

# eDART October 2019 Release Enhancements

eDART Users Group Meeting  
9/9/2019

Production release of September enhancements scheduled for Tuesday, October 8<sup>th</sup>.

- eDART will be unavailable from 19:00 to 02:00 on Wednesday, October 9<sup>th</sup>.

Sandbox release scheduled for September 16<sup>th</sup>.

- **General Discussion Topics**
- Generation Related Enhancements
- Transmission Related Enhancements
- Question and Answer Resolution Session

PJM will issue a new eDART GO Survey **mid-October 2019**, with a focus on Generator Fuel Inventory and Emissions updates for upcoming 2019/2020 winter season.

PJM requires that generating resources complete the survey no later than **mid-November 2019**.

*Dates to be announced.*

Please contact [edartgosurvey@pjm.com](mailto:edartgosurvey@pjm.com) with any questions related to the survey or tool.

A central graphic with a blue and green geometric background. It features four inset photos: a woman with glasses in the top left, a man and woman at a computer in the top right, a man in a suit in the bottom left, and a woman speaking at a podium in the bottom right. The PJM logo is at the bottom center of the graphic.

**2019**  
**PJM MEMBER**  
**SATISFACTION SURVEY**

Survey opens **September 30**

Look for your email invitation from PJM.

The PJM logo, featuring a stylized blue and white graphic of a person or wave next to the lowercase letters "pjm" in a bold, sans-serif font.

PJM is asking for your feedback so we can look for opportunities to improve the service we provide our customers.

The survey helps PJM identify key stakeholder topics and how well we are meeting stakeholder needs.

Respondents will have the opportunity to provide comments on what PJM is doing well and where we may improve

The survey is administered by a third party consultant and all responses are confidential. All survey participants will have the opportunity to provide their contact information if they'd like.

The Survey is open for 2 weeks from **September 30** to **October 11**. The Survey contains approximately **25 questions** and should take **less than 10 minutes** to complete

PJM is in the process of updating our communication subscription tool.

- **We ask that you provide the IP address, 13.111.63.217, to your IT support team so that they can receive the survey.**
- Full details regarding the tool updates can be found at the [Tech Change Forum](#)

Per PJM Manual 34 a User Group is a “group formed by any five or more Members sharing a common interest as defined in section 8.7 of the Operating Agreement.”

Recommendation has been made and approved to roll the eDART User Groups under the Tech Change Forum.

New names:

- Tech Change Forum: eDART

- Tech Change Forum: eDART XML

Other changes and logistical moves will be communicated when available.

# General Enhancements

Currently, the RTEP# field in [linesout.txt](#) and [linesout\\_new.txt](#) files allows a max of 8 characters. As a result, RTEP numbers are cut off if a ticket has more than one.

```

13-DEC-2019 1800 O Received 03/26/2019 15:36 s1364, Y Duration Submitted |
13-DEC-2019 1800 O (Continuous )
13-DEC-2019 1800 O (Other )
13-DEC-2019 1800 O (Relay Replacement (No impact to primary clearing) )
13-DEC-2019 1800 O |
13-DEC-2019 1800 O (11-NOV-2019 0700 13-DEC-2019 1800 01/18/2019 09:28)
(Received 01/23/2019 11:27)
  
```

## Solution:

- RTEP # renamed to RTEP
- RTEP field will display Yes if the ticket has RTEP numbers and will be blank if not.
- New file created that will have a list of tickets where RTEP is 'Yes' and the RTEP #(s).

RTEP file: <https://edart.pjm.com/reports/rtep.txt> (*future*)

A link to the RTEP file will also be added on the Outage Information page: <https://www.pjm.com/markets-and-operations/etools/oasis/system-information/outage-info.aspx>

Currently, eDART sends an email when a cause type (Gen Outage or Trans Outage) is added or retired and when a Gen Outage cause type is associated to/removed from a unit type.

Member request to consolidate the emails sent when a Gen cause type is associated to a unit type.

**Solution:**

An email will be sent once a day with all the changes per cause type.

The following are being retired:

- Tariff Equipment Details download
  - Same as Tariff Facilities download except for <short\_name>; no recent usage.
- SSR, SSR By Date, ERL downloads & On Cost Max Emerg. upload
  - SSR application retired with [Manual 13 – Attachment C removal](#).
- Restoration Plans download
  - No longer needed for transmission ticket uploads.
- Status Report download
  - No recent usage

# Future Enhancements

Expansion of eDART equipment model to include loads.

## Future Model Build Functionality

- New functionality to implement future build with effective date (in and out of service) in eDART.
- Model build emails will still be sent on build day.
- Future equipment will be available for use in tickets and displayed in reports.

New eDART web-based functionality to allow Transmission Owners (TOs) to update and view current voltage limits on buses.

- Report for PJM & TOs to see effective voltage limits and PJM defaults.
- TOs submit changes to Voltage Limits: company defaults or per station/voltage combination with effective date.
- PJM approves changes to Voltage Limits.
- Tickets implemented in PJM's EMS by PJM or implemented without approval if limits already updated in PJM's EMS.

The following CSV downloads are scheduled to be retired by December 2019 from the Download drop down list:

- dcurvegen
- dcurvetrans
- ratingscsv

The CSV downloads will be available via the web UI on the applicable eDART application page. E.g. TERM for ratings download.

Only XML files will be available via the XML interface.

- General Discussion Topics
- **Generation Related Enhancements**
- Transmission Related Enhancements
- Question and Answer Resolution Session

Currently all transmission zones are displayed in the IRC Company Totals section resulting in blank columns if the company has no units in that zone.

Enhancement is to display only the transmission zones where the user's company has units.

The email fields in GO Surveys have been converted from a regular text field to an email field.

This will check that entered email addresses meet certain requirements like having @ and a domain.

- General Discussion Topics
- Generation Related Enhancements
- **Transmission Related Enhancements**
- Question and Answer Resolution Session

Increased voltage schedule precision from one to two decimal places.

- One decimal place (current setup) displayed unless 2 decimal places have been entered for a voltage schedule.

**Voltage Schedule Ticket Details (as of 09/08/2019)**

Ticket #	GO Company TO Company	TR Zone	Unit Name Equipment Name Bus Name	Voltage Schedule Type	Normal			Light	
					Target	Lower	Upper	Target	Lower
3620				Voltage (KV)	232.0	2.56 229.44	3.0 235.0		

Fixed the issue seen with revising a reactive voltage schedule with negative upper and lower values.

# TERM Enhancements

Ticket ID on the report changed to hyperlink which will open revision version of that ticket.

Congestion Management Priority added to the report under Ticket Status.

Back to Report button the ticket will return the user to the filtered report.

Ratings download (CSV file) available via Effective Ratings Report.

- Download is a zip file consisting of
  - Ratings.csv
  - Equipment.csv – includes R, X and B information
  - Equipment\_psse.csv
  - Limitations.csv
- If the report was filtered, downloaded file will have the filter results.
- Default file name format: RATINGS\_ *company short name* \_mm\_dd\_yyyy\_hh\_mm.zip

Filter options from the Download page added to Effective Ratings filter.

This screenshot shows the original filter interface. It features five dropdown menus for 'Type', 'Station Name', 'Voltage', 'Equipment Name', and 'End'. Below these are three radio buttons for 'Own Facilities', 'Notification Facilities', and 'Both', along with an 'RXB Only' checkbox. At the bottom are two buttons: 'Apply Filter' and 'Main Menu'.

This screenshot shows the updated 'Effective Ratings' filter interface. It includes the same five dropdown menus as the original. The radio buttons are now 'Own Facilities', 'Notification Facilities', 'Both', and 'All' (which is selected), with 'Permanent Only' also present. The 'RXB Only' checkbox is still there. Two new dropdown menus, 'Voltage From:' and 'Voltage To:', have been added. The buttons at the bottom are 'Apply Filter', 'Download', and 'Main Menu'.

# Network Model Enhancements

Equip. Type/Field Report added to the Network Model Main Menu.

Lists Network Model Change Request fields per equipment type.

Message from webpage ✕

? Linkages are required for all Transmission Outage tickets except:

1. Equipment replacements - one for one and no voltage level or topology change
2. Reconductoring
3. Construction of Foundations & Control houses
4. Relay Only work
5. Wave Traps
6. Cut-In/Take Out of Mobile equipment (verify with MC lead)
7. Wreck & remove equipment - no topology changes
8. Pulling lines into substation but not connecting where actual energization is assigned to another cut in ticket

OK Cancel

## Network Model View:
