5-Minute Settlements Roadmap

As of April 10, 2018
• Proposed implementation date now April 1, 2018
• FERC Order 825 – Sub-Hourly Settlements
  – Align settlement and dispatch intervals by:
    • Settling energy transactions in its real-time markets at the same time interval it dispatches energy
    • Settling operating reserves transactions in its real-time markets at the same time interval it prices operating reserves
    • Settling intertie transactions in the same time interval it schedules intertie transactions
  – Final Rule issued June 16, 2016
  – Compliance Filing submitted January 11, 2017
• Align prices with resource dispatch instructions and operating needs, providing appropriate incentives for resource performance
### 5-Minute Settlements Roadmap for 2018

- **January 8, 2018**
- **Implementation Date: April 1, 2018**

- Project went live on 4/1 per the schedule
System Changes

- Market Settlement Calculation System (MSCS)
- Market Settlement Reporting System (MSRS)
  - New 5 Minute reports
  - Minimize changes to current hourly reports
- Power Meter
  - Accept 5 minute meter data (though not required)
- Emergency Procedures application changes
  - User Interface changes
  - XML file changes
## Existing Hourly Data: Where will data exist for an Operating Day?

<table>
<thead>
<tr>
<th></th>
<th>Operating Days &lt; 4/1/2018</th>
<th>Operating Days &gt;= 4/1/2018</th>
</tr>
</thead>
</table>
| **Hourly RT LMP & Ancillary Service LMP** (Daily and Monthly files) | • Flat files on pjm.com**  
• Data Miner 2 | • Data Miner 2 |
| **Hourly DA LMP** (Daily and Monthly Files) | • Flat files on pjm.com**  
• Data Miner 2 | • Data Miner 2 |

</table>

- Preliminary and Final load weighted average transmission zone LMPs and residual aggregate LMPs will be available
Appendix – Previously Communicated Information
The following MSRS reports containing static test data for the operating days of 11/13 and 12/15 have been released in the MSRS training environment.

- Spot Market Energy Charge Summary
- Energy Market & Congestion Loss Charges Details
- Generator LMP Charge Summary
- Balancing Generator LMP Charges
- Explicit Loss Charges
- Explicit Congestion Charges
- Real-Time Daily Energy Transactions*
- Day-Ahead Daily Energy Transactions*

* Denotes new
Ancillary Services / Operating Reserves Market Trials

- Ancillary Services and Operating Reserves data available in MSRS Training environment
  - Utilize the same operating days as the Day-ahead and Balancing market trials
    - 11/13/2017 and 12/15/2017
  - Regulation, Sync Reserve, and Non-Sync Reserve data on 2/20
  - Load Response and Operating Reserve data on 2/26
  - Communication will be sent out to identify specific reports

- 3rd Market Trial date – Posted on or before 3/19 for the date of 3/6/2018

- Questions/Comments? mss@pjm.com
Generation Resource
- Sends email to PJM Market Settlements at least 3 business days prior to Operating Day for which 5-minute revenue meter data is effective

PJM Market Settlements
- Performs verification
- Notifies Generation Resource that resource is set-up in Power Meter

Generation Resource
- Submits five minute revenue meter data on effective Operating Day
Based on member requests, the following data will be available beginning March 6 for testing purposes for the operating day of March 5
- Five Minute Real-Time LMPs – Daily only
- Five Minute Ancillary Services Prices – Daily only

Data Miner 2 beta environment will provide UI and API interface to access this data

These Real-Time LMPs will be considered test data and will not be used for any settlement calculations

**Note 1:** PJM is publishing the LMP data solely for member testing purposes only. These LMPs will be available on Data Miner 2 train environment until April 1. After April 1, the verified LMP data will be available in Data Miner 2 production

**Note 2:** This data will be available on Data Miner 2 only. The csv files will be posted on pjm.com will remain the hourly LMP values
Day-ahead and Real-time LMP Postings

Hourly RT and DA LMP CSV files

Available through March 31, 2018

Will no longer be published effective April 1, 2018

Production Data Miner

Hourly RT LMPs, Ancillary Service Clearing Prices, and DA LMPs available in August 2017

Hourly values will continue to be published in Data Miner after April 1, 2018

5 Minute RT LMPs and Ancillary Service Clearing Prices published on April 1, 2018
• PJM will be implementing the following:
  – Transpose the data label column into numerous report columns and add in EPT Interval Ending and GMT Interval Ending columns
    • Conserves report width, but adds more rows to report
    • Removes “Total” column
## Option Implemented: Transposed Data Labels

| Customer ID | Custom er Code | Data | EPT Interval Ending | GMT Interval Ending | Unit ID | Unit Name | Unit Ownership Share | DA Generator Unit (MW) | DA Scheduled MWh | Dispatch Rate ($/MW/h) | RT Generator Unit (MW) | RT Schedule ID | RT Startup Cost ($) | RT Additional Startup Cost ($) | RT No-Load Cost ($) | DA Energy Offer ($) | DA No-Load Cost ($) | DA Startup Cost ($) | DA Value ($) | DA Net Revenue ($) | Scheduled MWh | Scheduled (Max MWh) | RT Schedule ID | BOR Reason ID | BOR Region ID |
|-------------|----------------|------|---------------------|---------------------|---------|-----------|---------------------|------------------------|------------------|----------------------|------------------------|----------------|----------------|-----------------------------|----------------|-----------------|----------------|----------------|----------------|----------------|----------------|-------------------|----------------|-------------------|----------------|---------------|--------------|
