2018 Markets Gateway Roadmap
• On April 2\textsuperscript{nd}, Order 831 – Offer Verification was approved by FERC, with an implementation date 10 days later (April 12)

• Starting with the April 12 Market Day, the \textit{incremental energy offer price cap in Markets Gateway changed to $1,000/MWh} (from $2,000/MWh) for \textit{all} schedules (Cost-based, Priced-based, and Price PLS schedules), for both daily and hourly offers (Generator > Schedule > Offer and Generator > Schedule > Offer Details)

• As discussed previously, PJM has implemented a manual process for the verification of all incremental cost-based offers over $1000, which became effective with the April 12 Market Day

• If you anticipate the need to submit a Cost-based offer over $1,000 please become familiar with the Offer Screening and Exception Process by reviewing the \textit{Offer Verification Instructions and Guidelines} on the \textit{Offer Verification Webpage}
  – Participant submits offer curve via Markets Gateway or XML, where all desired segments greater than $1,000/MWh, are set equal to $1,000/MWh.
  – Participant fills out template and submits via SharePoint site
  – PJM evaluates information and communicates segments approved
  – Participant resubmits offer curve via Markets Gateway or XML reflecting the approved segments values

• Automated process targeted for late September
Product Details
**Markets Gateway** allows users to submit information and obtain data needed to conduct business in the Day-Ahead, Regulation and Synchronized Reserve Markets.

**Key Product Features**
- View Market Results
- Manage Generation and Load Response Portfolios
- Manage Ancillary Service Data
- Manage Market Offers and Transactions
