place prior to energization of a ‘cut-in’ ticket in order to monitor the system accurately and maintain reliability in accordance with NERC Standards FAC-008 and FAC-011.

Issue Content
PJM has identified the need to update manual language specific to the cut-in process to indicate that the end time of an outage marked ‘cut-in’ will be extended by one business day if new data has not been submitted or existing parameters have not been verified by 11:00 the day before scheduled energization.

Key Work Activities and Scope
1. Review PJM Manual 03 and add language detailing the addition of the ticket end time extension

Expected Deliverables
1. PJM Manual 03 revision
