Manual 14E Updates
“Upgrade and Transmission Interconnection Requests”

Presented by Lisa Krizenoskas
Senior Engineer, Interconnection Projects
Presented to Planning Committee
December 13, 2018
• Cover-to-Cover review (*every 3 years for M14E*)

• Changed Title to:
  – “Upgrade and Transmission Interconnection Requests”.

• Align with structure of:
  – Manual 14A for “New Service Requests Process” and
  – Manual 14G for “Generation Interconnection Requests”.
M14E, Section 1.1 “PJM’s Interconnection Process”

Updated section to include a “Summary of PJM Manual 14 Series” table:

- Updated and more concise descriptions of the 14 series manuals
- Added new 14G “Generator Interconnection Requests”
M14E, Section 1.2 “Project Types Proposed by Transmission Interconnection Customers and Upgrade Customers”

Moved to Section 1.3 and re-named “Customer Classifications”

- Added new Exhibit 2 for “New Services Requests Swim Lane Diagram”
  - Customer Types, attachments required for queue entry, studies and agreements.
- Added new Exhibit 3 for “Transmission Interconnection and Upgrade Request Process Flow”
  - Updated exhibit for applicable reference sections and updated studies performed for the Upgrade Customer.
M14E, Section 1.3 “Requests Types Submitted by Transmission Interconnection Customers and Upgrade Customers”

• Moved to M14E, Section 1.2
New Section 2  “Queue Point Application Process”

Section 2.1 “Queue Point Tool”

- Informs New Service Customer how to apply to interconnection queue.
- Links to website for Queue Point User Guide and Sign-In.

Section 2.2 “Determining New Services Request Tariff Attachment”

- Guides New Services Customer to determining the proper Attachment form to submit for entry into the interconnection queue.
• **Sections renumbered:** Old Sections 2, 3 and 4 moved to new Sections 3, 4 and 5, respectively with the addition of new Section 2.

• **Reference Corrections:** Corrections to Attachment S references made in old Section 2.1.2 (new Section 3.1.2)

• **Reference Changes:** References to “developer” changed to “New Services Customer”, “Transmission Interconnection Customer” or “Upgrade Customer” depending on context.
