Draft Reliability Guideline: Inverter-Based Resource Performance

Purpose:
The Inverter-Based Resource Performance Task Force (IRPTF) developed this guideline to address potential reliability impacts of the changing resource mix connected to the Bulk Power System.

This guideline specifies recommended steady state and dynamic performance for inverter-based resources, and also covers a wide range of related aspects from protective functions to monitoring capability. The material presented throughout this guideline is based on extensive discussions with industry experts and members of the IRPTF.
