- The RRC drill has been put into the Sunday Emergency Procedure drill schedule, about once a month.
- Users should review Self Check data **daily** and ahead of RRC issuance.
- Issues and requests for updates should be sent to RRCHelp@pjm.com.
PJM will be releasing a new browserless .jar file for eDART in the near future
File will be updated to enhance security
Can be found at http://pjm.com/pub/etools/edart/xmldocs/xmldoc.html
Further communication to follow
Currently there are 500 to 700 eDART user accounts that have not logged in at least since 2017.

Account Clean Up Timeline (Q4 2018):

- Accounts with last login more than 365 days in the past will be locked.
- Accounts locked for more than 365 days will be revoked.
- Emails with list of dormant users will be sent to Customer Account Managers (CAM).
• Tentative Train Release – End of Q2
  – New browserless functionality
  – More details to follow at next month’s Tech Change Forum
eDART (electronic Dispatcher Application and Reporting Tool) is a suite of electronic applications used to facilitate dispatcher-to-dispatcher communications, along with other engineering communication and coordination functions.

- eDART Product Page
- eDART Training Presentations
- eDART User Group
- eDART XML User Group
Background – eDART Applications

- **IRC**
  - Used to verify if enough reserve MW available.
  - Used to verify generation will not over-exceed light load margins.

- **Used to schedule the output of Susquehanna River Hydroelectric Assets**

- **Used to capture unit data and determine critical load in system restoration plans.**

- **Used to record and schedule:**
  - Generator MW Outages
  - Voltage Regulator Outages
  - Governor Outages
  - D-Curve Adjustments
  - Reactive Tests
  - Reactive Test Results Tickets
  - GO Survey

- **(IRC)**
  - Used to verify if enough reserve MW available.
Background – eDART Applications

Used to view updates made to Object IDs.

Used by companies to submit changes to the transmission grid.

Used to coordinate the update of system restoration plans.

Used to practice and coordinate restoration of service in PJM area after a blackout.

Used to record and schedule non-generator transmission facility outages.

Used to record and schedule line, transformer, phase shifters, series and flow devices temperature apparent power ratings.

Used to update facility clearing times data used in dynamic studies.
Current Status Report
15 minute snapshot of current status

Peak Status Report
Forecast of system condition for the peak of the day

Supplemental Status Report (SSR)
72 hour forecast of system condition; typically for extreme hot/cold weather conditions

Gen Checkout
Used to compare and highlight discrepancies between Market Gateway bids and Available Capacity. Brings Markets and Operations together in real-time

Used to record and coordinate
- Reactive Reserve Check (RRC)
- D-Curve Review (on Gen. Tickets menu for Gen users)

Used to manage PSSE mapping information for the purpose of sending and receiving info to/from NERC SDX
