MISO-PJM CTS

Ginger Quintavalla
State and Member Relations
• Will facilitate a joint clearing of bids between RTOs, using advisory and real time pricing

• Adjustments to associated schedule/eTag required for energy to flow in real time

• Will add a capability to optimize real time transactions between PJM and MISO in order to lower system costs for the two RTOs
System Changes

• ExSchedule
  – New portal for bid entry
  – Change to the logic for validation

• Markets – SCED engine
  – Changes to accommodate CTS transactions
  – Common clearing engine

• Data Exchanges – multiple exchanges with MISO
