MISO-PJM CTS Initiative Roadmap

As of August 2017
Overview

- Will facilitate a joint clearing of bids between RTOs, using advisory and real-time pricing

- Adjustments to associated schedules/eTags required for energy to flow in real-time

- Will add a capability to optimize real-time transactions between PJM and MISO in order to lower system costs for the two RTOs
System Changes

- **ExSchedule**
  - New portal for bid entry
  - Change to the logic for validation

- **Markets – SCED engine**
  - Changes to accommodate CTS transactions
  - Common clearing engine

- **Data Exchanges – multiple exchanges with MISO**
