eDART Roadmap

As of Oct 10th, 2017
eDART (electronic Dispatcher Application and Reporting Tool) is a suite of electronic applications used to facilitate dispatcher-to-dispatcher communications, along with other engineering communication and coordination functions.

- eDART Product Page
- eDART Training Presentations
- eDART User Group
- eDART XML User Group
Background – eDART Applications

- Used to verify if enough reserve MW available.
- Used to verify generation will not over-exceed light load margins.
- Used to schedule the output of Susquehanna River Hydroelectric Assets.

Used to record and schedule:
- Generator MW Outages
- Voltage Regulator Outages
- Governor Outages
- D-Curve Adjustments
- Reactive Tests
- Reactive Test Results Tickets
- GO Survey

(IRC)
Used to verify if enough reserve MW available.

Used to capture unit data and determine critical load in system restoration plans.
Background – eDART Applications

- Used to view updates made to Object IDs.
- Used to coordinate the update of system restoration plans.
- Used to record and schedule non-generator transmission facility outages.
- Used by companies to submit changes to the transmission grid.
- Used to record and schedule line, transformer, phase shifters, series and flow devices temperature apparent power ratings.
- Used to practice and coordinate restoration of service in PJM area after a blackout.
- Used to update facility clearing times data used in dynamic studies.
Background – eDART Applications

Current Status Report
15 minute snapshot of current status

Peak Status Report
Forecast of system condition for the peak of the day

Supplemental Status Report (SSR)
72 hour forecast of system condition; typically for extreme hot/cold weather conditions

Gen Checkout
Used to compare and highlight discrepancies between Market Gateway bids and Available Capacity. Brings Markets and Operations together in real-time

Used to record and coordinate
- Reactive Reserve Check (RRC)
- D-Curve Review (on Gen. Tickets menu for Gen users)

Used to manage PSSE mapping information for the purpose of sending and receiving info to/from NERC SDX

- **Start Date**
- **End Date**

**User Group Meetings:**
- May 31 & June 1

**Train:**
- June 13

**Prod:**
- July 26

**Parallel Operations:**
- June 26

**edUG-G Meeting:**
- May 5

**Download:**
- June 26

**Upload:**
- Sept 27

**Prod:**
- Dec 2017

Q3 2017 Release

• Next Release: Mid-December 2017
  – Blackstart Calculator Enhancements
  – Other Q4 enhancements will be discussed in User Group Meetings

• Recent Release: September 27th
  – GO Survey Enhancements
    • MS Excel friendly, tab separated .txt file for download.
    • Ability to save partially completed GO Survey.
    • CSV upload file for responding to GO Survey
Current timeline for Web UI refresh

- 2017
  - User Experience Analysis and Design
    - Interested eDART web UI users should contact Chidi.Ike@pjm.com.
  - Requirements gathering

- 2018
  - User accounts mapping to Account Manager
  - Work planning (overall project schedule & web UI page sequencing)
  - Web UI refresh
  - Progress review
2017 & 2018 eDART Browserless Refresh Roadmap
