Designated Entity Standards Task Force
Manual 14C Revisions

Suzanne Glatz
Infrastructure Coordination
Planning Committee
June 8, 2017
The Designated Entity Design Standards Task Force has completed its first draft standards for protection and transmission lines and will soon finalize the substation standards.

M14C revisions incorporate these requirements relevant to the new design standards and work completed by the DEDSTF:

- Designated Entities must follow posted minimum design standards developed by the DEDSTF
- Minimum Design Standards will be posted on PJM’s website
- Applicable technical standards for Transmission Owners, applicable to transmission interconnections, must be posted on PJM’s website.
