Non-refreshed eSuite Home Page to be Retired

This page will be retired in 2020. Tools that have not yet been refreshed can be accessed on the left side of this page. Please use My Tools Home for all refreshed tools.

PJM Interconnection’s tools are a group of sophisticated internet-based software applications that allow members to transaction much of their business online. Using PJM’s tools gives members real-time data about the electric system. They can buy and sell power, arrange transmission service, schedule contract purchases, carry out business strategies and make critical business decisions.
