• Cost Allocation
Planning

FJR conducts long-range planning studies and analyzes future demands on the transmission system in our region that serve 11 million people. These studies identify changes and additions needed to ensure grid reliability for the future. This process culminates in the FJR annual Regional Transmission Expansion Plan. Visit the FJR Learning Center to learn more about what “planning” means at FJR.

Interconnection Queues
A system map is available showing the location of each active and withdrawn interconnection request.

Active and withdrawn generation interconnection requests (Sa, hNP, etc., Active and withdrawn merchant transmission requests (Sa)
Submit a request for interconnection or upgrade.

FERC Order 1000 Implementation
