FERC Order 1000: Update on Efforts Regarding TEAC Communications and RTEP Planning Cycles

Fran Barrett
Planning Committee
August 11, 2016
• PJM Staff is examining the next tier of stakeholder “Lessons Learned” feedback and considering the implications of our newer FERC Order No.1000 business processes

• Organizing two efforts
  – TEAC Communications and Processes Review
  – Assessment of RTEP Planning Cycles
• TEAC Communications and Processes
  – Deconstruct current framework, functions and processes
  – Map status quo
  – Consider refinements, changes, new technologies and approaches
  – Refine and improve to meet stakeholder expectations and business needs

• RTEP Planning Cycles
  – Assess impacts of Order No. 1000 “windows” on PJM’s 12/24 month Planning Cycles
  – Consider influences to and challenges with current generation interconnection queue process relating to base case planning
  – Ensure necessary linkages to Interregional planning are strengthened
  – Respect timing and requirements to support Market business cycles (e.g. RPM) and compliance requirements (e.g. NERC)
Next Steps

- Organizing cross-functional internal staff support teams
  - System Planning, Legal, Communications, Markets, Information Technology
- High-level mapping of current processes and influences
- Outlining potential “solution space(s)” and alternatives
- Engage with stakeholders to kick-off efforts
- Align on near and longer term designs, changes and refinements
- As appropriate – fully vet via PJM Stakeholder Process
