ExSchedule Roadmap

As of August 30, 2017
**ExSchedule** is a tool that facilitates the scheduling of interchange transactions between PJM and other Balancing Authorities.

**Key Product Features**
- View and reserve a portion of PJM’s net ramp capability
- Review tags linked to an account
- Submit day-ahead bids that align with their real-time interchange transactions.

- **Prod:** Oct. 3

### Intraday
- **Train:** Aug. 15
- **Prod:** Nov. 1

### eTags 1.8.3
- **Train:** Jun. 19
- **Prod:** Oct. 10
- **1.8.3 eTags ONLY:** Nov. 7
• eTags 1.8.3
  – Version 1.8.3 of the e-Tag specification formally introduces the Market Operator (MO) role as a participant on e-Tags. As part of this change, the market operator function of BAs and TSPs, which allows them to perform market adjusts, is now moved under this new role.
  – October 10th – Version 1.8.3 will be moved to production
  – No member testing is required
