Manual 20: Resource Adequacy Analysis Periodic Review

Tom Falin
Manager, Resource Adequacy Planning
Planning Committee
July 14, 2016
• Revisions proposed as result of Periodic Review:
  – Revisions needed to clean-up outdated language and ensure language follows current processes
  – Minor revisions needed to correct grammar, spelling, punctuation, consistency of terms, and document references
• Revisions needed to clarify the implementation of Capacity Performance
Section 1

• Section 1.2 – deleted out of date portions describing RPM auction transition years.
• Section 1.3 – added clarification of EFORd in 2018/2019 Delivery Year due to implementation of CP.
• Sections 1.3 and 1.6 – added clarification regarding elimination of DR Factor in 2018/2019 Delivery Year due to implementation of CP.
• Section 1.9 – deleted reference to Futrix. Vendor software was replaced with in-house programs.
- Revised Section 2.1 and deleted Section 2.2 completely
  - Generator Owner Review website was removed due to dated user interface. This process has been replaced with the exchange of password-protected spreadsheets.
Section 3

- Section 3.2.1 – deletion of obsolete language for the World region
- Section 3.2.2 and 3.2.3 – deleted reference to Futrix. Vendor software was replaced with in-house programs.
- Section 3.2.2 – revision of Ambient Deratings language to reflect current procedure based on analysis of Summer Verification Test.
- Section 3.2.2 – added clarification of EFORd with implementation of CP.
- Section 3.2.3 – updated screenshot with new version of ARC.
- Section 3.3 – dated reference.
- Section 3.3.1 – dated reference.
Requested PC Action

- Endorsement of Manual 20 language changes.
- Final endorsement will be requested at the July 28 MRC meeting.
