

# Markets Gateway Roadmap

As of August 21, 2018

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Order 831 Offer Verif. (auto)							●		● ◆	Prod: 9/30		

**Legend**

- Start Date
- ◆ End Date

- On April 2<sup>nd</sup>, Order 831 – Offer Verification was approved by FERC, with an implementation date 10 days later (April 12)
- Starting with the April 12 Market Day, the **incremental energy offer price cap in *Markets Gateway* changed to \$1,000/MWh** (from \$2,000/MWh) for ***all*** schedules (Cost-based, Priced-based, and Price PLS schedules), for both daily and hourly offers (Generator > Schedule > Offer and Generator > Schedule > Offer Details)
- As discussed previously, PJM has implemented a manual process for the verification of all incremental cost-based offers over \$1000, which became effective with the April 12 Market Day
- If you anticipate the need to submit a Cost-based offer over \$1,000 please become familiar with the Offer Screening and Exception Process by reviewing the [Offer Verification Instructions and Guidelines](#) on the [Offer Verification Webpage](#)
  - Participant submits offer curve via Markets Gateway or XML, where all desired segments greater than \$1,000/MWh, are set equal to \$1,000/MWh.
  - Participant fills out template and submits via SharePoint site
  - PJM evaluates information and communicates segments approved
  - Participant resubmits offer curve via Markets Gateway or XML reflecting the approved segments values
- Automated process targeted for late September

## Complete – in TRN & PRD on August 8

- In preparation for the future implementation of soak time, certain parameters will be added to Markets Gateway for data collection purposes only
- Cold, intermediate and hot soak time data fields will be added on the Generator > Schedules > Detail screen in Markets Gateway to the Time section
- Soak time is defined as the minimum number of hours a unit must run from the time after generator breaker closure (MWs greater than 0) to the time the unit is dispatchable
- Participants will not be required to enter this information
- Target implementation (UI and XML): Q3 2018 (likely August)

# Product Details

[Markets Gateway](#) allows users to submit information and obtain data needed to conduct business in the Day-Ahead, Regulation and Synchronized Reserve Markets.

## Key Product Features

- View Market Results
- Manage Generation and Load Response Portfolios
