MISO-PJM CTS Initiative Roadmap

As of September 2017
Overview

• Will facilitate a joint clearing of bids between RTOs, using advisory and real-time pricing

• Adjustments to associated schedules/eTags required for energy to flow in real-time

• Will add a capability to optimize real-time transactions between PJM and MISO in order to lower system costs for the two RTOs
System Changes

• ExSchedule
  – New portal for bid entry
  – Change to the logic for validation

• Markets – SCED engine
  – Changes to accommodate CTS transactions
  – Common clearing engine

• Data Exchanges – multiple exchanges with MISO
