Manual 14E Update

Jason Connell
Senior Engineer, Interconnection Projects
Planning Committee
March 10, 2016
• Updating the Manual due to changes approved at the July 2015 MRC to the Merchant Network Upgrade process

• Reorganizing Manual 14E
  – Added a section to assist in determining customer type by project
  – Covers three types of projects
    • Merchant Transmission Facilities
    • Merchant Network Upgrades
    • Upgrade requests (IARR requests)
Each project section will describe:
- Entering the queue
- Agreements applicable and eligible rights
- Obligations and technical requirements

Existing rights sections were relocated as attachments to the end of the manual

First read expected at the April PC meeting
